**Societal Decision-making** Svein S. Andersen, Tom R. Burns, 1992 This text deals with societal decision making relating to large scale major energy facilities abbreviated hereafter as MEFs hydro power developments nuclear power plants and off shore petroleum projects In Norway as in many other countries national authorities have a major responsibility for the planning financing and construction of such projects Construction of large scale energy facilities is part of industrialization and modernization

*Transparency and Accountability in Science and Politics* K. Andersson, 2008-07-10 This book challenges the role of scientists in policy making and the idea of deliberative democracy The author argues that awareness must increase among both politicians and the citizens who elect them We must revitalise the decision making processes in representative democracy The book proposes new institutional structures

**Democratic Education for Social Studies** Anna S. Ochoa-Becker, 2006-12-01 In the first edition of this book published in 1988 Shirley Engle and I offered a broader and more democratic curriculum as an alternative to the persistent back to the basics rhetoric of the 70s and 80s This curriculum urged attention to democratic practices and curricula in the school if we wanted to improve the quality of citizen participation and strengthen this democracy School practices during that period reflected a much lower priority for social studies Fewer social studies offerings fewer credits required for graduation and in many cases the job descriptions of social studies curriculum coordinators were transformed by changing their roles to general curriculum consultants The mentality that prevailed in the nation s schools was back to the basics and the basics never included or even considered the importance of heightening the education of citizens We certainly agree that citizens must be able to read write and calculate but these abilities are not sufficient for effective citizenship in a democracy This version of the original work appears at a time when young citizens teachers and schools find themselves deluged by a proliferation of curriculum standards and concomitant mandatory testing In the 90s virtually all subject areas including United States history geography economic and civics developed curriculum standards many funded by the federal government Subsequently the National Council for the Social Studies issued the Social Studies Curriculum Standards that received no federal support Accountability captured in the No Child Left Behind Act passed by Congress has become a powerful political imperative that has a substantial and disturbing influence on the curriculum teaching and learning in the first decade of the 21st century

*Decision Behaviour, Analysis and Support* Simon French, John Maule, Nadia Papamichail, 2009-07-30 A multi disciplinary exploration of how we can help decision makers to deliberate and make better decisions

*Professional Decision Making in Social Work* Brian Taylor, 2010-04-21 Many social workers face daily pressure to make sound decisions in very difficult circumstances occasionally having to manage impossible expectations Politicians and the media may spotlight care decisions where a tragedy or complaint occurs In this complex arena of conflicting demands and considerations from the public the client the family the organisation the professional needs a robust and yet flexible framework to inform practice decisions This book is

written to help social work practitioners and students make professional decisions with clients from exercising statutory powers and duties to protect children from abuse to making decisions about risk Civil Society and Nuclear Non-Proliferation Claudia Kissling,2016-05-23 Since the end of the Cold War globalization has brought new actors to the political arena One of those which has attracted considerable attention in academic research is civil society or NGOs Claudia Kissling addresses the topic of civil society participation in the nuclear non proliferation regime The regime qualifies well for this objective since it features given its characteristics as a treaty regime in the international security field notable legal avenues for civil society participation The study takes on a twofold perspective It addresses the empirical question of whether civil society can contribute to the evolution of regimes in the security field especially when it comes to security cooperation It also questions whether civil society can under certain conditions contribute to the democratic quality of international decision making Here empirical findings are used in order to test normative political theories on the legitimacy and democracy of global institutions *Social Studies and Diversity Education* Elizabeth E. Heilman,Ramona Fruja,Matthew Missias,2010-01-21 The preparation of social studies teachers is crucial not only to the project of good education but even more broadly to the cultivation of a healthy democracy and the growth of a nation s citizens This one of a kind resource features ideas from over 100 of the field s most thoughtful teacher educators reflecting on their best practices and offering specific strategies through which future teachers can learn to teach thus illuminating the careful planning and deep thinking that go into the preparation of the social studies teachers While concentrating on daily teaching realities such as lesson planning and meeting national state or provincial standards each contributor also wrestles with the most important current issues on educating teachers for today s increasingly diverse complex and global society Features of this unique teaching resource include Volume sections that are arranged by both disciplinary organization and approach or activity Thoughtful introductory section essays that conceptualize each theme providing a conscientious theoretical overview and analysis of each individual section Rich and concrete examples of best practice from some of the field s most diverse and highly regarded scholars and teacher educators An index that identifies the appropriate teaching level and teacher education context and links the strategies and ideas that are presented in the essay to the relevant INTASC and NCSS standards for quick reference in classroom planning as well as institutional development and implementation A much needed addition to the field this comprehensive volume will be of value to any teacher interested in social studies or diversity education across age groups and educational contexts *Digital Rebellion* Todd Wolfson,2014-11-30 Digital Rebellion examines the impact of new media and communication technologies on the spatial strategic and organizational fabric of social movements Todd Wolfson reveals how aspects of the mid 1990s Zapatistas movement network organizational structure participatory democratic governance and the use of communication tools as a binding agent became essential parts of Indymedia and other Cyber Left organizations From there he uses oral interviews and other rich ethnographic data to chart the media based

think tanks and experiments that continued the Cyber Left's evolution through the Independent Media Center's birth around the 1999 WTO protests in Seattle. Melding virtual and traditional ethnographic practice to explore the Cyber Left's cultural logic, Wolfson maps the social, spatial, and communicative structure of the Indymedia network and details its operations on the local, national, and global level. He looks at the participatory democracy that governs global social movements and the ways democracy and decentralization have come into tension and how the switchboard of struggle conducts stories from the hyper-local and disperses them worldwide. As he shows, understanding the intersection of Indymedia and the Global Social Justice Movement illuminates their foundational role in the Occupy struggle and other emergent movements that have re-energized radical politics.

Multidimensional Inequalities Bent Greve, 2021-10-25. *Multidimensional Inequalities* is a deep dive into the historical contexts and contemporary realities that negatively influence society and its structures. It is often overlooked that inequality is not just about income and wealth but rather a broad spectrum of intersecting factors. This book focuses on each aspect individually, analysing its effect on welfare systems and informs about the instruments available to reduce inequality.

*Assessment, Risk and Decision Making in Social Work* Campbell Killick, Brian J. Taylor, 2024-04-04. As a practising social worker, you will need to be able to make sound judgments in complex contexts and when you are under pressure. This book covers the essential knowledge you will need to understand and develop skills in relation to professional judgement and decision-making processes, including the use of assessment tools, engagement in assessment and decision processes, the context of risk, complexity and uncertainty in practice, communication and management of risk within social care processes.

The Sage Handbook of Decision Making, Assessment and Risk in Social Work Brian J. Taylor, John D. Fluke, J. Christopher Graham, Emily Keddell, Campbell Killick, Aron Shlonsky, Andrew Whittaker, 2023-08-16. The SAGE Handbook on Decision Making: Assessment and Risk in Social Work provides a comprehensive overview of key strands of research and theoretical concepts in this increasingly important field. With 49 chapters and four section summaries, this Handbook describes the state of the art, discusses key debates and issues, and gives pointers on future directions for practice, research, teaching, management of services, and development of theoretical understandings. A key aim of this Handbook is to support the development of sound applied knowledge and values to underpin reasoned professional judgement and decision-making by social workers in practice and those in management and regulatory roles. With contributions from a global interdisciplinary body of leading and emerging scholars from a wide variety of roles, this handbook has been designed to be internationally generalisable and applicable to all major areas of social work. This Handbook provides a field-defining account of decision-making, assessment, and risk in social work, which is unrivalled for its diversity and strength of coverage and will be of value to social work researchers, teachers, and practitioners, as well as to those in allied fields such as health care.

**The Debate over Corporate Social Responsibility** Steven K. May, George Cheney, Juliet Roper, 2007-04-19 Should business strive to be socially responsible and if so how The Debate over Corporate Social Responsibility updates and broadens the discussion of these questions by bringing together in one volume a variety of practical and theoretical perspectives on corporate social responsibility It is perhaps the single most comprehensive volume available on the question of just how social business ought to be The volume includes contributions from the fields of communication business law sociology political science economics accounting and environmental studies Moreover it draws from experiences and examples from around the world including but not limited to recent corporate scandals and controversies in the U S and Europe A number of the chapters examine closely the basic assumptions underlying the philosophy of socially responsible business Other chapters speak to the practical challenges and possibilities for corporate social responsibility in the twenty first century One of the most distinctive features of the book is its coverage of the very ways that the issue of corporate social responsibility has been defined shaped and discussed in the past four decades That is the editors and many of the authors are attuned to the persuasive strategies and formulations used to talk about socially responsible business and demonstrate why the talk matters For example the book offers a careful analysis of how certain values have become associated with the business enterprise and how particular economic and political positions have been established by and for business This book will be of great interest to scholars business leaders graduate students and others interested in the contours of the debate over what role large scale corporate commerce should take in the future of the industrialized world

**Liberal Democracy and the Social Acceleration of Time** William E. Scheuerman, 2020-06-09 A fine contribution to the literature on the problems of modern liberal democracy Choice The pace of American society has quickened exponentially since the Founding Fathers first mapped the constitution Information travels at the speed of light so does money We can hop from one side of the country to the other in a matter of hours contact our elected officials instantaneously and share our views with thousands of people at the touch of a button Both academia and the popular media have grappled with the consequences of this acceleration on every aspect of contemporary life Most pressing however may be its impact on political life In Liberal Democracy and the Social Acceleration of Time William Scheuerman offers a sophisticated assessment of the implications of social and technological celerity in the operation of liberal democracies Specifically he asks what is acceleration s main impact on the traditional liberal democratic model of the separation of powers According to Scheuerman high speed has created an imbalance The executive branch was intended to react with dispatch by contrast legislatures and the courts were designed to be more deliberate and thoughtful While this system of checks and balances was effective in the age of horse and buggy Scheuerman argues that the very features that were these institutions strengths may now be a liability Throughout this book Scheuerman offers a constructive critique which articulates ways in which liberal democracy might be recalibrated in accordance with the tempo of modern society

Social Media Impacts on Conflict and Democracy Lisa Schirch, 2021-04-26 Social media technology is having a dramatic impact on social and political dynamics around the world The contributors to this book document and illustrate this techtonic shift on violent conflict and democratic processes They present vivid examples and case studies from countries in Africa South and Southeast Asia Latin America as well as Northern Ireland Each author maps an array of peacebuilding solutions to social media threats including coordinated action by civil society governments and tech companies to protect human minds relationships and institutions Solutions presented include inoculating society with a new digital literacy agenda designing technology for positive social impacts and regulating

technology to prohibit the worst behaviours A must read both for political scientists and policymakers trying to understand the impact of social media and media studies scholars looking for a global perspective Social Justice in These Times  
James O'Donnell, Marc Pruyn, Rudolfo Chávez Chávez, 2006-11-01 This text covers the philosophy theory and praxis of social justice engaging within cultural pedagogical and political contexts and neo liberalism George W Bush and the No Child Left Behind Act
