Society and the Death of God Sal Restivo, 2021-06-08 This book advances the strong programme that sociology and anthropology provide a scientific foundation for arguing that God and the gods are human creations Contending that religion is one but not the only way to systematize and institutionalize the moral order of a society the author argues that religion reflects the fundamental human need for belonging and the social function of compassion As such our transcendental and supernatural ideas are really concerned with our everyday lives in communities and faced with the severity and immediacy of the global problems with which the world is confronted existential threats it is increasingly important to abandon delusions and correct our mistake in reference not by eradicating religion but by grounding it more explicitly in earthly matters of community social solidarity belonging and compassion A wide ranging study of the roots nature and purpose of religion and theistic belief Society and the Death of God will appeal to sociologists social

The Age of the Social Sal Restivo, 2018-06-12 The concept of society sui generis society as a level of reality which could be studied scientifically crystallized in the middle of the nineteenth century in Europe with the work of Durkheim Marx and Weber and today more than at any other period in history the idea of the social has gained a foothold in philosophy biology and neuroscience However this idea has emerged into prominence not through the historical or contemporary efforts of sociologists but mainly through the efforts of biologists and neuroscientists This book seeks to re establish the credentials of sociology as the science of society While acknowledging the amalgamation of traditional disciplines into interdisciplinary and multidisciplinary networks of research and theory and championing interdisciplinarity in recognising the capacity of converging perspectives to yield more interesting general theories of social life the author defends disciplinarity in maintaining sociology's achievements as a discipline With chapters on the sociological world view imagining society the self love education mathematics and religion The Age of the Social re states the importance of sociology as the source of robust ideas about the social in an age in which this notion has grown in importance As such it will appeal to scholars across the social sciences with interests in method and philosophy in the social disciplines

Prevailing economic theory which explains efficiency using formalized rational choice models often simplifies human behavior to the point of distortion Jens Beckert finds such theory to be particularly weak in explaining such crucial forms of economic behavior as cooperation innovation and action under conditions of uncertainty phenomena he identifies as the proper starting point for a sociology of economic action Beckert levels an enlightened critique at neoclassical economics arguing that understanding efficiency requires looking well beyond the market to the social cultural political and cognitive factors that influence the coordination of economic action Beckert searches social theory for the components of an alternative theory of action one that accounts for the social embedding of economic behavior In Durkheim and Parsons he finds especially useful approaches to cooperation in Luhmann a way to understand how people act under highly contingent conditions and in Giddens an understanding of creative action and innovation Together these provide building blocks for a research program that will yield a theoretically sophisticated understanding of how economic processes are coordinated and the ways that markets are embedded in social cultural and cognitive structures Containing one of the most fully informed critiques of the neoclassical analysis of economic efficiency as well as one of the most thoughtful blueprints for economic
