

Aspiring and achieving: Highlighting DP and CP student research

An asterisk (*) indicates that the results focus on students pursuing the full DP with all of its courses and requirements.

Based on a large international data set, by the end of the **Diploma Programme (DP)**, **98%** of students **aspired** to at least a bachelor's degree and **81%** aspired to a master's, doctoral or professional degree.*

In line with previous research, about **85%** of DP students* in the United States (US) **enrolled in university immediately** after high school, compared to **66%** of all US high school graduates. DP students were also more likely than other US students to continue on to their second year of university (**persistence**).¹

Immediate post-secondary enrolment

● DP students* ● US national average 2013

Persistence

Pfiffner et al., 2020

In the UK, DP students* were more likely to achieve many positive **higher education outcomes** compared to matched A level students.²

Notes: This figure displays additive ratios. An additive ratio of greater than 1 means that DP students have greater odds of achieving that educational outcome compared to similar (matched) A level students.
