Volume I **Security and Privacy in Digital Rights Management** Tomas Sander, 2003-08-01 The ACM Workshop on Security and Privacy in Digital Rights Management is the first scientific workshop with refereed proceedings devoted solely to this topic. The workshop was held in conjunction with the Eighth ACM Conference on Computer and Communications Security CCS 8 in Philadelphia USA on November 5 2001. Digital Rights Management technology is meant to provide end to end solutions for the digital distribution of electronic goods. Sound security and privacy features are among the key requirements for such systems. Fifty papers were submitted to the workshop quite a success for a first time workshop. From these 50 submissions the program committee selected 15 papers for presentation at the workshop. They cover a broad area of relevant techniques including cryptography system architecture and cryptanalysis of existing DRM systems. Three accepted papers are about software tamper resistance an area about which few scientific articles have been published before. Another paper addresses renewability of security measures. Renewability is another important security technique for DRM systems and I hope we will see more publications about this in the future. I am particularly glad that three papers cover economic and legal aspects of digital distribution of electronic goods. Technical security measures do not exist in a vacuum and their effectiveness interacts in a number of ways with the environment for legal enforcement. Deploying security and an piracy measures adequately requires furthermore a good understanding of the business models that they are designed to support.

Techniques and Interventions for Play Therapy and Clinical Supervision Fazio-Griffith, Laura Jean, Marino, Reshelle, 2020-09-25 The use of techniques and interventions for play therapy during the supervision process for graduate and post graduate counselors provides a host of benefits for the counseling student post graduate intern and supervisor. The counselor in training is able to experientially integrate theory with practice through the use of different modalities that provide reflection and insight into their work with clients. Additionally the use of techniques and interventions for play therapy allows a secure and strong supervisory relationship which allows the counselor in training to explore personal and professional goals verbalize and conceptualize client issues goals and effective interventions and develop counselor client relationships that allow the client to progress during the therapeutic process. However play therapy techniques and interventions are not often incorporated into the supervision process unless the clinician is a registered play therapist being supervised by a registered play therapist supervisor. Techniques and Interventions for Play Therapy and Clinical Supervision is a critical reference source that provides an opportunity for all clinicians to incorporate play therapy techniques and expressive art interventions into the process of supervision. It presents techniques and methods that allow for more effective supervision for counselors in training which allows for more effective service delivery to clients. Highlighting topics that include play techniques in supervision cognitive behavioral play therapy and trauma this book is ideal for individuals in a university clinical school agency etc setting who provide supervision for counselors in training including graduate students and postgraduate students. The book is an excellent supplement for clinical courses at universities with counseling programs.
