Technological Capabilities In Developing Countries Industrial Biotechnology In Mexico:

Technological Capabilities in Developing Countries Ruby Gonsen, 2016-02-17 This book combines the concept of technological capabilities from the development literature with an explanation of the specifics of these capabilities in industrial areas affected by new biotechnology This provides a framework of analysis for the modern bioprocessing industry in Mexico The necessity to go beyond mastery of imported technologies for these industries is discussed More generally the absence of core scientific capabilities at the firm level and other country specific factors deter the potential for developing countries to catch up in biotechnology

Developing Innovation Systems Mario Cimoli, 2013-09-05 Mexico provides a case study of a cornerstone economy in the development of the hemispheric free trade zone in the Americas an adjusting economy which has been integrated into uneven economies Canada and the US This volume examines the Mexican economy and its attempt to develop an innovation system providing an example of the dynamics that are of concern to evolutionary economists

Beyond Imagination Zamanzima Mazibuko, 2018-12-28 Nanotechnology is sweeping the world This science of very small particles which includes genetic modification and the reconfiguring of the arrangement of atoms presents possibilities beyond imagination It also has huge implications for all South Africans especially at home How exactly is this new technology playing out in South Africa In countries like India nanotechnology is being supported as a source of income and innovation It has the potential to improve both the human condition and a countrys productivity and competitiveness Is South Africa doing what it should and could to foster nanotechnology and biotechnology and to advance bioeconomies within the country And what does the new technology mean for us as consumers How many of us know that this technology is already being employed in substances like suntan cream and lipstick with potential health implications for users The application of nanotechnology poses risks as well as huge benefits so we need to be particularly vigilant of the ethics and dangers of it This book provokes discussion around these important topics and relays eyeopening information to those of us who thought all of this was sci fi

Global Climate Governance Beyond 2012 Frank Biermann, Philipp Pattberg, Fariborz Zelli, 2010-02-18 An assessment of policy options for future global climate governance written by a team of leading experts from the European Union and developing countries Global climate governance is at a crossroads The 1997 Kyoto Protocol was merely a first step and its core commitments expire in 2012 This book addresses three questions which will be central to any new climate agreement What is the most effective overall legal and institutional architecture for successful and equitable climate politics What role should non state actors play including multinational corporations non governmental organizations public private partnerships and market mechanisms in general How can we deal with the growing challenge of adapting our existing institutions to a substantially warmer world This important resource offers policy practitioners in depth qualitative and quantitative assessments of the costs and benefits of various policy options and also offers academics from wide ranging disciplines insight into innovative interdisciplinary approaches towards international climate negotiations

Food for the

Few Gerardo Otero,2013-05-01 Recent decades have seen tremendous changes in Latin America's agricultural sector resulting from a broad program of liberalization instigated under pressure from the United States the IMF and the World Bank Tariffs have been lifted agricultural markets have been opened and privatized land reform policies have been restricted or eliminated and the perspective has shifted radically toward exportation rather than toward the goal of feeding local citizens Examining the impact of these transformations the contributors to Food for the Few Neoliberal Globalism and Biotechnology in Latin America paint a somber portrait describing local peasant farmers who have been made responsible for protecting impossibly vast areas of biodiversity or are forced to specialize in one genetically modified crop or who become low wage workers within a capitalized farm complex Using dozens of examples such as these the deleterious consequences are surveyed from the perspectives of experts in diverse fields including anthropology economics geography political science and sociology From Kathy McAfee's Exporting Crop Biotechnology The Myth of Molecular Miracles to Liz Fitting's Importing Corn Exporting Labor The Neoliberal Corn Regime GMOs and the Erosion of Mexican Biodiversity Food for the Few balances disturbing findings with hopeful assessments of emerging grassroots alternatives Surveying not only the Latin American conditions that led to bankruptcy for countless farmers but also the North's practices such as the heavy subsidies implemented to protect North American farmers these essays represent a comprehensive keenly informed response to a pivotal global crisis

Internationalisation and Enterprise Development in Ghana John Kuada,2000-05-09 Policy makers and scholars consider private enterprise development as one of the most promising avenues of economic growth in Africa To grow enterprises must improve the efficiency and effectiveness of their operations often through internationalisation It is generally believed that internationalisation enhances the technological and managerial capacities of firms and also helps them to leverage other types of resources not immediately available within their own countries In recent years there has been an upsurge of interest in exploring the extent to which African firms are integrated into global business networks and the benefits if any derived from such integrations The above informed the need for an empirical investigations in Ghana from 2002 2003 the results of which are presented in this book Based on the experiences in Ghana contributors to the volume explore the issues of internationalisation in Africa by focusing on firm level activities and inter firm relations rather than on macro issues They draw on dominant theories of internationalisation to explore issues such as sustained competitive advantages of firms management and business relations in export processing zones organisational structures competence and leadership culture learning and cross border inter firm linkages as well as finance and stock exchange performance in Ghana Internationalisation and Enterprise Development is a major contribution to the body of knowledge on enterprise development in Africa in general and Ghana in particular It is a must read to all who are interested in Africa's enterprise development including the role played by internationalisation in that process

Informal Sector Innovations Mammo Muchie,Saradindu Bhaduri,Angathevar Baskaran,Fayaz Ahmad Sheikh,2017-10-02 It is well documented that the

space of informal economic activity is rising across the globe This rise has been particularly significant in the least developed and developing countries especially after the onset of neo liberal policies and withdrawal of welfare state There has also been a shift in academic thinking on informal sector with attempts being made to understand the contribution of informal sector in generating employment and economic growth rather than focusing solely on exploitative labour conditions in these economic activities Indeed with the retreat of welfare state and the introduction of contract labour in the formal sector many issues related to occupational hazards and improper labour conditions do not remain unique to the informal sectors of the economy particularly in less developed countries This volume addresses a specific concern the issue of knowledge generation and innovative activities which lies at the core of sustained competitive advantage of these activities The chapters in this book were originally published in the African Journal of Science Technology Innovation and Development

Agriculture and Intellectual Property Rights V. Santaniello, 2000 Plant breeding patents the ownership to biological innovation and associated intellectual property rights IPR are the subject of increased attention worldwide They are particularly relevant in the field of agricultural biotechnology They are affecting public and private sector organisations and companies and are significant for developing as well as developed countries These issues have until recently evoked little policy analysis This book presents the perspectives of policy makers and economists on such issues and includes discussions of public research and property rights implications for developing countries IPR of wild genetic resources and IPR under the Convention of Biological Diversity among others

Strengthening Technological Capabilities International Labour Office, 1992 This book offers a review of ILO activities on technology reveals the challenges of endogenous capacity building in developing countries The book covers a range of areas including technology policy assessment evaluation of the impact of new technologies on employment working conditions and working environment
