

UNDERSTANDING PREHISTORIC TECHNOLOGY: The Evolution of Hunting Technologies in the Pacific Northwest

Presentation by Daniel Meatte, Archaeologist, Washington State Parks

This talk examines the *prehistoric technology* used to build and fashion Native American hunting weapons common to the Pacific Northwest. Hundreds of artifacts, weapons and tools are displayed during this presentation, affording the audience a chance to handle and examine this remarkable equipment up close. Samples of the materials used to make this gear – bone, wood, minerals, sinew, pigments, feathers, oils, etc. – are also displayed. Together, these items represent over 12,000 years of technological change. Understanding the knowledge and skills necessary to build, use and repair this gear provides greater insight about Washington's First Peoples.

Technologies for Prehistoric and Historic Preservation Of Tech Office of Technology Assessment,2004-12-01 Archaeological remains and historic structures and landscapes are important tangible reminders of this Nation s rich and diverse cultural heritage They provide a sense of our past and contribute in other ways to our quality of life Yet in recent years as the result primarily of population shifts urban growth and energy development the stresses on these unique nonrenewable cultural resources have increased dramatically As this assessment makes clear the appropriate use of a wide variety of preservation technologies many of which were originally developed for applications in natural science and engineering could reduce many of these stresses This report presents the primary findings of an assessment requested by the House Committee on Interior and Insular Affairs The Subcommittee on Public Lands is carrying out a major review of how Federal agencies implement Federal preservation policy This assessment directly supports the Committee s review by showing how the uses of certain methods techniques as well as tools and equipment can assist Federal State and local preservation efforts The assessment takes the unusual step of focusing on the applications of preservation technologies rather than preservation disciplines It examines the current use of preservation technologies and identifies research and development needs It also explores how improvements in Federal policy and implementation can facilitate the more effective

use of technologies appropriate for managing this country's prehistoric and historic cultural resources. In undertaking this assessment, OTA sought the contributions of a wide spectrum of knowledgeable and interested individuals. Some provided information and guidance; others reviewed drafts of the report. OTA gratefully acknowledges their contributions of time and intellectual effort. OTA also appreciates the timely help rendered by a number of individuals from the National Park Service. JOHN H. GIBBONS, Director.
