Technology And Responsibility:

Technology and Responsibility P.T. Durbin, 2013-03-09 Since it may seem strange for a new series to begin with volume 3 a word of explanation is in order The series Philosophy and Technology inaugurated in this form with this volume is the official publication of the Society for Philosophy the one requirement is that the scholarship be sound and all contributions to the series are subject to rigorous blind refereeing Technology the other half of the philosophy and technology pairing is also construed broadly Responsibility in Science and Technology Simone Arnaldi, Luca Bianchi, 2016-07-07 The present volume elucidates the scope of responsibility in science and technology governance by way of assimilating insights gleaned from sociological theory and STS and by investigating the ways in which responsibility unfolds in social processes Drawing on these theoretical perspectives the volume goes on to review a heuristic model of responsibility Such a model provides a simple tentative though no less coherent analytical framework for further examining the idea of responsibility its transformations configurations and contradictions *Technology, Anthropology, and Dimensions of Responsibility* Birgit Beck, Michael Kühler, 2020-02-19 With great power comes great responsibility In today's world with our growing technological power and the knowledge about its impact we are considered to be responsible for many instances that not long ago would have been deemed a matter of fate At the same time the looming options of e.g. genome editing or neuroprosthetics threaten traditional notions of responsibility if no longer the person but the technology involved is deemed to be responsible for a specific behaviour The growing ethical debate on the expansion of human responsibility e.g. when it comes to human machine interaction ambient intelligence or reproductive technologies thus intertwines with the challenge to formulate an appropriate understanding of the concept of personal responsibility and our respective anthropological self understanding in today's technological world The volume brings together both perspectives and aims at illuminating crucial dimensions of responsibility in light of technological innovation and our self understanding as responsible beings

Technology-Driven Evolution of the Corporate Social Responsibility Ecosystem Singh, Kuldeep, Yadav, Jitendra, Abraham, Rebecca, 2024-07-22 In the field of Corporate Social Responsibility CSR and sustainability a profound challenge emerges the intersection of traditional practices with the relentless march of technology Companies face a pressing dilemma as they navigate mandatory and voluntary CSR requirements grapple with stakeholder demands and strive for transparency in a digitally driven era The relationship between technology and CSR has become a pivotal concern affecting compliance monitoring reporting and ultimately the very fabric of corporate reputation This challenge calls for a nuanced understanding and it is precisely this void that the book *Technology Driven Evolution of the Corporate Social Responsibility Ecosystem* aims to fill The central predicament lies in the dynamic evolution of CSR practices against the backdrop of technological advancements As companies seek to balance mandatory and voluntary CSR initiatives the landscape is fraught with complexities Stakeholders armed with technology demand accountability and transparency pressuring companies to adapt

swiftly The challenge extends to the need for effective reporting maintaining social legitimacy and navigating the intricacies of CSR governance in a rapidly digitizing world The traditional norms of CSR are being reshaped requiring businesses to not only comprehend but also harness technology to align with societal expectations and environmental imperatives Social Responsibility in Science, Technology, and Medicine Paul T. Durbin, 1992 Not everyone agrees that professionals including academic philosophers need to be actively engaged in this fashion So another theme throughout is an argument against non engaged philosophers non engaged scientists and other non engaged professionals The social problems of a technological society are manifest The book attempts to show in a scholarly way how they might be addressed effectively Jacket

Technology and Responsibility P. T. Durbin, 1987-08-31 **The Technological World Picture and an Ethics of Responsibility** Egbert Schuurman, 2005 What does the Judeo Christian tradition have to say about a responsible ethics of technology In these pages Schuurman discusses the need for an ethics of technology and the spiritual historical background of modern technology The spirit of the Enlightenment has produced a scientific technological picture of the world with an ethical mix of values and norms that is still current But there are alternative approaches After drawing attention to the cosmological and the ethical deficiencies in contemporary ethics Schuurman makes a case for a different approach that starts with the enlightenment of the Enlightenment that addresses these deficiencies and that implies a cultural paradigm different from the current one He frames ethics as an ethics of responsibility and highlights the priorities values and norms that such an ethic implies He also speaks to concrete possibilities inherent to this approach that could reorient our technological culture and that would lead to political changes as well His is a new perspective that will undoubtedly involve struggle but it also affords hope **Philosophy, Technology, and the Environment** David M.
