Merrill, Dave Burghardt, 2003 **Design-Based Concept**

Learning in Science and Technology Education Ineke Henze, Marc J. de Vries, 2021-02-22 Learning concepts is a real challenge for learners because of the abstract nature of concepts This holds particularly true for concepts in science and technology education where learning concepts by doing design activities is potentially a powerful way to overcome that learning barrier Much depends however on the role of the teacher Design Based Concept Learning in Science and Technology Education brings together contributions from researchers that have investigated what conditions need to be fulfilled to make design based education work The chapters contain studies from a variety of topics and concepts in science and technology education So far studies on design based learning have been published in a variety of journals but never before were the outcomes of those studies brought together in one volume Now an overview of insights about design based concept learning is presented with expectations about future directions and trends *Engineering and Technology Education* Michael Hacker, David Burghardt, 2012 *Handbook of Research on Learning Design and Learning Objects: Issues, Applications, and Technologies* Lockyer, Lori, Bennett, Sue, Agostinho, Shirley, Harper, Barry, 2008-07-31 This book provides an overview of current research and development activity in the area of learning designs Provided by publisher

The Design of Learning Experience Brad Hokanson, Gregory Clinton, Monica W. Tracey, 2015-07-03 This book delves into two divergent yet parallel themes first is an examination of how educators can design the experiences of learning with a focus on the learner and the end results of education and second how educators learn to design educational products processes and experiences The book seeks to understand how to design how learning occurs both in the instructional design studio and as learning occurs throughout the world This will change the area s semantics at a deeper level it will change its orientation from instructors and information to learners and it will change how educators take advantage of new and old technologies This book is the result of a research symposium sponsored by the Association for Educational Communications and Technology AECT **Learning, Design, and Technology** J. Michael Spector, Barbara B. Lockee, Marcus D.

Childress, 2023-10-14 The multiple related fields encompassed by this Major Reference Work represent a convergence of issues and topics germane to the rapidly changing segments of knowledge and practice in educational communications and technology at all levels and around the globe There is no other comparable work that is designed not only to gather vital current and evolving information and understandings in these knowledge segments but also to be updated on a continuing

basis in order to keep pace with the rapid changes taking place in the relevant fields The Handbook is composed of substantive 5 000 to 15 000 words peer reviewed entries that examine and explicate seminal facets of learning theory research and practice It provides a broad range of relevant topics including significant developments as well as innovative uses of technology that promote learning performance and instruction This work is aimed at researchers designers developers instructors and other professional practitioners

Handbook of Research in Educational Communications and Technology M. J. Bishop, Elizabeth Boling, Jan Elen, Vanessa Svihla, 2020-09-21 The 5th edition of the prestigious AECT Handbook continues previous efforts to reach outside the traditional instructional design and technology community to the learning sciences and computer information systems communities toward developing a conceptualization of the field However given the pervasive and increasingly complex role technology now plays in education since the 1st edition of the Handbook in 1996 the editors have reorganized the research chapters in this edition to focus on the learning problems we are trying to solve with educational technologies rather than to focus on the things we are using to solve those problems Additionally for the first time this edition of the Handbook reflects our field's growing understanding of the importance of design scholarship to inform practice by including design case chapters These changes for this edition of the Handbook are intended to bring educational technology research into the broader framework of educational research by elaborating on the role instructional design and technology plays as a scholarly discipline in addressing education's increasingly complex issues Provides comprehensive reviews of new developments in educational technology research and design practice Includes concrete examples to guide future research and practice in the ways emerging technologies can be used to solve educational problems Contains extensive references furnished to guide readers to the most recent research and design practice in the field of instructional design and technology

The Business Side of Learning Design and Technologies Shahron Williams van Rooij, 2017-09-22 The Business Side of Learning Design and Technologies provides a ready reference with actionable tools and techniques for recognizing the impact of learning design technology decisions at the project business unit and organizational levels Written for early and mid career learning designers and developers as well as students and researchers in instructional learning design and technology programs this volume focuses on the business issues underlying the selection design implementation and evaluation of learning opportunities Using scholarly and practitioner research interviews with Learning and Development thought leaders and the author's own experience readers will learn how to speak the language of business to demonstrate the value of learning design and technologies
