

An illustration of a man with light brown hair lying in bed, covered by a white sheet, with his hands clasped. He is looking upwards with a peaceful expression. Above him, a dark blue space is filled with numerous glowing, concentric circles and swirling patterns in shades of blue, green, and gold, resembling a dream or a telepathic transmission. A dark green rectangular box is positioned in the upper right corner, containing the title text in white serif font.

E. Von Grunebaum, Roger Caillois, 2023-07-28 The study of dreams and their role in human societies particularly within classical Islam provides a fascinating lens through which to understand both individual and collective psychology In medieval Islamic culture dreams were seen not only as personal experiences but as profound communications from the divine or supernatural This belief system imbued the dream with cognitive power often interpreting dreams as forms of prophecy or divine messages a view that transcended the individual s inner psyche and extended into the realm of objective truth Dreams were considered a bridge to understanding the future the Hereafter and the will of God with scholars like Abdalghani an N bulus developing elaborate systems for interpreting their meanings These interpretations drew

heavily from religious texts such as the Koran and Hadith and offered guidance on a variety of matters ranging from personal conduct to political affairs The significance of dreams within classical Islam is also evident in their societal and political implications Dreams were not only seen as personal revelations but also as instruments of prophecy often used to predict the death of rulers the success of military campaigns or the outcomes of political struggles They were deeply intertwined with religious doctrines with the Prophet Muhammad and various saints appearing in dreams to guide or advise key figures in Islamic history These dream visions were viewed as essential tools for navigating both the personal and political spheres reinforcing the belief that the dream world was closely linked with the divine order The widespread acceptance of dreams as a form of truth is a striking contrast to contemporary Western thought where dreams are more commonly seen as reflections of the subconscious mind In this sense the historical and cultural context of classical Islam elevated the dream to a status that intertwined it with both personal and societal identity suggesting a powerful intersection of religion politics and individual experience This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1966 *The Evidence for the Supernatural* Ivor Lloyd Tuckett, 1911

Proceedings of the Society for Psychical Research Society for Psychical Research (Great Britain), 1899 List of members in v 1 19 21 24 *The Invention of Telepathy, 1870-1901* Roger Luckhurst, 2002 The Invention of Telepathy explores one of the enduring concepts to emerge from the late nineteenth century Telepathy was coined by Frederic Myers in 1882 He defined it as the communication of any kind from one mind to another independently of the recognised channels of sense By 1901 it had become a disputed phenomenon amongst physical scientists yet was the royal road to the unconscious mind Telepathy was discussed by eminent men and women of the day including Sigmund Freud Thomas Huxley Henry and William James Mary Kingsley Andrew Lang Vernon Lee W T Stead and Oscar Wilde Did telepathy signal evolutionary advance or possible decline Could it be a means of binding the Empire closer together or was it used by natives to subvert imperial communications Were women more sensitive than men and if so why Roger Luckhurst investigates these questions in an exciting and accessible study that mixes history of science with cultural history and literary analysis
