Television and Society. An Inquest and Agenda for Improvement Harry Jay Skornia,1965 **Television and Society** Robert Beck Burrows,1965 *Television and Social Behavior* John P. Murray,Oguz Bulent Nayman,1971 Public Health Service Publication ,1971 **Against Immediacy** William Kaizen,2016-07-05 Against Immediacy is a history of early video art considered in relation to television in the United States during the 1960s and 1970s It examines how artists questioned the ways in which the people were ideologically figured by the commercial mass media During this time artists and organizations including Nam June Paik Juan Downey and the Women s Video News Service challenged the existing limits of the one to many model of televisual broadcasting while simultaneously constructing more democratic bottom up models in which the people mediated themselves Operating at the intersection between art history and media studies Against Immediacy connects early video art and the rise of the media screen in gallery based art to discussions about participation and the activation of the spectator in art and electronic media moving from video art as an early form of democratic media practice to its canonization as a form of high art Daytime Television Game Shows and the Celebration of Merchandise Morris B. Holbrook,1993 Insights into the nature of the consumer society and its ethos of consumption can often emerge from interpreting even the most lowly specimens of popular culture In this spirit a neglected genre that promises to shed light on the culture of consumption appears in the form of the daytime television game shows whose hegemonic message seems to convey and to justify a widespread obeisance to the mandate of materialism These game shows often present a text that demands a readerly monosemic dominant interpretation as an unabashed celebration of merchandise In particular a close analysis of the longest running game show The Price Is Right suggests that all facets of this program combine to reinforce its central meaning as a ritualistic validation of consumption oriented greed An alternative resistant reading is explored but rejected in part because it rests on an assumption that violates the empirical data and in part because it provides a more convincing analysis of a program like Supermarket Sweep In short the present study concludes that TV game shows in general and The Price Is Right in particular reflect and reinforce the obsession that many modern consumers feel with merchandise valued almost for its own sake beyond any need or even capacity to use it as a kind of disembodied target of misdirected desire **The Optimum Utilization Of Knowledge** Kenneth E. Boulding,Lawrence Senesh,2019-06-26 We all have more knowledge than we use even so say the editors of this book ignorance often governs our actions Society continues to find ways to misuse knowledge from manipulating information to gain political power to restricting what ideas are explored on university campuses Thus when some of the best minds in the country met to focus on the optimum utilization of knowledge it was not an idle academic inquiry In these proceedings from that conference which was sponsored by the Academy of Independent Scholars the contributors examine several of the key aspects of learning the importance of knowledge in decision making the role of our educational system and other systems in producing and

disseminating knowledge and the relationship between knowledge and the physiological psychological and cultural bases of the learning process The misuse of knowledge or the overuse of ignorance the authors note could threaten the existence of the entire planet if the kind of thinking exemplified by the nuclear arms race prevails

Out of the Garden Stephen Kline, 1993 This timely and innovative book provides a detailed history of marketing to children revealing the strategies that shape the design of toys and have a powerful impact on the way children play Stephen Kline looks at the history and development of children's play culture and toys from the teddy bear and Lego to the Barbie doll Care Bears and Teenage Mutant Ninja Turtles He profiles the rise of children's mass media books comics film and television and that of the specialty stores such as Toys R Us revealing how the opportunity to reach large audiences of children through television was a pivotal point in developing new approaches to advertising Contemporary youngsters he shows are catapulted into a fantastic and chaotic time space continuum of action toys thanks to the merchandisers interest in animated television Kline looks at the imagery and appeal of the toy commercials and at how they provide a host of stereotyped figures around which children can organize their imaginative experience He shows how the deregulation of advertising in the United States in the 1980s has led directly to the development of the new marketing strategies which use television series to saturate the market with promotional character toys Finally in a powerful re examination of the debates about the cultural effects of television Out of the Garden asks whether we should allow our children's play culture to be primarily defined and created by marketing strategies pointing to the unintended consequences of a situation in which images of real children have all but been eliminated from narratives about the young

The Hollywood TV Producer Muriel G. Cantor, 2017-07-12 Except for accounts of journalists dissident employees and an occasional congressional committee focusing on crime and unethical practices we have known very little about how television programs are produced The Hollywood TV Producer originally published in 1971 was the first serious examination of constraints conflicts and rewards in the daily lives of television producers Its insights were important at the time and have not been challenged Using as her framework the social system of mass communications Muriel G Cantor shows how producers select stories for television series and how movies end up in prime time In order to get a comprehensive look at the inner workings of the TV industry and its producers the author interviewed eighty producers in Hollywood over a two season period She probed to discover how the people producers work for and where they work influences their decision making As Cantor shows critics of television who suggest that to remain in production a producer must first please the business organization that finances his or her operations are largely correct Cantor shows that content is determined by a combination of artistic and professional factors as well as social economic and political norms that have developed over time in the industry
