Television Histories Gary R. Edgerton, Peter C. Rollins, 2021-09-15 From Ken Burns's documentaries to historical dramas such as *Roots* from A E's Biography series to CNN television has become the primary source for historical information for tens of millions of Americans today Why has television become such a respected authority What falsehoods enter our collective memory as truths How is one to know what is real and what is imagined or ignored by producers directors or writers Gary Edgerton and Peter Rollins have collected a group of essays that answer these and many other questions The contributors examine the full spectrum of historical genres but also institutions such as the History Channel and production histories of such series as *The Jack Benny Show* which ran for fifteen years The authors explore the tensions between popular history and professional history and the tendency of some academics to declare the past off limits to nonscholars Several of them point to the tendency for television histories to embed current concerns and priorities within the past as in such popular shows as *Quantum Leap* and *Dr Quinn Medicine Woman* The result is an insightful portrayal of the power television possesses to influence our culture

The Archivability of Television Lauren Bratslavsky, Elizabeth Peterson, 2025-06-01 This anthology critically evaluates archives and archival processes that collect order and preserve elements of television as historically culturally socially politically and economically significant material What do we know about how television moved from ephemeral broadcasts and mounds of paperwork documenting bureaucratic and creative processes to become historical material housed in archives This book's guiding principles are to interrogate where television as historical material lives and to collect the stories of some ways television preservation has been and continues to be deeply circumstantial and idiosyncratic Bringing together work by academics archivists and practitioners the book offers insights into the archival processes that confer television programs with historical value With a focus on television's archival spaces the book contributes more broadly to theories histories and practices of archiving Likewise the theories and questions about archives provide insights into the specificities of the medium the relations between technologies and culture the political economy of the culture industries and the minutiae of television's place in American society

Reruns on File Donald G. Godfrey, 2013-09-13 For more than half a century broadcast recordings have reflected an important aspect of our culture and history An increasing number of archivists and private collectors have restored and exchanged radio and television materials However despite the awareness of these primary resource materials there is still some reluctance to utilize this aural and visual history resource A part of this reluctance is due to the fact that little is known about the existence of many collections throughout the nation This volume provides a comprehensive directory of electronic media archives in the United States and Canada It describes each collection focusing on its speciality providing the serious researcher with ready access information to these electronic media program resources Focusing on both private and institutional collections it is organized by state

and city with indexes to provide the scholar with subject and location of specific topics of interest
