The Guilty Environmentalist:

The Guilty Environmentalist Arthur O'Donnell, 2003 *The Guilty Environmentalist* is a collection of essays musings and political fantasies from award winning humorist and energy journalist Arthur O'Donnell Join the Guilty Environmentalist as he trips lightly through this exploration of the history and foibles of the electric utility industry from the very beginnings of the Age of Electricity to the aftermath of California's most recent energy crisis Selected from the best of the Bottom Lines columns carried in the nationally acclaimed California Energy Markets newsletter over the past decade *The Guilty Environmentalist* provides a unique and frequently hilarious perspective on a crucial industry that most people take for granted until the lights go out

The Skeptical Environmentalist Bjørn Lomborg, 2001-08-30 *The Skeptical Environmentalist* challenges widely held beliefs that the environmental situation is getting worse and worse The author himself a former member of Greenpeace is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence Using the best available statistical information from internationally recognised research institutes Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world His arguments are presented in non technical accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves Concluding that there are more reasons for optimism than pessimism Bjørn Lomborg stresses the need for clear headed prioritisation of resources to tackle real not imagined problems *The Skeptical Environmentalist* offers readers a non partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media

The Environmentalist's Dilemma Arno Kopecky, 2021-10-19 For readers of Ronald Wright Rebecca Solnit and Yuval Noah Harari comes a compelling inquiry into our relationship with humanity's latest and greatest calamity In *The Environmentalist's Dilemma* award winning journalist Arno Kopecky zeroes in on the core predicament of our times the planet may be dying but humanity's doing better than ever To acknowledge both sides of this paradox is to enter a realm of difficult decisions Should we take down the government or try to change it from the inside Is it okay to compare climate change to Hitler Is hope naive or indispensable How do you tackle collective delusion Should we still have kids And can we take them to Disneyland Inquisitive and relatable Kopecky strikes a rare note of optimistic realism as he guides us through the moral minefields of our polarized world From start to finish *The Environmentalist's Dilemma* returns to the central question How should we engage with the story of our times

Fittingness and Environmental Ethics Michael S. Northcott, Steven C. van den Heuvel, 2023-02-24 This volume focuses on fittingness as an ethical aesthetical idea and in particular examines how the concept is beneficial for environmental ethics It brings together an innovative set of contributions to argue that fittingness is a significant but under investigated facet of human ethical deliberation with both ethical and aesthetic dimensions In widely diverse matters from architecture to table manners individuals and communities make decisions based on fittingness also expressed in related

terms such as appropriateness prudence temperance and mutuality In the realm of environmental ethics fittingness denotes a relation between conscious embodied persons and their habitats and is of relevance to judgements about how humans shape and take up with the non human environment and hence to ethical decisions about the development and use of the environment and non human creatures As such fittingness can be of great benefit in reframing human relationships to the non human stimulating a way of living in the world that is fitting to the preservation of its fruitfulness goodness beauty and truth

The Reenchantment of Nature Alister McGrath,2002-09-17 In this provocative assessment of the world s current ecological crisis the author of the critically acclaimed In the Beginning exposes the false assumptions underlying the conflicts between science and religion and proposes an innovative approach to saving the planet Traditionally science and religion have been thought of as two distinct and irreconcilable ways of looking at the world and scientists have often chastised the world s religions for keeping their eyes on the heavens and paying scant attention to the destruction of Earth s precious resources and its natural wonders In The Reenchantment of Nature Alister McGrath who holds doctorates in both molecular biology and divinity challenges this long held and dangerously misguided dichotomy Arguing that Christianity and other great religions have always respected and revered the bounty and beauty of the earth McGrath calls for a radical shift in perspective He shows that by defining the world in the narrowest of scientific terms and viewing it as a collection of atoms and molecules governed by unchanging laws and forces we have lost our ability to appreciate nature s enchantments In order to address the threats to our environment he maintains it is essential to reawaken our sense of awe and look at the world as a glorious creation an irreplaceable gift of God In setting forth a new framework for the debate between science and religion on ecological theory The Reenchantment of Nature points the way to integrating two different traditions in a sane and productive effort to rescue the natural world from its present environmental decline

Coming to Terms with Nature Leo Panitch,Colin Leys,2006-11 Can capitalism come to terms with the environment How do market forces impact on the biosphere What is the significance of the impasse over the Kyoto protocol How far has socialist thought developed to help us understand the environmental dilemma Has it got answers Can capitalism come to terms with the environment How do market forces impact on the biosphere What is the significance of the impasse over the Kyoto protocol How far has socialist thought developed to help us understand the environmental dilemma Has it answers How can class and environmental politics be brought together What are the shortcomings Green parties and green commerce

International Encyclopedia of Environmental Politics John Barry,E. Gene Frankland,2014-02-25 Why care about the environment Is the earth s climate really changing for the worse What are CFCs exactly And who or what is the WTO What are the causes of environmental problems Who are the main actors and what are the main ideas and issues in international environmental politics Which countries have the best worst environmental record and policies The International Encyclopedia of Environmental Politics is the essential reference source to enable all those with an interest in the politics of the environment

particularly students and academics working within political science to answer these questions and to explore many other related topics in international environmental politics. It will be welcomed as an essential teaching resource and a trusty companion to independent study. Written by a team of international experts, the Encyclopedia is vital for fact checking, provides authoritative initial orientation to a particular topic or issue, and will serve as a solid starting point for wider explanation. With over 300 fully cross-referenced entries, many of which are followed with suggestions for further reading, the Encyclopedia includes Country and regional entries with country entries giving a concise overview of the history, main actors, issues, and policies related to its environmental politics. Normative and ethical dimensions of environmental politics from animal rights, social and global justice to deep ecology. Environmental movements, organizations, struggles, and actors from local to international levels. Issues in international environmental politics such as global warming, biodiversity, trade, and the environment. Prominent individuals, historical and current, who have inspired or been actively involved in international environmental politics such as Mahatma Gandhi, Petra Kelly, Vandana Shiva, and Aldo Leopold. Central topics and issues in environmental politics such as global warming, globalization, wildlife preservation, eco taxes, energy production, and consumption, sustainable development, and the World Trade Organisation.

Sights, Sounds, and Sensibilities of Atrocity Prosecutions, 2024-07-29. This book unlocks the look, sound, smell, taste, and feel of justice for massive human rights abuses. Twenty-nine expert authors examine the dynamics of the five human senses in how atrocity is perceived, remembered, and condemned. This book is chockful of images. It serves up remarkably diverse content. It treks around the globe from Pacific war crimes trials in the aftermath of the Second World War to Holocaust proceedings in contemporary Germany, France, and Israel, from absurd show trials in Communist Czechoslovakia to international courtrooms in Arusha, Phnom Penh, and The Hague. Readers embark on a journey that transcends myriad dimensions, including photographic representations of grandfatherly old torturers in Argentina, narco trafficking in Mexico, colonialisation in India, disinformation and misinformation pixelated in cyberspace, environmental degradation in Cambodia, militarism in Northern Ireland, and civil rights activism in Atlanta. *Sights, Sounds, and Sensibilities of Atrocity Prosecutions* reimagines what an atrocity means, reconsiders what drives the manufacture of law, and reboots the role of courtrooms and other mechanisms in the pursuit of justice. It unveils how law translates sensory experience into its procedures and institutions and how humanistic inputs shape perceptions of right and wrong. This book thereby offers a refreshing primer on the underappreciated role of aesthetics, time, and emotion in the world of law. Drumbl and Fournet have done us all a great service in knitting together in a single, powerfully imagined volume these essays about how we might experience the institutionalisation of judgment in atrocity trials. Gerry Simpson, Professor of Public International Law, LSE Law School, London. Contributions to this volume offer a unique opportunity to delve into law's hidden landscape using the primary reality of the five senses. Marina Aksenova, Assistant Professor in Comparative and International Criminal Law, IE Law School, Madrid.

Environmental and Economic

Sustainability Paul E. Hardisty, 2010-06-21 Never before has the quest to balance the needs of people the environment and the economy been so important While sustainability has been widely taken up by governments and business the world has continued to move in increasingly unsustainable directions from continued dependence on fossil energy to rising greenhouse gas emissions and erosion
