well as general historical linguists and typologists Concise Encyclopedia of Languages of the World ,2010-04-06 Concise Encyclopedia of Languages of the World is an authoritative single volume reference resource comprehensively describing the major languages and language families of the world It will provide full descriptions of the phonology semantics morphology and syntax of the world s major languages giving insights into their structure history and development sounds meaning structure and language family thereby both highlighting their diversity for comparative study and contextualizing them according to their genetic relationships and regional distribution Based on the highly acclaimed and award winning Encyclopedia of Language and Linguistics this volume will provide an edited collection of almost 400 articles throughout which a representative subset of the world s major languages are unfolded and explained in up to date terminology and authoritative interpretation by the leading scholars in linguistics In highlighting the diversity of the world s languages from the thriving to the endangered and extinct this work will be the first point of call to any language expert interested in this huge area No other single volume will match the extent of language coverage or the authority of the contributors of Concise Encyclopedia of Languages of the World Extraordinary breadth of coverage a comprehensive selection of just under 400 articles covering the world s major languages language families and classification structures issues and dispute Peerless quality based on 20 years of academic development on two editions of the leading reference resource in linguistics Encyclopedia of Language and Linguistics Unique authorship 350 of the world s leading experts brought together for one purpose Exceptional editorial selection review and validation process Keith Brown and Sarah Ogilvie act as first tier guarantors for article quality and coverage Compact and affordable one volume format makes this suitable for personal study at any institution interested in areal descriptive or comparative language study and at a fraction of the cost of the full encyclopedia Articles in the World's Languages Laura Becker,2021-09-20 This study provides a systematic overview of articles and article systems in the world s languages using a sample of 104 languages Articles can be classified into 10 types according to their referential functions definite anaphoric weak definite recognitional indefinite presentational exclusive specific nonspecific inclusive specific and referential articles All 10 types are described in detail with examples from various languages of the world The book also addresses crosslinguistic trends concerning the distribution and the development of different article types and it proposes a typology of article systems The aim of this study is to provide a general crosslinguistic overview concerning the attested properties and distributions of articles It is geared towards readers with interests in language typology and the nominal domain and it can serve as a point of reference for language specific studies of articles or determiners **Negation Patterns in West African Languages and Beyond** Norbert Cyffer,Erwin Ebermann,Georg Ziegelmeyer,2009-08-27 This volume deals with issues on negation patterns in languages of West Africa and the adjacent north and east The first aim is to provide data on various aspects of negation in African languages Although the topics addressed here reflect a great diversity of negation patterns the following typological features have been identified

to be prominent in our region conflict or even incompatibility between negation and focus use of other indirect means of negating non indicative mood covered under the term Prohibitive different negation patterns in different Tense Aspect Moods e g Imperfective vs Perfective lack of negative indefinites and disjunctive negative marking often referred to as double negation The articles presented here show that areal factors have played a significant role in the development of negation strategies in the languages of West Africa and beyond On the other hand genetic factors seem to be less prominent

Studies in African Linguistic Typology F. K. Erhard Voeltz, 2006-03-22 The twenty one papers that make up this volume reflect the broad perspective of African linguistic typology studies today Where previous volumes would present language material from a very restricted area and perspective the present contributions reflect the global interest and orientation of current African linguistic studies The studies are nearly all implicational in nature Based upon a detailed survey of a particular linguistic phenomenon in a given language or language area conclusions are drawn about the general nature about this phenomenon in the languages of Africa and beyond They represent as such a first step that may ultimately lead to a more thorough understanding of African linguistic structures This approach is well justified Taking the other road attempting to pick out linguistic details from often fairly superficially documented languages runs the risk that the data and its implications for the structure investigated might be misunderstood Consequentially only very few studies of this nature giving the very broad perspective the overview of a particular structure type covering the whole African continent are represented here

Verbal Plurality and Distributivity Patricia Cabredo Hofherr, Brenda Laca, 2012-10-01 This volume brings together novel analyses of verbal plurality and distributivity The contributions draw on a wide range of new empirical data from languages as diverse as Arabic Cusco Quechua European Portuguese Hausa Karitiana Modern Hebrew and Russian The introductory chapter gives an overview of the central issues that underlie much recent research on the semantics of event plurality The papers on verbal plurality explore the interaction between verbal plurality and plural arguments in Arabic and European Portuguese the semantics of additive particles in Modern Hebrew the semantics of a range of pluractional markers in Cusco Quechua and the morphological variability of pluractional markers cross linguistically The papers on distributivity examine the syntax and semantics of reduplicated numerals in Karitiana and adnominal distributive markers This volume will be of interest to researchers and students in syntax formal semantics and language typology

A Guide to Gender and Classifiers Alexandra Y. Aikhenvald, 2025-03-21 This book explores the range of noun categorization devices found in the languages of the world from the numeral classifier systems of Southeast Asia to the highly grammaticalized gender agreement classes in Indo European languages It shows how these devices provide unique insights into how people categorize the world through the language

Standard Negation Matti Miestamo, 2008-08-22 This book is the first cross linguistic study of clausal negation based on an extensive and systematic language sample Methodological issues especially sampling are discussed at length Standard negation the basic structural means languages have for negating declarative

verbal main clauses is typologized from a new perspective paying attention to structural differences between affirmatives and negatives. In symmetric negation affirmative and negative structures show no differences except for the presence of the negative marker *s*, whereas in asymmetric negation there are further structural differences, i.e. asymmetries. A distinction is made between constructional and paradigmatic asymmetry: in the former the addition of the negative marker *s* is accompanied by further structural differences in comparison to the corresponding affirmative, and in the latter the correspondences between the members of verbal etc. paradigms used in affirmatives and negatives are not one to one. Cross-cutting the constructional/paradigmatic distinction, asymmetric negation can be further divided into subtypes according to the nature of the asymmetry. Standard negation structures found in the 297 sample languages are exemplified and discussed in detail. The frequencies of the different types and some typological correlations are also examined. Functional motivations are proposed for the structural types: symmetric negatives are language internally analogous to the linguistic structure of the affirmative, and asymmetric negatives are language externally analogous to different asymmetries between affirmation and negation on the functional level. Relevant diachronic issues are also discussed. The book is of interest to language typologists, descriptive linguists, and to all linguists interested in negation.
