The Heavens:

The Story of the Heavens Robert S. Ball, 2022-07-20 The Story of the Heavens is the title of our book We have indeed a wondrous story to narrate and could we tell it adequately it would prove of boundless interest and of exquisite beauty It leads to the contemplation of grand phenomena in nature and great achievements of human genius Let us enumerate a few of the questions which will be naturally asked by one who seeks to learn something of those glorious bodies which adorn our skies What is the Sun how hot how big and how distant Whence comes its heat What is the Moon What are its landscapes like How does our satellite move How is it related to the earth Are the planets globes like that on which we live How large are they and how far off What do we know of the satellites of Jupiter and of the rings of Saturn How was Uranus discovered What was the intellectual triumph which brought the planet Neptune to light Then as to the other bodies of our system what are we to say of those mysterious objects the comets Can we discover the laws of their seemingly capricious movements Do we know anything of their nature and of the marvelous tails with which they are often decorated What can be told about the shooting stars which so often dash into our atmosphere and perish in a streak of splendor Such are a few of the questions which occur when we ponder on the mysteries of the heavens

The Geography of the Heavens D. Thomas, E.H. Burritt, 19??
Accompanied by a Celestial Atlas Fifth edition *The Wonders of the Heavens* Frederick Smeeton Williams, 1852 **On the Heavens** Aristotle, Aeterna Press, 1969 On the Heavens Greek Latin De Caelo or De Caelo et Mundo is Aristotle's chief cosmological treatise written in 350 BC it contains his astronomical theory and his ideas on the concrete workings of the terrestrial world It should not be confused with the spurious work On the Universe De mundo also known as On the Cosmos

A Popular Guide to the Heavens Robert Stawell Ball, 1915 **The Number of the Heavens** Tom Siegfried, 2019-09-17 The award winning former editor of Science News shows that one of the most fascinating and controversial ideas in contemporary cosmology the existence of multiple parallel universes has a long and divisive history that continues to this day We often consider the universe to encompass everything that exists but some scientists have come to believe that the vast expanding universe we inhabit may be just one of many The totality of those parallel universes still for some the stuff of science fiction has come to be known as the multiverse The concept of the multiverse exotic as it may be isn't actually new In The Number of the Heavens veteran science journalist Tom Siegfried traces the history of this controversial idea from antiquity to the present Ancient Greek philosophers first raised the possibility of multiple universes but Aristotle insisted on one and only one cosmos Then in 1277 the bishop of Paris declared it heresy to teach that God could not create as many universes as he pleased unleashing fervent philosophical debate about whether there might exist a plurality of worlds As the Middle Ages gave way to the Renaissance the philosophical debates became more scientific Ren Descartes declared the number of the heavens to be indefinitely large and as notions of the known universe expanded from our solar system to our galaxy the debate about its multiplicity was repeatedly recast In the 1980s new theories about the big bang reignited

interest in the multiverse Today the controversy continues as cosmologists and physicists explore the possibility of many big bangs extra dimensions of space and a set of branching parallel universes This engrossing story offers deep lessons about the nature of science and the quest to understand the universe Writing the Heavens Aura Heydenreich, Florian Klaeger, Klaus Mecke, Dirk Vanderbeke, Jörn Wilms, 2024-12-30 In the Middle Ages and early modernity celestial observation was frequently a subject for verbal rather than numerical and geometrical recording These records can now be difficult to decode since what they address is frequently obscured by formal conventions of genre imagery rhetoric prosody to name but a few The volume collects essays exploring such configurations between literature and observation from Europe to China How contributors ask were verbal representations of celestial phenomena encoded and self consciously placed vis vis other systems of representation and knowledge What kinds of data are represented and what are the modes in which they are communicated What interpretational problems arise when present day disciplines like climatology meteorology geophysics and astronomy but also literary studies try to access them How were discourses on religion law anthropology aesthetics colonialism etc linked in and through their verbal presentation with astronomical observation and knowledge How did individual scholars texts and concepts travel between European and non European cultures both in space and in time and which constructions of self and other arose in the process **Moses's Principia. Part II. Of the Circulation of the Heavens. Of the Cause of the Motion and Course of the Earth, Moon, &c. Of the Religion, Philosophy, and Emblems of the Heathens ... With Notes.** By J. H. John Hutchinson, 1727 *Not in the Heavens* David Biale, 2010-10-18 The story of the origins and development of a Jewish form of secularism *Not in the Heavens* traces the rise of Jewish secularism through the visionary writers and thinkers who led its development Spanning the rich history of Judaism from the Bible to today David Biale shows how the secular tradition these visionaries created is a uniquely Jewish one and how the emergence of Jewish secularism was not merely a response to modernity but arose from forces long at play within Judaism itself Biale explores how ancient Hebrew books like Job Song of Songs and Esther downplay or even exclude God altogether and how Spinoza inspired by medieval Jewish philosophy recast the biblical God in the role of nature and stripped the Torah of its revelatory status to instead read scripture as a historical and cultural text Biale examines the influential Jewish thinkers who followed in Spinoza's secularizing footsteps such as Salomon Maimon Heinrich Heine Sigmund Freud and Albert Einstein He tells the stories of those who also took their cues from medieval Jewish mysticism in their revolts against tradition including Hayim Nahman Bialik Gershom Scholem and Franz Kafka And he looks at Zionists like David Ben Gurion and other secular political thinkers who recast Israel and the Bible in modern terms of race nationalism and the state *Not in the Heavens* demonstrates how these many Jewish paths to secularism were dependent in complex and paradoxical ways on the very religious traditions they were rejecting and examines the legacy and meaning of Jewish secularism today *Everything Under the Heavens* Howard W. French, 2017-03-14 From the former New York Times Asia correspondent and author of China's Second Continent an

incisive investigation of China's ideological development as it becomes an ever more aggressive player in regional and global diplomacy. For many years after its reform and opening in 1978, China maintained an attitude of false modesty about its ambitions. That role reports Howard French has been set aside. China has asserted its place among the global heavyweights, revealing its plans for pan-Asian dominance by building its navy, increasing territorial claims to areas like the South China Sea, and diplomatically bullying smaller players. Underlying this attitude is a strain of thinking that casts China's present-day actions in decidedly historical terms as the path to restoring the dynastic glory of the past. If we understand how that historical identity relates to current actions in ways ideological, philosophical, and even legal, we can learn to forecast just what kind of global power China stands to become and to interact wisely with a future peer. Steeped in deeply researched history as well as on the ground reporting, this is French at his revelatory best.
