The City Los Angeles And Urban Theory At The End Of The Twentieth Century:

The City Allen J. Scott, Edward W. Soja, 1996 Los Angeles has grown from a scattered collection of towns and villages to one of the largest megacities in the world The editors of THE CITY have assembled a variety of essays examining the built environment and human dynamics of this extraordinary modern city emphasizing the dramatic changes that have occurred since 1960 58 illustrations *The Promise of the City* Kian Tajbakhsh, 2001 This volume proposes a theoretical grounding for the study of cities and the people who live and work in them Using a threefold interdisciplinary approach to urban identities which links agency space and structure the book examines the work of three major urban theorists **The City: The city in global context** Michael Pacione, 2002 **Screening the City** Tony Fitzmaurice, Mark Shiel, 2003-03-17 In this provocative collection of essays a diverse selection of films are examined in terms of the relationship between cinema and the changing urban experience in Europe and the United States since the early 20th century **Globalizing L.A.** Steven P. Erie, 2004 The author chronicles LA's emergence as the nation's leading trade centre and gateway to the Pacific Rim in the 20th century exploring recent epic battles over port development expanding LAX creating a new international airport in Orange County building the Alameda Corridor rail link and more *The City, Revisited* Dennis R. Judd, Dick W. Simpson, 2011 Reexamining urban scholarship for the twenty first century *Street Level: Los Angeles in the Twenty-First Century* Rob Sullivan, 2016-04-01 In the latter part of the C20th a series of seminal books were written which examined Los Angeles by the likes of Reyner Banham Mike Davis Edward Soja Allen Scott Michael Dear Frederick Jameson Umberto Eco Bernard Henri Levy and Jean Baudrillard which have been hugely influential in thinking about cities more broadly The debates which were generated by these works have tended to be very heated and either defensive or offensive in approach A sufficient amount of time has since passed that a more measured approach to evaluating this work can now be taken The first section of this book Contra This and Contra That provides such a critique of the various theories applied to Los Angeles during the last century balancing the positive with the negative The second part of the book is an investigation of L A as it exists on the ground today While political the theoretical stance taken in this investigation is not mounted as a platform from which to advocate a particular ideology Instead it encompasses cultural as well as economic issues to put forth a view of L A which is coherent and cogent while at the same time considering its multi layered complex and ever changing qualities It concludes by arguing that sectorised off and totalizing visions of the city will not do as instruments of urban analysis and that only a theory as mobile as its target will do one that replicates the polymer nature of this place It proposes that extending that theory to the world beyond this particular city only a theory that models itself on the mobile and polymer nature of the world while still retaining a sense of the actual and the real will do as an instrument with which to comprehend the world In doing so this book is not only a model by which to think through Los Angeles but as a model by which to think through other world cities *The City Reader* Richard T. LeGates, Frederic Stout, 2011-01-11 The fifth edition of the highly successful City

Reader juxtaposes the best classic and contemporary writings on the city It contains fifty seven selections including seventeen new contributions by experts including Elijah Anderson Robert Bruegmann Michael Dear Jan Gehl Harvey Molotch Clarence Perry Daphne Spain Nigel Taylor Samuel Bass Warner and others some of which have been newly written exclusively for The City Reader Classic writings from Ebenezer Howard Ernest W Burgess LeCorbusier Lewis Mumford Jane Jacobs and Louis Wirth meet the best contemporary writings of Sir Peter Hall Manuel Castells David Harvey Kenneth Jackson This edition of The City Reader has been extensively updated and expanded to reflect the latest thinking in each of the disciplinary areas included and in topical areas such as sustainable urban development climate change globalization and the impact of technology on cities The plate sections have been extensively revised and expanded and a new plate section on global cities has been added The anthology features general and section introductions and introductions to the selected articles New to the fifth edition is a bibliography listing over 100 of the top books for those studying Cities

Spaces of Culture Scott Lash, Mike Featherstone, 1999-03-28 In Spaces of Culture an international group of scholars examines the implications of questions such as What is culture What is the relationship between social structure and culture in a globalized and networked world Do critical perspectives still apply or does the speed and complexity of cultural production demand new forms of analysis They explore the key themes in social theory the nation state the city modernity and reflexivity post Fordism and the spatial logic of the informational city The contributors go on to analyze the public sphere questioning the reductive representation of technology as a form of instrumentality and demonstrating how new technologies can offer new spaces of culture This analysis

Post-Suburban Europe Nicholas A. Phelps, N. Parsons, Dimitris Ballas, Andrew Dowling, 2006-07-28 The term edge city describes the rapid growth of urban centres at the edge of established cities Widely discussed in the US very little has been written about European edge cities This book gives a comparative analysis of examples in Greece Spain Paris Finland and the UK with a theoretical analysis of edge cities and post suburban Europe
