*Livelihood and Wellbeing in the Urban Fringe* Nasrin Banu, Shahab Fazal, 2016-05-25 This book presents a detailed study on Aligarh's urban fringe focusing on the livelihood of the villagers who have lived there for generations and on that of the migrants residing in the villages. As a Class I city located in the most populated state Uttar Pradesh of India, Aligarh has gained in importance due to its proximity to the national capital New Delhi and Uttar Pradesh's industrial cities Kanpur and Ghaziabad. The 2011 census showed that of the total population of the district 33.1 per cent was urban. 872,575 residents. Projections by the Town and Country Planning Department suggest that the city will have some 1.2 million inhabitants and there will be a need for another 64,000 houses. Thus the city will expand extensively into its urban fringe which is expected to entail large scale transformations. The expansion of the city will significantly influence nearby villages in terms of land use and population both physically and socio economically.

**The City's Hinterland** Keith Hoggart, 2016-03-16 Despite the fact that the rural commuter belts of cities are major loci of population change, economic growth and dynamic social change within city regions, most research tends to ignore this area while focusing on the built up city core. However, with the current emphasis on the role of rural areas in policy debates, it is vital to recognize the importance of the commuter belt. By comparing four major European cities in England, France, Germany and Spain, this book offers the first comparative investigation of the dynamism of city rural hinterlands. It assesses whether rural areas will become effectively integrated into quality of life improvements as a result of their inter dependencies with cities, focusing on the critical arenas of employment, change, housing and service provision. In doing so, it investigates how change in these three fields impacts on the quality of life and physical environment of rural hinterlands.

The Rise and Fall of Countryside Management Ian D. Rotherham, 2015-07-16 For at least half a century since the emergence of Country Parks and Forest Parks, countryside services have provided leisure, tourism, conservation, restoration and regeneration across Britain. Yet these services are currently being decimated as public services are sacrificed to the new era of austerity. The role and importance of countryside management have been barely documented and the consequences and ramifications of cuts to these services are overlooked and misunderstood. This volume rigorously examines the issues surrounding countryside management in Britain. The author brings together the results of stakeholder workshops and interviews and in-depth individual case studies as well as a major study for the Countryside Agency which assessed and evaluated every countryside service provision in England. A full and extensive literature review traces the ideas of countryside management back to their origins and the author considers the wider relationships and ramifications with countryside and ranger provisions around the world, including North America and Europe. The book provides a critical overview of the history and importance of countryside management.

detailing the achievements of a largely forgotten sector and highlighting its pivotal yet often underappreciated role in the wellbeing of people and communities It serves as a challenge to students planners politicians conservationists environmentalists and land managers in a diversity of disciplines that work with or have interests in countryside leisure and tourism community issues education and nature conservation

**Demographic Change in Australia's Rural Landscapes** Gary W. Luck, Digby Race, Rosemary Black, 2010-11-30 The distribution and re distribution of people across the landscape has significant implications for ecological economic and social dynamics Movement of people to urban centres mostly from rural landscapes especially in the developing world is a major global phenomenon This can result in the depopulation of rural landscapes Conversely population growth and a changing demographic profile have been identified for particular rural landscapes with notable examples from North America Europe and Australia Yet we know little of the factors that drive demographic changes in rural landscapes and even less about the implications of these changes This book examines broad and local scale patterns of demographic change in rural landscapes identifies some of the drivers of these changes using Australian case studies or comparisons between Australian and international contexts and outlines the implications of changes for society and the environment This book makes a valuable contribution to the literature because it adopts an integrated and interdisciplinary approach by explicitly linking demographic change with environmental land use social and economic factors This integrated approach was achieved by encouraging interaction among authors writing on similar topics to ensure coherency and complementarity among chapters and cross pollination of ideas and perspectives Chapters are presented as interactive and reflective discussions that address the findings of other contributors yet each chapter contains enough background to stand alone as a unique contribution

*Sustainable Development (2 Volume Set)* C.A. Brebbia, 2015-10-06 This collection of research papers presented at meetings organised by the Wessex Institute of Technology WIT concerns a variety of issues relating to the area of sustainable development WIT has a long and very successful record of organising conferences on the topic of sustainability which requires an interdisciplinary approach Any sustainable solutions that are derived solely from the perspective of a single discipline may have unintended damaging consequences that create new problems Thus effective sustainable solutions require the collaboration of scientists and engineers from various disciplines as well as planners architects environmentalists policy makers social scientists and economists The contents of this book reflect that interdisciplinary approach and include topics under the main areas of Sustainable development and planning Disaster management Air pollution Urban transport Ecosystems and Water resources management
