

Curtiss SBC Helldiver

History and Notes

Requiring a new low-cost fighter, the US Navy ordered a prototype from Curtiss in 1932 under the designation XP125-1. This flew for the first time during 1933, in the form of a two-seat parasol-wing monoplane with retractable landing gear, and powered by 405-hp (400-kW) Wright R-1210-90 Whirlwind 12 engine. When, at the end of the year, it was considered desirable to utilize this aircraft in a scout capacity, its designation was changed to XS4C-1. Following yet another change of heart, its role became that of a scout-bomber in January 1934 and a Wright R-1600 Cyclone engine was installed. Extensive trials followed, and during a dive test in September 1934 there was structural failure of the wing and the XS4C-1, as it had by now been designated, was damaged extensively.

The parasol wing was clearly unsuitable for the dive-bombing requirement, and a new prototype was ordered as the XS4C-2, this having Cyclone wings and a 700-hp (522-kW) Wright R-1535-12 Whirlwind 12 engine. When, in March 1936, this engine was replaced by an 805-hp (615-kW) Pratt & Whitney R-1500-90 Twin Wasp Junior engine, the designation changed yet again to XS4C-3. Production SBC-3s, of which the US Navy ordered 60 on 29 August 1936, were generally similar, were armed with two 0.50-in (12.7-mm) machine-guns, and could carry a single 1000-lb (454-kg) bomb beneath the fuselage for use in a dive-bombing attack. First deliveries to Navy Squadron VS-6, were made on 17 July 1937, and these aircraft were also given squadrons VS-2 and VS-4.

The last SBC-3 on the production line was used as the prototype of an improved version, with a more powerful Wright R-1820-90 engine, and the ability to carry a 1,000-lb (454-kg) bomb. This was designated XS4C-4. Following an initial order of 5 January 1938, the first of 174 production SBC-4s for the US

Navy was delivered in March 1939 having undergone alterations to SBC-3s and 36 to XS4C-4s. These SBC-4s in production were intended for use by the US Navy, but some were reserved for use by the US Army, and one was ordered by Britain in August 1940 and eventually to RAF Little Wymondley in 1941, placed in service under the designation XP125-1. US Navy's delivery of 10 aircraft was completed in July 1941, the 10 aircraft also were produced for France following the US entry into the war, these aircraft were marked with the following tail fin:

By the time the US Navy ordered 100 SBC-4s, the XS4C-4 had become obsolete to the extent that in April 1943 US Navy ordered 100 SBC-4s to be built as the US Navy ordered 100 SBC-4s.
