UNIVERSAL CONSTITUTION of EARTH

PREFACE

Generally speaking, any CONSTITUTION is the most important document for every *human being* as it stipulates fundamental principles of organization, everyday living and decent behavior in a society, based on which the members of this society keep in-between relationship and self-government. Consequently, the *Constitution* should be considered as the **Supreme Law** common and equally obligatory for all inhabitants on territory of a particular society, men and women, young and aged, rich and poor, ill and healthy, strong and weak, and therefore it should be properly studied by all of them, kept in mind, fulfilled, and modernized in due way and time.

It is obvious, that the world on Earth is becoming as a more and more global complete system, which requires global governance, well described and open for everyone's understanding and reach. Thus, the *Universal Constitution of Earth* is exactly such a document designated for all Inhabitants of Earth in the started era of *globalization*, which describes the new World order induced to secure the Life on the planet and provide peaceful public tranquility, progress and prosperity to all Earth humans of present and future generations.

Such an idea comes to the mind of various prominent world thinkers more and more often. For example, the previous leader of the Catholic Church, Pope Benedict XVI, has called for the establishment of World Government and a New World Order in his speech made at the *Pontifical Council for Justice and Peace* on December 3, 2012. The Pope called for the "construction of a world community, with a corresponding authority," to serve the "common good of the human family".

As a means of defending global peace and justice, the Pope's vision for the establishment of World Government and a New World Order is supposedly not to

The Constitution Of The Earth

Essay

The Constitution Of The Earth:

An essay on the constitution of the earth [by R. Ward]. Robert Ward (philosophical writer.),1844 **The Constitution of The United Peoples of Earth** Abhijit Naskar, If humanity is in misery it may not be my fault but if I die leaving humanity with the same amount of misery then it is my fault The Constitution of The United Peoples of Earth is a seminal literary composition by the 21st century Neuroscientist and Thinker Abhijit Naskar that provides the foundational pillars of a truly egalitarian progressive and global human society for all the governments of our planet The purpose of this magnificent human creation is unification of all the citizens of Earth as one human species beyond all forms of sectarian identities This document is to be the backbone of humanity ensuring harmony justice and progress in the entire global conscientious kingdom of humans *An Essay on the Constitution of the Earth* Essay,1844 **Source Book in Geology, 1900-1950** Kirtley Fletcher Mather,1967 Here find source literature for the most important contributions to the remarkable recent expansion of geological knowledge Excerpted are 65 articles on topics including the constitution of Earth s interior earthquakes radioactive timekeepers submarine features and deep sea cores entrapment of petroleum and crystal structure

The Sacred Theory of the Earth Thomas Burnet,1753 **The Earth's Density** K. E. Bullen,2012-12-06 The book attempts to draw together the various strands of evidence that have led to present knowledge of the distribution of density throughout the interior of the Earth Details are also given of other properties with which the density is closely linked including pressure compressibility and compression rigidity seismic velocities Poisson s ratio and gravitational intensity Questions of thermodynamics and chemical composition and phase enter discussions where they bear more or less sharply on the density determination but the book does not purport to be a comprehensive text on the Earth s internal temperature distribution and composition The density distributions of other planets are discussed The quest for clues on the Earth s internal densities has long been an exciting one and an aim of the book is to present a developing story which has fascinated the author over much of his working life The early chapters refer to key developments from ancient times to around 1930 The later chapters recount in greater detail developments since 1930 The stage has now been reached where numerous published papers bearing on the Earth s density seem to do little more than fidget around the resolving power of long accumulated observational data So the present seems an appropriate time to try to put some perspective into the story Of course the story will never be quite finished in describing the interior of the Earth there will always be extra decimal places to add as further significant evidence arises **The Sacred Theory of the Earth (Complete)** Thomas Burnet,1907-01-01 Since I was first inclined to the Contemplation of Nature and took Pleasure to trace out the Causes of Effects and the Dependence of one thing upon another in the visible Creation I had always methought a particular Curiosity to look back into the Sources and Original of Things and to view in my Mind so far as I was able the Beginning and Progress of a Rising World And after some Essays of this Nature and as I thought not unsuccessful I carried on my Enquiries further to try whether this

Rising World when form d and finish d would continue always the same in the same Form Structure and Consistency or what Changes it would successively undergo by the continued Action of the same Causes that first produc d it and lastly what would be its final Period and Consummation This whole Series and Compass of Things taken together I call d a Course of Nature or a System of Natural Providence and thought there was nothing belonging to the external World more fit or more worthy our Study and Meditation nor any thing that would conduce more to discover the Ways of Divine Providence and to shew us the Grounds of all true Knowledge concerning Nature And therefore to clear up the several Parts of this Theory I was willing to lay aside a great many other Speculations and all those dry Subtilties with which the Schools and the Books of Philosophers are usually fill d But when we speak of a Rising World and the Contemplation of it we do not mean this of the Great Universe for who can describe the Original of that vast Frame But we speak of the Sublunary World this Earth and its Dependencies which rose out of a Chaos about Six Thousand Years ago And seeing it hath fallen to our Lot to act upon this Stage to have our present Home and Residence here it seems most reasonable and the Place design d by Providence where we should first employ our Thoughts to understand the Works of God and Nature We have accordingly therefore design d in this Work to give an Account of the Original of the Earth and of all the great and general Changes that it hath already undergone or is hence forwards to undergo till the Consummation of all things For if from those Principles we have here taken and that Theory we have begun in these two first Books we can deduce with Success and Clearness the Origin of the Earth and those States of it that are already past following the same Thread and by the Conduct of the same Theory we will pursue its Fate and History thro future Ages and mark all the great Changes and Conversions that attend it while Day and Night shall last that is so long as it continues an Earth By the States of the Earth that are already past we understand chiefly Paradise and the Deluge Names well known and as little known in their Nature By the future States we understand the Conflagration and what new Order of Nature may follow upon that till the whole Circle of Time and Providence be compleated As to the first and past States of the Earth we shall have little help from the Ancients or from any of the Philosophers for the Discovery or Description of them We must often tread unbeaten Paths and make a Way where we do not find one but it shall be always with a Light in our Hand that we may see our Steps and that those that follow us may not follow us blindly There is no Sect of Philosophers that I know of that ever gave an Account of the Universal Deluge or discover d from the Contemplation of the Earth that there had been such a Thing already in Nature Tis true they often talk of an Alternation of Deluges and Conflagrations in this Earth but they speak of them as Things to come at least they give no Proof or Argument of any that hath already destroyed the World As to Paradise it seems to be represented to us by the Golden Age whereof the Ancients tell many Stories sometimes very luxuriant and sometimes very defective For they did not so well understand the Difference betwixt the new made Earth and the present as to see what were the just Grounds of the Golden Age or of Paradise though they had many broken Notions concerning those Things as to the Conflagration in

particular This hath always been reckon d one amongst the Opinions or Dogmata of the Stoicks That the World was to be destroyed by Fire and their Books are full of this Notion but yet they do not tell us the Causes of the Conflagration nor what Preparations there are in Nature or will be towards that great Change And we may generally observe this of the Ancients that their Learning or Philosophy consisted more in Conclusions than in Demonstrations they had many Truths among them whereof they did not know themselves the Premises or the Proofs Which is an Argument to me that the Knowledge they had was not a Thing of their own Invention or which they came to by fair Reasoning and Observations upon Nature but was delivered to them from others by Tradition and ancient Fame sometimes more publick sometimes more secret These Conclusions they kept in Mind and communicated to those of their School or Sect or Posterity without knowing for the most part the just Grounds and Reasons of them

Theory of the Earth James Hutton, 2020-07-17 Reproduction of the original Theory of the Earth by James Hutton The Sacred Theory of the Earth Burnet, 1719 *Plantation Earth* Moriah Saul, 2003

This book is dedicated to the Constitution of the United States and to the constitutionality of money in America and to the intrinsic value of labor the most valuable and truly intrinsic item in existence in our world The only true value of money is its necessity to divide the fruits of labor in our modern system of barter therefore labor is not only above capitol it is above all other things of value in our world And this opinion was shared by Abraham Lincoln as well as others and the thought should be considered by all people who can form their own opinion on the value of labor and the value of money and which one deserves the higher consideration Money is a yoke and those who control it control those who wear its yoke In the absence of the gold standard there is no way to protect savings from confiscation through inflation There is no safe store of value Allen Greenspan The enormous differences between fiat unsecured paper currencies and the required intrinsic currency system of the United States Constitution is examined and discussed in depth The Constitution is quoted and it plainly states that No State shall make anything other than gold or silver a legal tender in payment of debts and yet all of the American States are today operating on a fiat unsecured currency system This book encourages each and every reader to do some research and see if in their own opinion they agree with the one that I have formed that the States are in non compliance with our Constitution on this issue I firmly believe that the Constitution of the United States should be taught in all public schools That historical content and background and the writings of the founding fathers should be taught in all schools as the well the iniquities of the past that brought the Constitution of the United States into existence I believe that it would be a definite advantage to all children to learn of their rights from the first Government agency with which they have dealings in life Adhesion Contract Standardized contract form offered to consumers of goods and services on essentially take it or leave it bases without affording consumers realistic opportunity to bargain and under such conditions that consumer can not obtain desired product or services except acquiescing in form contract Distinctive feature of adhesion contract is that weaker party has no realistic choice as to its terms Blacks Law Dictionary Sixth edition There are also other constitutional issues brought

forward as food for thought for the purpose of encouraging discussion And with that said I will refer people to the opinion of Thomas Jefferson Let no more people be heard of confidence in men but bind him down from mischief by the chains of the Constitution Thomas Jefferson

The Constitution Of The Earth Introduction

In the digital age, access to information has become easier than ever before. The ability to download The Constitution Of The Earth has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download The Constitution Of The Earth has opened up a world of possibilities. Downloading The Constitution Of The Earth provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading The Constitution Of The Earth has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download The Constitution Of The Earth. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading The Constitution Of The Earth. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading The Constitution Of The Earth, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download The Constitution Of

The Earth has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
