Robotics Through Science Fiction Robin R. Murphy, 2018-12-25 Six classic science fiction stories and commentary that illustrate and explain key algorithms or principles of artificial intelligence This book presents six classic science fiction stories and commentary that illustrate and explain key algorithms or principles of artificial intelligence Even though all the stories were originally published before 1973 they help readers grapple with two questions that stir debate even today how are intelligent robots programmed and what are the limits of autonomous robots The stories by Isaac Asimov Vernor Vinge Brian Aldiss and Philip K Dick cover telepresence behavior based robotics deliberation testing human robot interaction the uncanny valley natural language understanding machine learning and ethics Each story is preceded by an introductory note As You Read the Story and followed by a discussion of its implications After You Have Read the Story Together with the commentary the stories offer a nontechnical introduction to robotics The stories can also be considered as a set of admittedly fanciful case studies to be read in conjunction with more serious study Contents Stranger in Paradise by Isaac Asimov 1973 Runaround by Isaac Asimov 1942 Long Shot by Vernor Vinge 1972 Catch That Rabbit by Isaac Asimov 1944 Super Toys Last All Summer Long by Brian Aldiss 1969 Second Variety by Philip K Dick 1953 USITC Publication ,1983 *Robotic Systems* S.G. Tales from a Robotic World Dario Floreano, Nicola Nosengo, 2022-09-27 Stories from the future of intelligent machines from rescue drones to robot spouses and accounts of cutting edge research that could make it all possible Tech prognosticators promised us robots autonomous humanoids that could carry out any number of tasks Instead we have robot vacuum cleaners But as Dario Floreano and Nicola Nosengo report advances in robotics could bring those rosy predictions

closer to reality A new generation of robots directly inspired by the intelligence and bodies of living organisms will be able not only to process data but to interact physically with humans and the environment In this book Floreano a roboticist and Nosengo a science writer bring us tales from the future of intelligent machines from rescue drones to robot spouses along with accounts of the cutting edge research that could make it all possible These stories from the not so distant future show us robots that can be used for mitigating effects of climate change providing healthcare working with humans on the factory floor and more Floreano and Nosengo tell us how an application of swarm robotics could protect Venice from flooding how drones could reduce traffic on the congested streets of mega cities like Hong Kong and how a long term relationship model robot could supply sex love and companionship After each fictional scenario they explain the technologies that underlie it describing advances in such areas as soft robotics swarm robotics aerial and mobile robotics humanoid robots wearable robots and even biohybrid robots based on living cells Robotics technology is no silver bullet for all the world s problems but it can help us tackle some of the most pressing challenges we face
