Eating Beauty Ann W. Astell, 2016-02-09 The enigmatic link between the natural and artistic beauty that is to be contemplated but not eaten on the one hand and the eucharistic beauty that is both seen with the eyes of faith and eaten on the other intrigues me and inspires this book One cannot ask the aesthetic questions about the Eucharist without engaging fundamental questions about the relationship between beauty art broadly defined and eating from *Eating Beauty* In a remarkable book that is at once learned startlingly original and highly personal Ann W Astell explores the ambiguity of the phrase eating beauty The phrase evokes the destruction of beauty the devouring mouth of the grave the mouth of hell To eat beauty is to destroy it Yet in the case of the Eucharist the person of faith who eats the Host is transformed into beauty itself literally incorporated into Christ In this sense Astell explains the Eucharist was productive of an entire way of life a virtuous life form an artwork with Christ himself as the principal artist The Eucharist established for the people of the Middle Ages distinctive schools of sanctity Cistercian Franciscan Dominican and Ignatian whose members were united by the eucharistic sacrament that they received Reading the lives of the saints not primarily as historical documents but as iconic expressions of original artworks fashioned by the eucharistic Christ Astell puts the faceless Host in a dynamic relationship with these icons With the advent of each new spirituality the Christian idea of beauty expanded to include first the marred beauty of the saint and finally that of the church torn by division an anti aesthetic beauty embracing process suffering deformity and disappearance as well as the radiant lightness of the resurrected body This astonishing work of intellectual and religious history is illustrated with telling artistic examples ranging from medieval manuscript illuminations to sculptures by Michelangelo and paintings by Salvador Dalí Astell puts the lives of medieval saints in conversation with modern philosophers as disparate as Simone Weil and G W F Hegel **Shoeless** Donald Wallenfang, Megan Wallenfang, 2021-06-18 What does Carmelite spirituality have to teach us about living at peace in the frenetic world of ours today Everything Guiding the reader

Body, Text, and Science M. Sawicki, 2013-12-01 What is scientific about the natural and human sciences Precisely this the legibility of our worlds and the distinctive reading strategies that they provoke That account of the essence of science comes from Edith Stein who as Husserl's assistant 1916-1918 labored in vain to bring his massive *Ideen* to publication and then went on to propose her own solution to the problem of finding a unified foundation for the social and physical sciences Stein argued that human bodily life itself affords direct access to the interplay of natural causality cultural motivation and personal initiative in history and technology She developed this line of approach to the sciences in her early scholarly publications which too soon were overshadowed by her religious lectures and writings and eventually were obscured by National Socialism's ideological attack on philosophies of empathy Today as her church prepares to declare Stein a saint her secular philosophical achievements deserve another look
