The Hidden Springs An Enquiry Into Extra Sensory Perception:

The Hidden Springs Renée Haynes,1973 *Psychics, Sensitives and Somnambules* Rodger I. Anderson,2015-01-27

Claimants of paranormal abilities have always attracted controversy and fascination and sometimes rigorous study by scientists Charles Bailey an Australian medium was seemingly able to materialize different objects animate and inanimate under conditions which made it difficult to conceive how they could have been normally produced Sumitra Singh a woman of Northern India who in 1984 became subject to epileptic type seizures claimed to be possessed by spirits of the dead Franck Kluski was a Polish poet banker and physical medium who specialized in both human and animal materializations This biographical dictionary contains profiles of 330 psychics worldwide from Tony Agpaoa to Elenor Zugun each accompanied by a bibliography listing the primary sources consulted The primary focus is on those claimed psychics who have figured prominently in the history of the subject though some lesser known figures are included to show how rich varied and colorful that history has been The aim throughout is to present each case as fairly and dispassionately as the facts allow with a particular eye for accuracy in details and presentation The approach is historical not apologetic or accusatory making the work ideally suited as a permanent reference **Women's University Narratives, 1890-1945, Part II** Anna

Bogen,2017-11-20 The years 1890 1945 saw an unprecedented outpouring of fiction focused on British university life much of it reflecting the drastic change that had swept through the higher education system in the late nineteenth century Among these narratives a significant subgroup focused on the lives of women students newly admitted to the structures of higher education system their presence still stridently and sometimes even violently opposed especially at Oxbridge These novels and short stories collected here largely unknown today were widely discussed and debated in the public sphere during the early twentieth century contributing not only to the formation of public knowledge and opinion about education through cultural figures like the Girton Girl or the undergraduette but also sparking debate about many wider social and cultural issues from the place of the women writer in the literary scene to the emergence of new discourses around psychology and the body The majority have not been reprinted since their original publication and until now have been rarely available to scholars The publication of Women s University Narratives 1890 1945 therefore provides a major new resource for scholarship in many areas including women s studies educational history and literary and cultural modernism **The Trial**

of Woman D. Basham,1992-01-14 The Trial of Woman examines the impact of the nineteenth century Occult Revival on the Victorian Women s Movement both in the lives of individual women and in the literature surrounding the Woman Question The book explores the Victorian Myth of Occult Womanhood and argues that the notion of female occult power was deeply influenced by the advent of Mesmerism Spiritualism and Theosophy This myth was itself a determining factor in women s struggle for legal and political rights **The Oracle** William J. Broad,2007-01-30 A gripping modern day detective story

about the scientific quest to understand the Oracle of Delphi Like Walking the Bible this fascinating book turns a modern eye

on an enduring legend The Oracle of Delphi was one of the most influential figures in ancient Greece Human mistress of the god Apollo she had the power to enter into ecstatic communion with him and deliver his prophesies to men Thousands of years later Pulitzer Prize winning journalist William J Broad follows a crew of enterprising researchers as they sift through the evidence of history geology and archaeology to reveal as far as science is able the source of her visions Science and the Paranormal Arthur J. Ellison,2020-01-07 Ellison was a dedicated paranormal researcher who believed the science was too narrow to account for things like out of body experiences io9 In facts not fiction this book presents the case for the paranormal Changing the way we look at the universe is not easy and requires a true openness to exploration and experiment Professor Ellison suggests that most of us are conditioned by our Western science based education to think that the universe is much simpler and material than it really is He argues that we should recognize the limits of the current scientific worldview that fails to account for genuine paranormal experiences including phenomena such as out of body experiences OBE reliably reported by thousands of people Science and the Paranormal is part of The Paranormal a series that resurrects rare titles classic publications and out of print texts as well as publishes new supernatural and otherworldly ebooks for the digital age The series includes a range of paranormal subjects from angels fairies and UFOs to near death experiences vampires ghosts and witchcraft A most valuable work and a lasting testimony to the author s remarkable contribution to the field Bernard Carr Scientific and Medical Network Review Written for the lay person in down to earth language this book is for those who want a broad brush of matters like the evidence for telepathy near death experiences survival research etc without having to plough through a century high stack of scientific papers A welcome introduction to human nature s further reaches Christian Parapsychologist *Afterlife* Colin Wilson,2011-10-05 Is the near death experience a defense mechanism of the brain or have people actually been on the threshold of another world Colin Wilson assesses the evidence that includes mediumship paranormal activity spirit sightings and spirit communications Above all he includes the striking case histories of people who claim to have died and reported their experiences of the afterlife *The Parapsychology Revolution* Robert M. Schoch,Logan Yonavjak,2008-01-31 Grounded in both scientific acumen and constructive inquiry this anthology shines a rare clarifying light on the controversial realms of psychical and paranormal research surveying reports essays and arguments from more than a century of investigation into matters such as clairvoyance telepathy and past life regression In the past one hundred and twenty five years despite a relative paucity of funding and the troubling persistence of fraud serious inquiry into the paranormal particularly as it relates to clairvoyance and psychical perception has successfully entered the scientific age Studies in the modern laboratory employing rigorous methodology and peer reviewed oversight have conclusively detected statistical anomalies that suggest the presence of some not yet understood faculty of the human mind In *The Parapsychology Revolution* Robert M Schoch Ph D a scholar widely known for his geological theories that question the conventional dating of the Great Sphinx and researcher Logan Yonavjak introduce and anthologize core writings that underscore the range and

continuing challenges of psychical research The book s extensive introduction and the editors commentary on individual essays and sections highlight milestones feuds and key players that mark the nascent history of this fascinating and important field of research Finally The Parapsychology Revolution addresses and clarifies the all important question Is there legitimate evidence for a world beyond the ordinary *The Sense of Being Stared At* Rupert Sheldrake,2013-06-22 Explores Rupert Sheldrake s more than 25 years of research into telepathy staring and intention precognition and animal premonitions Shows that unexplained human abilities such as the sense of being stared at and phone telepathy are not paranormal but normal part of our biological nature Draws on more than 5 000 case histories 4 000 questionnaire responses and the results of experiments carried out with more than 20 000 people Reveals that our minds and intentions extend beyond our brains into the world around us and even into the future Nearly everyone has experienced the feeling of being watched or had their stare result in a glance in their direction The phenomenon has been cited throughout history in nearly every culture along with other commonplace paranormal occurrences such as premonitions and telepathy In this newly updated edition Sheldrake shares his more than 25 years of research into telepathy the power of staring remote viewing precognition and animal premonitions Drawing on more than 5 000 case histories 4 000 questionnaire responses and the results of experiments on staring thought transference phone telepathy and other phenomena carried out with more than 20 000 people as well as reports and data from dozens of independent research teams Sheldrake shows that these unexplained human abilities such as the sense of being stared at are not paranormal but normal part of our biological nature He reveals that telepathy depends on social bonds and traces its evolution from the connections between members of animal groups such as flocks schools and packs Sheldrake shows that our minds and intentions extend beyond our brains into our surroundings with invisible connections that link us to each other to the world around us and even to the future

Telepathic Tales Daniel Bourke,2025-07-08 Provides accounts of ESP ranging from ancient Greek myth traditional North and South American African and Polynesian stories to individuals like Rumi Charles Dickens and Carl Jung Considers unexplained ESP related happenings including bilocation the ability to locate lost items early knowledge of one s own death and perceptions regarding the well being of loved ones Whether a premonition of an impending event a warning of potential danger or an unlikely synchronistic experience such things are surprisingly common even if they often cannot be clearly explained Taking readers on a historical and cross cultural voyage through extrasensory experiences Daniel Bourke documents contextualizes and sheds light on these mysterious phenomena From the plains of Peru and the haunted highlands of Scotland to the snowy taiga forests of the Far North and the Indigenous cultures of Australia and America Bourke examines the strange psychic occurrences that seem to appear in all places at all times These include instances of bilocation premonitions about the coming of visitors intuitions of the location of lost items or treasures the discovery of cures by telepathic means and even accurate pre perceptions about one s own demise or the perilous situation of a loved one He

looks at the renowned Greek seers including Iamos who announced the death of Hercules at the moment it occurred the far reaching visions of the shaman in a trance who might warn his tribe of danger and the witches wizards and heroes of legend and romance who were privy to secret knowledge through magical means Bourke s survey incorporates rare accounts from people all around the world and across the ages including figures like Rumi Saint Anthony Charles Dickens Mark Twain and Carl Jung Shedding light on our cultural and mythic past Bourke shows that wherever you look in the world whatever culture or time telepathic tales are unfolding all around us Scary Stories to Tell in the Dark: The Complete Collection Alvin Schwartz,2019-08-01 Read these if you dare The New York Times The iconic anthology series of horror tales that s soon to be a highly anticipated feature film A classic collection of chillingly scary tales collected and retold by Alvin Schwartz and featuring the original illustrations by lauded artist Steve Gammell **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1973 First multi year cumulation covers six years 1965 70 *Seven Experiments That Could Change the World* Rupert Sheldrake,2002-07-01 Examines the realities of unexplained natural phenomenon and provides explanations that push the boundaries of science Looks at animal telepathy and the ability of pigeons to home Proves the point that big questions don t need big science Noted scientist Rupert Sheldrake is a former research fellow of the Royal Society New Edition with an Update on Results How does your pet know when you are coming home How do pigeons home Can people really feel a phantom amputated arm These questions and more form the basis of Sheldrake s look at the world of contemporary science as he puts some of the most cherished assumptions of established science to the test What Sheldrake discovers is that certain scientific beliefs are so widely taken for granted that they are no longer regarded as theories but are seen as scientific common sense In the true spirit of science Sheldrake examines seven of these beliefs Refusing to let intellectual dogmatism influence his search for the truth Sheldrake presents simple experiments that allow the curious and the skeptical to join in his journey of discovery His experiments look at how scientific research is often biased against unexpected patterns that emerge and how a researcher s expectations can influence the results He also examines the taboo of taking pets seriously and explores the question of human extrasensory perception Perhaps most important he questions the notion that science must be expensive in order to achieve important results showing that inexpensive methods can indeed shake the very foundations of science as we know it In this compelling and intelligent book Sheldrake offers no preconceived wisdom or easy answers just an open invitation to explore the unknown create new science and perhaps even change the world *Truth or Truthiness* Howard Wainer,2016 Escaping the clutches of truthiness begins with one simple question what is the evidence Howard Wainer shows how the sceptical mindset of a data scientist can expose truthiness nonsense and outright deception He evaluates the evidence or lack thereof supporting claims in many fields with special emphasis in education *The Month* ,1961 *Subject Catalog* Library of Congress,1960 **Journal of the Society for Psychical Research** Society for Psychical Research (Great Britain),1962 Catalog of Copyright Entries.
