The City In The Ancient World:

Cities that Shaped the Ancient World John Julius Norwich, 2022-09-13 John Julius Norwich presents a sweeping tour of forty great cities that shaped the ancient world and its civilizations and which in turn have shaped our own. The cities of the ancient world built the foundations for modern urban life: their innovations in architecture and politics essential to cities as we know them today. But what was it like to live in Babylon, Carthage or Teotihuacan? From the first cities in Mesopotamia to the spectacular urban monuments of the Maya in Central America, the cities explored in *Cities That Shaped the Ancient World* represent almost three millennia of human history. Not only do they illustrate the highest achievement of the cultures that built them, but they also help us understand the rise and fall of these ancient peoples. In this new compact paperback, eminent historians and archaeologists with first hand knowledge of each site give voice to these silent ruins, bringing them to life as the teeming state of the art metropolises they once were.

Lost Cities Maria Teresa Guaitoli, 2002 The cities of antiquity where civilization took root and developed to create great empires and cultures are considered by experts to be the sacred places of historical science. These sites and the unstinting work of archaeologists have made it possible to piece together the history of famous civilizations and examine their ancient art, thereby restoring to humanity fragments of our lost treasures and the memory of the remote past. The Oxford Handbook of Cities in World History Peter Clark, 2013-02-14 In 2008 for the first time the majority of the planet's inhabitants lived in cities and towns. Becoming globally urban has been one of mankind's greatest collective achievements over time. Written by leading scholars, this is the first detailed survey of the world's cities and towns from ancient times to the present day.

Cities of the Biblical World LaMoine F. DeVries, 2006-11-29 This text is designed to introduce students of the Bible to the archaeology, geography and history of many of the important sites of the Old and New Testament worlds. Many of these sites were centers for trade, religion, defense, culture, industry and government. DeVries details the development of significant sites from villages and towns to cities based on how the site could meet the essential needs of the people. The availability of water or arable land, proximity to trade routes and easily defensible terrain were prime factors in determining a city's prominence. This study concentrates on the cities in Mesopotamia, Aram, Syria and Phoenicia, Anatolia, Egypt and Palestine during the Old Testament period and Palestine and the provinces of the Roman world during the New Testament period. Special attention is given to the geographical setting of the city, the history of its development, its relevance to the Bible, its distinguishing features and any significant archaeological discoveries made at the site.

The City in the Ancient World Mason Hammond, 1972 The emergence of cities in the different regions of the ancient world presents two problems First in areas of common culture or at least of cultural contact did the cities evolve independently as phenomena of social political and economic growth or did they emanate from a common center of origin Second how did the Greco Roman city state originate In considering these questions Mason Hammond has limited the ancient world to the Middle and Near East the Indus Valley and the Mediterranean region He takes geographical and economic factors into account as he treats the cities historically by areas from their first development in Sumer around 3200 B C to the end of the ancient world in the middle of the sixth century A D Mr Hammond concludes that the city's evolution was a phenomenon of local social development but was also influenced by older cultures The city state he shows was a creation of the Greek genius It was diffused throughout the Greco Roman world and withered with the decline of ancient culture in the early Middle Ages The author provides brief

geographical descriptions of the areas he covers Thirteen maps give the locations of places referred to in the text Where ancient and modern names differ markedly both are given in the text and in an index of the places shown on the maps An extensive chronological survey and a general index document the text

The City in the Classical and Post-Classical World Claudia Rapp, H. A. Drake, 2014-04-14 This volume examines the evolving role of the city and citizenship from classical Athens through fifth century Rome and medieval Byzantium Beginning in the first century CE the universal claims of Hellenistic and Roman imperialism began to be challenged by the growing role of Christianity in shaping the primary allegiances and identities of citizens An international team of scholars considers the extent of urban transformation and with it of cultural and civic identity as practices and institutions associated with the city state came to be replaced by those of the Christian community The twelve essays gathered here develop an innovative research agenda by asking new questions what was the effect on political ideology and civic identity of the transition from the city culture of the ancient world to the ruralized systems of the middle ages How did perceptions of empire and oikoumene respond to changed political circumstances How did Christianity redefine the context of citizenship
