The Collapse Of The Dale Dyke Dam 1864:

The Collapse of the Dale Dyke Dam, 1864 Geoffrey Amey, 1974 *The River Pollution Dilemma in Victorian England* Leslie Rosenthal, 2016-02-17

Nineteenth century Britain witnessed a dramatic increase in its town population as a hitherto largely rural economy transformed itself into an urban one. Though the political and social issues arising from these events are well known, little is known about how the British legal process coped with the everyday strains that emerged from the unprecedented scale of these changes. This book explores the river pollution dilemma faced by the British courts during the second half of the nineteenth century when the legal process had to confront the new incompatible realities arising from the increasing amounts of untreatable waste flowing into the rivers. This dilemma struck at the heart of both Victorian urban and rural society as the necessary sanitary reformation of the swelling cities and expanding industry increasingly poisoned the rivers, threatening the countryside and agricultural rents and livelihoods. Focusing on ten legal disputes, the book investigates the dilemma that faced the courts, namely how to protect the traditional and valued rights of landholders whose rivers and lands were being polluted by industrial waste and untreated sewage whilst not hindering the progress of sanitary reform and economic progress in the towns. The case studies considered involve major industrialising centres such as Birmingham, Leeds, Northampton, Wolverhampton and Barnsley, but also include smaller towns such as Tunbridge Wells, Leamington Spa and Harrogate. The fundamental issues raised remain as important today as they did in Victorian times. The need for the courts to balance a variety of conflicting needs and rights within the limits of contemporary technological capabilities often played out in surprising ways, with outcomes not always in line with theoretical expectations. As such, the historical context of the disputes provides fascinating insights into nineteenth century legal process and the environmental and social attitudes of the times.

Dams Donald C. Jackson, 2017-05-15

Dams have been used to control water for thousands of years, with the oldest known dam being a small earthen structure in present day Jordan dating to c 4000 BCE. Since then, cultures throughout the world have practised the art of dam building, and the technology has evolved in myriad ways. The papers selected here examine the key technical issues influencing dam construction from ancient times to the early 20th century. In addition, they illustrate why various human societies have built dams and how social or seemingly non-technical factors have influenced the process of dam design. Though hydraulic engineering is the primary focus of the book, it also reveals a keen interest in questions of water resources and environmental history.

In the Shadow of the Dam Elizabeth M. Sharpe, 2007-08-10

Early one May morning in 1874, in the hills above Williamsburg, Massachusetts, a reservoir dam suddenly burst, sending an avalanche of water down a narrow river valley lined with factories and farms. In just thirty minutes, the Mill River flood left 139 people dead and 740 homeless, and a nation wondering how this terrible calamity had happened. In this compelling tale of a man-made disaster peopled with everyday heroes and arrogant scoundrels, Elizabeth Sharpe opens a rare window into industry and village life in nineteenth century New England, a time when dam failures and other industrial accidents were

widespread and laws favored factory owners rather than factory workers In the Mill Valley the townsfolk depended upon generally benevolent patriarchs who assured them that the dam was safe when most people could see that it was not The story of the Mill River flood is the story of those townsfolk of George Cheney the dam keeper whose repeated warnings about leaks in the dam had been ignored by the mill owners of his wife Elizabeth who watched in disbelief as the dam burst open from the bottom of Isabell Hayden the mother who saw her young son swept away in the river's torrent and of Fred Howard a box maker who spent the days after the flood searching for bodies burying friends and waiting to see if the button factory he relied upon for his livelihood would be rebuilt It is also the story of the well meaning but overconfident businessmen who built the dam of Onslow Spelman the manufacturer who dismissed the dam keeper's flood warning irrationally insisting that the dam could not break of Lucius Fenn and Joel Bassett the engineer and contractor whose roles in the construction of the dam would be questioned during the public inquest into the causes of the flood of William Skinner the factory owner who struggled to decide whether or not to rebuild his silk factory in the village that bore his name and of many others The flood highlighted class divisions between worker and owner as well as the disorganized state of professional engineering then still in its infancy As the flood exposed the dangers of allowing mill owners who were not trained engineers to design their own dam legislation to regulate the building of reservoir dams in Massachusetts was enacted for the first time Engineers politicians and business owners battled over control of the reform measures to prevent similar tragedies yet saw them continually repeated In the Shadow of the Dam is the story of an event that reshaped a society Told through the eyes of villagers like Collins Graves lauded as a hero for his desperate ride through the valley to warn people of the impending flood and industrialists like Joel Hayden Jr entrusted with the responsibility of disaster relief despite his culpability in failing to maintain the leaking dam In the Shadow of the Dam is a history of our uneasy relationship with industrial progress and a riveting narrative of a tragic disaster in small town Massachusetts

Reservoirs in a Changing World British Dam Society. Conference, 2002 This volume is the Proceedings from the 12th International Conference organised by the British Dam Society in September 2002 Reservoir safety is the key theme with many papers on the performance and rehabilitation of dams The evolution of reservoirs in Ireland and the development of safety legislation in the UK are described Risk assessment features in a number of papers as a method of assessing the safety of reservoirs Several papers address the seismic assessment of dams and structures

History of Technology Volume 26 Ian Inkster, 2016-09-30 The technical problems confronting different societies and periods and the measures taken to solve them form the concern of this annual collection of essays It deals with the history of technical discovery and change and explores the relationship of technology to other aspects of life social cultural and economic and shows how technological development has shaped and been shaped by the society in which it occurred

Dam Failure Mechanisms and Risk Assessment Limin Zhang, Ming Peng, Dongsheng Chang, Yao Xu, 2017-03-15 This book integrates the physical processes of dam breaching and the mathematical aspects of risk

assessment in a concise manner The first book that introduces the causes processes and consequences of dam failures Integrates the physical processes of dam breaching and the mathematical aspects of risk assessment in a concise manner Emphasizes integrating theory and practice to better demonstrate the application of risk assessment and decision methodologies to real cases Intends to formulate dam breaching emergency management steps in a scientific structure

Private Property and Abuse of Rights in Victorian England Michael Taggart,2002 The case of the Borough of Bradford v Pickles was the first to establish the principle that it is not unlawful for a property owner to exercise his or her property rights maliciously and to the detriment of others or the public interest This book explores why the common law developed in this way *The Hidden Hand* Roger J. Green,2003 One dark night Sally s life changes for ever Suddenly she finds she holds the life of Noah North her cruel employer within her power She alone can decide whether he will live or die Alone on a fearful night of wind and rain with her whole world collapsing around her Sally must make her own decision
