The Collected Letters Of George Gissing Vol 5 1892 1895:

George Gissing, the Working Woman, and Urban Culture Emma Liggins, 2017-09-29 George Gissing's work reflects his observations of fin de siècle London life. Influenced by the French naturalist school, his realist representations of urban culture testify to the significance of the city for the development of new class and gender identities, particularly for women. Liggins's study, which considers standard texts such as *The Odd Women*, *New Grub Street*, and *The Nether World*, as well as lesser-known short works, examines Gissing's fiction in relation to the formation of these new identities, focusing specifically on debates about the working woman. From the 1880s onward, a new genre of urban fiction increasingly focused on work as a key aspect of the modern woman's identity, elements of which were developed in the New Woman fiction of the 1890s. Showing his fascination with the working woman and her narrative potential, Gissing portrays women from a wide variety of occupations, ranging from factory girls, actresses, prostitutes, and shop girls to writers, teachers, clerks, and musicians. Liggins argues that by placing the working woman at the center of his narratives rather than at the margins, Gissing made an important contribution to the development of urban fiction, which increasingly reflected current debates about women's presence in the city.

The New Woman and Technologies of Speed in Fin-de-Siècle Literature Eva Chen, 2024-11-01 This is the first literary study on the New Woman's interaction with modern speed culture through use of the typewriter and the bicycle. These technologies of speed are among the earliest to be associated with middle-class women, exposing them to the discipline of mechanized speed while allowing for the construction of a new machine-savvy, sped-up and energized female subjectivity. Used for women's office work and daily movement, they demand from their women operators a response and adaptation to speed right from the beginning. The ability to catch up with, imitate, adjust to, and finally master this mechanized speed is the key to the New Woman's enlarged freedom in the modern city. By examining New Woman literature penned by George Gissing, H.G. Wells, Grant Allen, Geraldine Edith Mitton, and Mrs. Edward Kennard, and stories and comments published in popular magazines, this book examines how mechanized speed works on the New Woman typist and cyclist, first as discipline and control in typewriting, then as commodity and conspicuous display in cycling, and finally as rejuvenation, stimulation, and active thrill. Being fast, having speed, and adjusting to the shocks, as well as excitement of techno-aided speed, is a crucial part of what makes the New Woman new, as she stakes a claim to modern speed culture.

The Heroic Life of George Gissing, Part II Pierre Coustillas, 2015-09-30 This ambitious three-volume biography on Gissing examines both his life and writing, both chronologically and in close detail. Part II assesses the period of Gissing's greatest authorial triumphs. His most critically acclaimed works, *The Nether World* (1889), *New Grub Street* (1891), and *The Odd Women* (1893), date from this time.

The Collected Letters of George Gissing: 1897-1899 George Gissing, 1990 For many years the only Gissing letters available to the public were those in the modest selection of letters to his family published in 1927. In the following years a good number were published separately in such places as journals, memoirs, and sales catalogues, but like the single and small

groups of unpublished letters scattered in libraries around the world they remained in practical terms inaccessible Even though in recent years small groups of letters to individual correspondents have come into print the rapidly growing numbers of Gissing readers and scholars now feel the need for access to his letters in an edition comparable to those of his contemporary novelist friends Thomas Hardy and Joseph Conrad In this edition all the Gissing letters that could be found published and unpublished have been brought together from all known sources private and public collections journals newspapers memoirs biographies and sales catalogues The important advantage is not only that they have at last been brought together but also that they are placed chronologically and given a uniform editorial context which provides a coherence lacking in letters separately published A significant feature of this edition is that it also contains whenever they are available letters to Gissing which are of great help in recording his life during the times when his own letters have been lost or destroyed With the recent publication of Gissing's diary his commonplace book and other smaller pieces this edition becomes the final major publication of Gissing papers known to exist and certainly the most significant record of his life his mind and his art It will be of crucial importance to any future biographers and of the greatest value to those who want to study Gissing's novels in relation to his life

Novel Pedagogy Liwen Zhang, 2024-10-01 Is the novel a category of knowledge that merits serious study Even if the novel has shed the stigma of being mindless entertainment one might easily assume that reading a novel is not studying unless one reads closely and carefully preferably from a scholarly edition or for a scholarly purpose *Novel Pedagogy* explores how Victorian writers envisioned the novel's potential to become knowledge long before the form's ascendance into the ivory tower Liwen Zhang argues that Victorian novelists' constant critique of schooling on the one hand and their frequent invocation of deep knowledge on the other are not self-contradictory Instead of offering a blissful escape from education writers such as William Thackeray Charles Kingsley Charles Dickens Elizabeth Gaskell George Eliot and George Gissing seek to offer uniquely novelistic pathways to knowledge *Novel Pedagogy* offers a new model of novelistic epistemology by showing how the novel unlike other educational genres reflects on the unpleasant realities of learning and of not learning amid the ubiquity of ineffective textbooks reluctant students and false motivations

The First Women Lawyers Mary Jane Mossman, 2006-05-31 This comparative study explores the lives of some of the women who first initiated challenges to male exclusivity in the legal professions in the late nineteenth and early twentieth centuries Their challenges took place at a time of considerable optimism about progressive societal change including new and expanding opportunities for women as well as a variety of proposals for reforming law legal education and standards of legal professionalism By situating women's claims for admission to the bar within this reformist context in different jurisdictions the study examines the intersection of historical ideas about gender and about legal professionalism at the turn of the twentieth century In exploring these systemic issues the study also provides detailed examinations of the lives of some of the first women lawyers in six jurisdictions the United States Canada Britain New Zealand and Australia India and western

Europe In exploring how individual women adopted different legal arguments in litigated cases or devised particular strategies to overcome barriers to professional work the study assesses how shifting and contested ideas about gender and about legal professionalism shaped women s opportunities and choices as well as both support for and opposition to their claims As a comparative study of the first women lawyers in several different jurisdictions the book reveals how a number of quite different women engaged with ideas of gender and legal professionalism at the turn of the twentieth century
