The Coming Revolution In Social Security:

The Coming Revolution in Social Security A. Haeworth Robertson, 1981 Monograph comprising an analysis and evaluation of the social security system in the USA covers benefits costs contributions actuarial deficits the income test to determine old age benefit etc and suggests the adoption of a new programme permitting more freedom of choice for the individual in deciding what benefits are to be provided and in selection of the financing method Graphs and references

The Coming Revolution Ben Reynolds, 2018-06-29 A technological revolution is driving capitalism toward crisis and collapse Can our society evolve in time to rescue the future Radical advances in automation robotics and computer technology have thrown millions out of work and will only continue to do so in the years to come At the same time cheap individually accessible machines will wrestle for primacy with both gleaming highly automated factories and sweatshops alike ultimately eroding the dominance of industrial production Economic growth is slowing down and it is not going to speed up again The pressures fueling today's global unrest will not go away and are only going to get worse as wages stagnate in many countries solid employment becomes harder to find and cuts to social benefits continue Competing radical and reactionary ideologies will clash as political consensus crumbles and the world's peoples search for answers to these challenges In its opening decades the 21st will be a century of war and revolution By the end of the 21st century capitalism will be consigned to the history books Despite the seeming darkness of our era our future is filled with incredible possibility If working people join together we can create a world of freedom beauty and abundance where poverty and tyranny are merely distant memories for our grandchildren This is the story of *The Coming Revolution* *National Commission on Social Security Reform Recommendations* United States.
