The Concept Dictionary:

Enterprise Information Systems of the Future Geert Poels, 2013-01-31 This book constitutes the proceedings of the 6th International IFIP Working Conference on Research and Practical Issues of Enterprise Information Systems CONFENIS 2012 held in Ghent Belgium during September 19-21 2012. The theme of the conference was enterprise information systems of the future evolving toward more performance through transparency and agility mirroring the trend toward more open and more flexible systems. In all 53 contributions were submitted and after a rigorous review process 10 full papers and 15 short papers were selected for publication in this book. These 25 papers present a well balanced mix between the traditional social sciences and the novel design science paradigms in enterprise information systems research and they also include practitioner oriented and practice driven contributions. The topics covered fall into three categories: information management in businesses e.g. enterprise modeling or business process management; information systems from a management perspective e.g. service innovation, business intelligence or decision support systems; and ERP offerings and implementations e.g. software as a service or ERP case studies.

Advanced Software Applications in Japan Edward A. Feigenbaum, Elaine Rich, Gio Wiederhold, Michael G. Harrison, 1995-01-01 **Advanced Software Applications in Japan** **Solutions for Networked Databases** Dimitris N. Chorafas, Heinrich Steinmann, 2014-05-10 **Solutions for Networked Databases** How to Move from Heterogeneous Structures to Federated Concepts reviews developments in standards and ad hoc solutions aimed at providing cross database connectivity for networked databases. The emphasis is on how to move from heterogeneous structures to federated concepts. The advent of the multidatabase is discussed along with schemata dictionaries and protocols. Applications with federated databases are also considered. Comprised of 18 chapters, this book begins with an introduction to database and knowledge bank concepts, reliability and availability characteristics, and the synergy necessary to create and sustain federated databases. Centralized and distributed databases are then compared and the different ways of managing distributed databases are outlined. Subsequent chapters focus on the importance of treating the networked database as a corporate resource, the use of schemata to solve cross database problems, the Information Resource Dictionary System, and application programming interface and remote data access. A solution to heterogeneous distributed databases, the Data Access Integrated Services (DAIS), is described. This monograph is written for specialists in computers and communications.

Analyzing and Conceptualizing the Theoretical Foundations of Nursing Janice M. Morse, 2016-08-28 Delivers all information required for the Theoretical Foundations of Nursing course. By embracing the major conceptual and theoretical contributions to nursing research that are outside of traditional nursing theory, this book serves as a vital resource for nurse researchers and one that is indispensable for doctoral nursing students embarking on their dissertations. Containing the full complement of information required for the Theoretical Foundations of Nursing course for PhD programs, the text supports the foundational skills needed for excellence in research and scholarship. The book examines in depth the components of

nursing theory and the types of theory used in nursing research and practice and teaches students about the nature and use of concepts and the development of critical thinking skills that are essential for nursing research This text contains information for developing concepts and middle range theory using a variety of qualitative research methods broadening theoretical scope by linking middle range theories and moving knowledge toward certainty by use of evidence It also illustrates the construction of frameworks for quantitative inquiry exploring theory in mixed method design and how theory develops knowledge Each method includes a description of the methodological approach and examples of subsequent concept or theory development The text includes several methods for the development of concepts micro and mid range theories using qualitative research and a discussion of the new trend of moving these qualitative theories toward practice based evidence Each section of the book contains practical examples and supplementary activities that encourage inquiry An instructor s manual is included for adopters of the text Key Features Teaches the significance of and foundations of perspective concepts qualitatively derived theory quantitative frameworks quantitative theoretical development knowledge development from research application and evidence Focuses on current nursing research and how it is used in practice today Demonstrates the significant relationship between theory research knowledge development evidence and practice Promotes excellence in scholarship and research Includes an extensive instructor s manual

Developing Maternal Health Decision Support Systems in Developing Countries Mzazi, Vincent, 2021-03-19 Implementation of guidelines in the health system is a major undertaking especially in developing countries An important constraint in guideline development in developing countries is that the guideline recommendations must suit local conditions and must make use of available resources This is a challenge because the health systems of developing countries have a high burden of disease and little resources therefore guidelines must rely on cost effective healthcare interventions The BACIS program study was initiated to address some of these challenges in the dissemination and utilization of maternal health guidelines The BACIS program was piloted and the results showed that the BACIS program could assist in improving compliance of nurses with the national maternity care guidelines This is an impressive finding and step forward for maternal healthcare in developing countries Developing Maternal Health Decision Support Systems in Developing Countries discusses public health aspects of the design and implementation of clinical decision support systems in developing country contexts Specifically it focuses largely on the design and evaluation of the BACIS program in South Africa This is supplemented with a conversation on the possible future research directions in the BACIS program study along with the outlook for clinical decision support systems in developing country contexts in general This book is ideal for e health system designers and implementers managers and policymakers in the area of e health in developing countries personnel from NPOs and donor agencies government officials IT consultants medical professionals practitioners stakeholders researchers academicians and students who are interested in how decision support systems such as BACIS are being used to improve maternal health in developing countries

Foundations of

Intelligent Systems Mohand-Said Hacid,Zbigniew W. Ras,Djamel A. Zighed,Yves Kodratoff,2003-08-02 This book constitutes the refereed proceedings of the 13th International Symposium on Methodologies for Intelligent Systems ISMIS 2002 held in Lyon France in June 2002 The 63 revised full papers presented were carefully reviewed and selected from around 160 submissions The book offers topical sections on learning and knowledge discovery intelligent user interfaces and ontologies logic for AI knowledge representation and reasoning intelligent information retrieval soft computing intelligent information systems and methodologies

Principles of Constructing Microstructures in Etymological References Yan Kapranov,Bożena Iwanowska,Bolesław Cieślík,2024-08-12 The main theme of the volume is the exploration and identification of the fundamental principles involved in constructing and understanding the microstructures found within etymological references The authors offer an in depth examination of designing etymological dictionaries focusing on the principles behind constructing their microstructures It begins by exploring the evolution of lexicographic sources and their role in societal knowledge organization The work then delves into the methodology of building dictionary entries discussing the integration of traditional and cognitivesynergetic principles to better capture the linguistic nuances of words Through comprehensive analysis and detailed examples this volume provides a profound understanding of how etymological information is systematically organized and presented

The Handbook of Applied Expert Systems Jay Liebowitz,2019-07-23 The Handbook of Applied Expert Systems is a landmark work dedicated solely to this rapidly advancing area of study Edited by Jay Liebowitz a professor author and consultant known around the world for his work in the field this authoritative source covers the latest expert system technologies applications methodologies and practices The book features contributions from more than 40 of the world s foremost expert systems authorities in industry government and academia The Handbook is organized into two major sections The first section explains expert systems technologies while the second section focuses on applied examples in a wide variety of industries Key topics covered include fuzzy systems genetic algorithm development machine learning knowledge representation and much more

Artificial Intelligence in the Pacific Rim Hozumi Tanaka,1991 In the last decade AI firmly settled into our industrial society with the expert systems as the representative product However almost every one of the systems could cover only a single task domain In the highly mechanized world of the 21st century systems will become smart and user friendly enough to cover a wide range of task domains Systems with much user friendliness must be multilingual because users in different domains usually have different languages Language is formed in its own culture Therefore promotion for cross cultural scientific interchange will be indispensable for the progress of AI

Traceable Human Experiment Design Research Nadine Mandran,2018-02-15 The aim of this book is to describe the methodology of conducting the THEDRE research Traceable Human Experiment Design Research It applies to Research in Human Centered Informatics RICH These are areas of computer research that integrate users to build scientific knowledge and supporting tools for this research As an example we can mention the relevant fields such as Information

Systems IS Human Machine Interfaces HMI Engineering and Human Information Systems HIA The construction of this language and method is based on experiments conducted since 2008 in the field of RICH
