

Trade Patterns II

- Handful of basic commodities – iron ore, copper, soya and petroleum have accounted for over 3/4 of total exports since 2002
- China's exports to Latin America almost all manufactures, many of which compete with domestic producers
- Most Latin American countries developed large trade deficits with China as a result
- The downturn since 2012 presents Latin America with an opportunity to address imbalances
- Would require better access to the Chinese market where tariffs and non-tariff barriers undermine region's ability to diversify and add value to exports

The Handbook Of Latin American Trade In Manufactures

Scott C. Dulebohn

The Handbook Of Latin American Trade In Manufactures:

The Handbook of Latin American Trade in Manufactures Montague J. Lord, 1998 This major Handbook offers a comprehensive analysis of the key issues surrounding the rapid expansion of Latin America's manufacturing sector. It systematically examines the most important factors influencing the comparative advantages and the globalization of manufacturing industries in the region. The Handbook of Latin American Trade in Manufactures provides a detailed account of trade and investment policies, international technology transfers, macroeconomic stabilization and structural adjustment policies, and industry specific initiatives affecting the export competitiveness of Latin America's manufactures. The four major parts of the Handbook contain detailed assessments of regional and country specific developments in manufacturing trade and the statistical appendix provides essential information on the countries of the region. This Handbook will be welcomed by a wide range of economists in the fields of international trade and investment, industrial organization, development economics and Latin American Trade. It will also be of interest to business analysts and policymakers concerned with the formation of trade strategies.

The Oxford Handbook of Latin American Economics José Antonio Ocampo, Jaime Ros, 2011-07-28 Latin America has been central to the main debates on development economics ranging from the relationships between income inequality and economic growth and the importance of geography versus institutions in development to debates on the effects of trade, trade openness and protection on growth and income distribution. Despite increasing interest in the region, there are few English language books on Latin American economics. This Handbook, organized into five parts, aims to fill this significant gap. Part I looks at long term issues including the institutional roots of Latin America's underdevelopment, the political economy of policy making, the rise, decline and re-emergence of alternative paradigms, and the environmental sustainability of the development pattern. Part II considers macroeconomic topics including the management of capital account booms and busts, the evolution and performance of exchange rate regimes, the advances and challenges of monetary policies and financial development, and the major fiscal policy issues confronting the region, including a comparison of Latin American fiscal accounts with those of the OECD. Part III analyzes the region's economies in global context, particularly the role of Latin America in the world trade system and the effects of dependence on natural resources characteristic of many countries of the region on growth and human development. It reviews the trends of foreign direct investment, the opportunities and challenges raised by the emergence of China as buyer of the region's commodities and competitor in the world market, and the transformation of Latin America from a region of immigration to one of massive emigration. Part IV deals with matters of productive development. At the aggregate level, it analyzes issues of technological catching up and divergence, as well as different perspectives on the poor productivity and growth performance of the region during recent decades. At the sectoral level, it looks at agricultural policies and performance, the problems and prospects of the energy sector, and the effects on growth of lagging infrastructure development. Part V looks at the social dimensions of development.

it analyzes the evolution of income inequality poverty and economic insecurity in the region the evolution of labor markets and the performance of the educational sector as well as the evolution of social assistance programs and social security reforms in the region The contributors are leading researchers that belong to different schools of economic thought and most come from countries throughout Latin America representing a range of views and recognising the diversity of the region This Handbook is a significant contribution to the field and will be of interest to academics graduate students and policy makers interested in economics political economy and public policy in Latin America and other developing economies
