The Heart of Me Sharon Gentry, 1997-10-01

The Encyclopedia of Middle Grades Education Steven B. Mertens, Vincent A. Anfara, Gayle Andrews, 2005-10-01

The Encyclopedia of Middle Grades Education provides a comprehensive overview of the field. This publication includes seven anchor essays, 5000 words that cover the following topics: the history of the middle school movement; academically excellent curriculum instruction and assessment; developmental responsiveness in relation to young adolescents; social equity in middle grades schools; leadership in middle level schools; teacher and administrator preparation and professional development; and future directions in relation to the movement practices and policy. Leading scholars in the field of middle grades education were invited to author these essays. In addition to the seven anchor essays, the encyclopedia contains alphabetically organized entries: short entries, approximately 500 words; long entries, approximately 2000 words that address important concepts, ideas, terms, people, organizations, and seminal publications related to middle grades education. Contributors to the encyclopedia have provided sufficient information so that the reader can place the idea, concept, person, etc. into its proper context in the history of the middle school movement. Entries are meant to be introductory; after an overview of the essentials of the topic, the reader is guided to more extensive sources for further investigation. Where appropriate, the reader is also directed to electronic sources such as websites where additional information can be retrieved.

Inclusive Special Education Garry Hornby, 2014-08-20

Much has been written about special education and about inclusive education, but there have been few attempts to pull these two concepts and approaches together. This book does just that: sets special education within the context of inclusive education. It posits that to include effectively all children with special educational needs in schools requires an integration of both concepts, approaches, and techniques. It has never been more timely to publish a book that helps professionals who work with schools, such as psychologists, special education professionals, and counselors, to identify effective practices for children with special needs and provide guidelines for implementing these in inclusive schools.

Teaching Black Boys in the Elementary Grades Alfred W. Tatum, 2021

This book will help educators rethink their expectations of and practices for developing the literacy skills of Black boys in the elementary school classroom. Tatum shows educators how to bring students' literacy development into greater focus by creating an early intellectual infrastructure of advanced literacy knowledge and personal development. He provides a strong conceptual frame with associated instructional and curricular practices designed to move Black boys from across the economic spectrum toward advanced literacy that aligns with the Black intellectual tradition. Readers will learn how to use texts from a broad range of potential professions across academic disciplines to nurture social and scientific consciousness. The text includes guidance for selecting texts, reading supports, prompts for analysis, and examples of student work. *Teaching Black Boys in the Elementary Grades* counters the current obsession with basic and proficient reading and argues for adopting an exponential growth model of literacy development. **Book Features:** A multidimensional model that

supports reading and writing development Student writing artifacts that can be used as a model for teachers Sample lessons with texts for use across the academic disciplines A strong conceptual and curricular frame to support educators in their text selection
