McFaul, 2009-11-19 This book offers a bold forecast of the year 2050 and what life will look like in the emerging global village Is this profound new work Thomas McFaul examines the interwoven concepts of truth and freedom in the context of the Modernist movement that has fundamentally reshaped our world McFaul s thesis Societies that make truth and freedom their signature values stand the best chance of prospering in the emerging global village In *The Future of Truth and Freedom in the Global Village* Modernism and the Challenges of the Twenty first Century McFaul relates the two cornerstone ideas of truth and freedom to the development of Modernism and its impact on science religion ethics economics and politics This sets the stage for thought provoking speculation as McFaul forecasts what life might be like in the year 2050 with scenarios that range from moving forward as a unified world embracing new possibilities to sliding back to the good old days McFaul s well reasoned conclusion is that any society s long term viability rests on having the freedom to adapt to changes in the modern world in new and creative ways      On the Threshold of the Third Millennium , 1990      Sport, Militarism and the Great War Thierry Terret, J. A. Mangan, 2013-09-13

The Great War has been largely ignored by historians of sport However sport was an integral part of cultural conditioning into both physiological and psychological military efficiency in the decades leading up to it It is time to acknowledge that the Great War also had an influence on sport in post war European culture Both are neglected topics *Sport Militarism and the Great War* deals with four significant aspects of the relationship between sport and war before during and immediately after the 1914 1918 conflict First it explores the creation and consolidation of the cult of martial heroism and chivalric self sacrifice in the pre war era Second it examines the consequences of the mingling of soldiers from various nations on later sport Third it considers the role of the Great War in the transformation of the leisure of the masses Finally it examines the links between war sport and male socialisation The Great War contributed to a redefinition of European masculinity in the post war period The part sport played in this redefinition receives attention *Sport Militarism and the Great War* is in two parts the Continental Part I and the Anglo Saxon Part II No study has adopted this bilateral approach to date Thus in conception and execution it is original With its originality of content and the approaching centenary of the advent of the Great War in 2014 it is anticipated that the book will capture a wide audience

negative use of Science has created problems for human beings also Anyhow Science has given prediction power to human beings about diseases and seasons also Similarly due to science and technology every one can know about the other who is thousands miles away sitting from this one And now emails are sent with in the click of the button on the computer which is attached with internet Therefore now emails have taken place instead of mails and e books are being used instead of books This hardness to softness has changed man because now man can have thousands books in their flash With these advantages now money can be easily sent within few seconds With uncountable innovations of science and technology there are some problems also arose because of misuse or negligence of side effects of modern technology In short it may be stated that all developments of science and technology may be sustained and all negative impacts may be removed through proper use of scientific knowledge and modern technology **Friends Journal** ,1994
