The City Assembled Spiro Kostof, Greg Castillo, 1992 Spiro Kostof the renowned architectural historian and chronicler of urban form presents a universal history of the elements of cities streets public places urban divisions and the borders of city and countryside This is both an independent study and a companion volume to Professor Kostof's book *The City Shaped* which dealt with cities as complete entities Now he follows the evolution of their components and traces the story right up to the present showing how the issues remain fresh and engage with our own day often in unexpected ways He also discusses urban process the effect on cities of natural disasters such as the Great Fire of London and the Lisbon earthquake war and comprehensive redevelopment compared with traditional patterns of incremental growth and change This is at once an exercise in architectural and social history a case study for the present and a pointer for the future

Culture, Urbanism and Planning Manuel Guardia, 2016-05-13 The relationship between culture and urbanism has been the focus of much discussion and debate in recent years While globalisation tends towards a homogeneity successful global cities have a strong individual and particularly cultural identity The economic value of the culture of cities lies not only in the arts taking place there but also in the city's fabric its architecture and in its cultural heritage This volume brings together a team of leading specialists to examine the policies of image and city marketing which have developed over the past 15 years and whether these are a continuity of earlier strategies Featuring case studies which illustrate diverse perspectives on linking culture urbanism and history the book reviews heritage and planning culture looking at the experience of urbanism in the Old Historic City The book also assesses the increasingly important issue of urban images and their influence on planning strategies

The Art of Classic Planning Nir Haim Buras,2020-01-28 An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable demonstrating how we can restore function and beauty to our urban spaces for the long term Nearly everything we treasure in the world s most beautiful cities was built over a century ago Cities like Prague Paris and Lisbon draw millions of visitors from around the world because of their exquisite architecture walkable neighborhoods and human scale Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years not because of traffic population growth or other practical hurdles but because of ill considered theories emerging from Modernism and reactions to it The errors of urban design over the last century are too great not to question The solutions being offered today sustainability walkability smart and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial In The Art of Classic Planning architect and planner Nir Haim Buras documents and extends the time tested and holistic practices that held sway before the reign of Modernism With hundreds of full color illustrations and photographs that will captivate architects planners administrators and developers The Art of Classic Planning restores and revitalizes the foundations of urban planning Inspired by venerable cities like Kyoto Vienna and Venice and by the great successes of L Enfant s Washington Haussmann s Paris and Burnham s Chicago Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today s world The Art of Classic Planning celebrates the enduring principles of urban design and invites us to return to building beautiful cities

Basics Landscape Architecture 01: Urban Design Tim Waterman,Ed Wall,2017-11-02 Basics Landscape Architecture 01 Urban Design seeks to define and describe the role played by landscape architecture in urban design an interdisciplinary practice that is concerned with defining the form of human settlements It provides a brief history and definition of urban design and the roles of the various professions involved Urban Design looks at the elements of urban form and the importance of contextual details from the scale of the city and its region to the importance of materials The text uses case studies to explore the philosophies and methodologies of urban design and to explain the importance of of urban design to landscape architecture

and in turn the importance of landscape architecture to urban design *Metaphors in Architecture and Urbanism* Andri Gerber, Brent Patterson, 2014-03-15 Architecture and urbanism seem to be weak disciplines constantly struggling for a better understanding of their nature and disciplinary borders The huge amount of metaphors appearing in the discourse of both not only reference to their creative nature but also indicate their weakness and the missing piece strengthening their own understanding a definition of space for architecture and of city for urbanism But using metaphors in this field implies a problem though metaphors achieve to bring opposites together there remains the question how literal they can actually become in order to relate to these subjects properly In this volume several authors from various fields using different approaches discuss this question **Sustainable Urbanization** Mustafa Ergen, 2016-09-28 The rapid urbanization that began with industrialization has begun to cause many problems New approaches are emerging today to minimize these problems and make urban areas more livable These problems include insufficient social facilities in urban areas for increasing populations due to migration and unbalanced use of green areas water and energy resources due to urbanization Careless consumption and the pollution of natural resources will cause people many more problems in the future than they do today in urban development Many professional disciplines have noticed this unbalanced development in urban areas Urban areas have larger populations than rural areas today Urban areas are developed neglectfully Sustainability is needed as a criterion for urban areas to develop in a more livable and healthy fashion Sustainable urban development approaches are seen in many fields ranging from land use to the use of natural resources in urban areas
