Slovenia A Small Country In The Global Economy:

Slovenia Marjan Senjur, Centre for International Cooperation and Development (Slovenia), 1993

Internationalization in Central and Eastern Europe Marin Alexandrov Marinov, 2018-04-27 This title was first published in 2002 This is a unique volume among the existing variety of publications on foreign direct investment FDI in Central and Eastern Europe CEE because it focuses on the internationalization process taking place there It addresses the rapid changes of the business climate in the region that have led to intensive internationalization of companies businesses and national economies Existing FDI books have mostly taken the perspective of attracting inward FDI flows missing the aspect of FDI outflows from CEE countries While foreign investors face the specific context of a region that poses new requirements to their internationalization strategies approaches and practices domestic companies must strive to make their businesses international Consequently the book presents the features of internationalization in CEE from home and host company and country perspectives providing a fresh perspective on this major economic problem Small Countries in a Global Economy D. Salvatore, M. Svetlicic, J. Damijan, 2001-03-13 This book addresses the issues surrounding the prospects of small countries in an integrated globalized world The contributors support the thesis that the new global environment does not represent a twilight for small countries but recognise that the honeymoon has not been as comfortable as others had expected They demonstrate that by entering the global arena or by consolidating into regional alliances small countries do not lose and may even gain sovereignty in areas previously closed to them *Handbook on Small Nations in the Global Economy* D. van den Bulcke, Alain Verbeke, Wenlong Yuan, 2009 These studies of the international competitiveness of small open economies demonstrate the critical importance of foreign direct investment as an engine of economic development multinational enterprises are the key drivers of international competitiveness Alan M Rugman University of Reading UK Globalization has made every country small The global economic crisis has made sure that every country has increasingly realised that it is open and vulnerable as well This volume is both timely and relevant Small country studies should become mainstream for scholars in business economics and politics Rob van Tulder RSM Erasmus University the Netherlands This book provides a fresh and clear eyed view of the relationship between multinationals and location advantages of countries It is one of the first attempts to build a constructive bridge between the theory of international business and the outstanding contribution of Michael Porter about the drivers of competitiveness The authors address crucial issues demanding the attention of teachers researchers practitioners and political leaders Philippe Gugler University of Fribourg Switzerland This unique extensive Handbook illustrates that multinational enterprises can contribute substantially to the competitive advantage of small countries It advances the notion that small nations increasingly need to rely on both home grown and foreign multinational enterprises to achieve domestic economic success in industries characterized by international competition The expert contributors explore the roles of firms in a range of small successful open economies driven by such

multinational enterprises across the globe They juxtapose country data sets against Professor Michael Porter's paradigm of single diamond components and show that these single diamond components reflect merely a set of initial conditions which can be improved upon through both inward and outward direct investment Concluding that multinational enterprises create resource linkages between the home and host environments in which they operate this Handbook proves to be a fascinating read for academics students and researchers with an interest in business and management economics and international economics *Who's who in International Business Education and Research* William F. Shepherd, Iyanatul Islam, Sankaran Raghunathan, 1999-01-01 This work is recommended for corporate libraries whose companies are involved in international business and for academic libraries affiliated with colleges of business Kay M Stebbins Choice This project is distinctive in that it really is a Who's Who rather than a directory of all scholars engaged in international business education and research

management education has become one of the fastest growing areas in higher education Management Education and Competitiveness provides a wide overview including studies by scholars in nine countries in Europe Japan and the United States It examines how countries have developed different national courses in spite of strong influence from the American system of management education It also examines the links between education and business This collection of essays will be invaluable to managers and professionals in educational research and business administration

Slovenia's Path to Independence Pasquale De Marco, 2025-03-09 Slovenia's remarkable transformation from a part of Yugoslavia to an independent and thriving nation is a story of resilience determination and the triumph of the human spirit This book provides a comprehensive examination of Slovenia's political economic social and cultural landscape offering readers a deeper understanding of this fascinating country In the aftermath of World War II Slovenia found itself within the borders of Yugoslavia a federation of six republics The decades that followed were marked by both progress and challenges as Slovenia experienced economic growth and social development while also grappling with the complexities of a multi ethnic state The rise of nationalism in the late 1980s coupled with economic disparities and political tensions ultimately led to the dissolution of Yugoslavia In 1991 Slovenia declared independence embarking on a new chapter in its history The transition from a socialist republic to a market economy was not without its hurdles Slovenia faced economic challenges political uncertainties and the need to establish new institutions Yet with determination and resilience the Slovenian people navigated these obstacles and laid the foundation for a prosperous and democratic nation Today Slovenia stands as a beacon of success in the region It boasts a stable democracy a thriving economy and a high standard of living The country is a member of the European Union and has made significant contributions to the global community Slovenia's journey from a part of Yugoslavia to an independent and thriving nation is a testament to the indomitable spirit of its people and the power of transformation This book delves into the intricacies of Slovenia's history exploring the political economic social and cultural factors that have shaped this fascinating nation Readers will gain insights into Slovenia's unique identity its rich cultural heritage and its aspirations for the future Through a comprehensive analysis of the country's past and present this book provides a valuable resource for anyone interested in understanding Slovenia and its place in the world Whether you are a seasoned traveler a history buff or simply someone curious about the world around you this book promises to engage inform and inspire Discover the beauty resilience and spirit of Slovenia a nation that has risen from the ashes of the past to become a beacon of hope and progress If you like this book write a review

Civil Society, Political Society, Democracy Adolf Bibič, Gigi Graziano, 1994 *Enhanced Transition Through Outward Internationalization* Andreja Jaklič, Marjan Svetličič, 2017-11-22 This title was first published in 2003 Among the major challenges transition economies are facing is how to cope with globalization Foreign direct investment FDI has proved the most dynamic defensive and offensive response as an integration and network tool yet outward FDI has so far been overlooked in research The vitality of outward FDI as an entry mode to the

global economy is discussed in this authoritative volume from various angles beginning with the context of the development strategy and the transition process The experiences of the Slovene way of internationalization are compared with those of other transition economies Readers will learn about the size geographical distribution trends and sectoral allocation of such outward FDI OFDI as well as the major motives barriers and problems The book also responds to questions about the extent to which outward FDI is instrumental in development transition EU accession and competitiveness strengthening Based on extensive empirical research and focused case studies the volume provides valuable lessons for other EU candidate countries and transition economies while managerial experiences in entering Central and Eastern European markets offer universal internationalization lessons *Weekly Compilation of Presidential Documents*, 2006 **World in Crisis** Guglielmo

Carchedi, Michael Roberts, 2018-10-01 Most mainstream economists view capitalism's periodic breakdowns as nothing more than temporary aberrations from an otherwise unbroken path toward prosperity For Marxists this fundamental flaw has long been acknowledged as a central feature of the free market system This groundbreaking volume brings together Marxist scholars from around the world to offer an empirically grounded defense of Marx's law of profitability and its central role in explaining capitalist crises *World in Crisis* has a specific aim to provide empirical validity to the hypothesis that the cause of recurring economic crises or slumps in output investment and employment in modern economies can be found in Marx's law of the tendential fall in the rate of profit Marx believed and we agree that this is the most important law in political economy from the preface **The Realities of Reality - Part IV: The Reality Behind Achieving World Peace** Fritz Dufour, MBA,

DÉSS, 2020-04-05 This book is organized in seven chapters Chapter one looks at the origins and the causes of war The chapter argues that war is a consequence of how we as a species have evolved War has both endogenous and exogenous causes While the former depends on our biology and psychology the latter has to do primarily with international relations Chapter two makes the case for the paradoxical nature of war While war takes lives it is legitimate under certain circumstances For example armed humanitarian interventions are allowed to save lives among local populations at the expense of the oppressors by employing all necessary means ethical or not Chapter three asks if peace among nations is achievable which is the main theme of this book However it does not elaborate on the question entirely Instead it gives sort of a prelude of what will be discussed in the remaining of the book by talking about the concepts of world order and American hegemony arms race and peacebuilding Chapter four builds on three by looking at realism idealism and pacifism in international relations As to pacifism the chapter attempts to answer the question what was the most peaceful time in history Chapter five presents the elements of hope for world peace by considering the role played by the following 1 the United Nations 2 the North Atlantic Treaty Organization NATO 3 the Organization for Security and Cooperation in Europe OSCE 4 the non governmental organizations NGOs 5 the role of nuclear deterrence 6 globalization 7 transnationalism 8 diplomacy 9 sports 10 international cooperation in space exploration 11 the Nobel Prize and 12 the declining of war and violence in

modern times On the other hand chapter six presents the opposite argument or the barriers to world peace using the following points 1 the proliferation of nuclear weapons 2 geoeconomics 3 terrorism 4 the global refugee crisis 5 the profitability of arms sales and 6 the profitability of wars It makes an interesting argument especially as to the profitability of wars by showing how the United States first emerged as an imperial and a world power in the 1890s then as the only world superpower after World War II Finally chapter seven takes a proactive approach by peering into the future of armed conflict which is likely to take place in new environments Cyberspace the littoral choke points near space and increasingly in expanding cities or slums War The chapter concludes with a discussion on the Doomsday Clock a concept stemmed from the uncertainty as to the future of mankind because of armed conflicts and which is a symbol that represents the likelihood of a man made global catastrophe

Local and Regional Development During the 1990s Transition in Eastern Europe Markku Tykkyläinen,1995 A collection of papers presented by the Summer Institute of the Regional Science Association on the spatio economic restructuring of various emerging market economies in Europe They elaborate on the socio economic transitions in Central and Eastern Europe during the last five years

The Political Economy of the Eurozone in Central

and Eastern Europe Krisztina Arató, Boglarka Koller, Anita Pelle, 2021-06-30 The idea for this volume came from the enigma that some Central and Eastern European CEE European Union EU member states have been keen to join the Eurozone while others have shown persistent reluctance Moreover the attitudes towards joining have seemingly not correlated with either the level of economic development or the time spent as part of the EU nor with any other rational reason such as the level of integration into the EU real economy or the level of trust in the EU on the part of the public Therefore at first sight the answer to the question why in why out remains rather unclear The attractiveness of the currency union has nevertheless not disappeared for the CEE countries Despite the Eurozone crisis of 2010 13 it was during that time that the Baltic states introduced the euro Then after a few years of inactivity Croatia and Bulgaria successfully applied for membership of the exchange rate mechanism in July 2020 amid the economic crisis caused by the coronavirus COVID 19 pandemic At the same time the three Visegrad countries still using their national currencies Poland Czechia and Hungary no longer have a target date to join the monetary union This volume aims to discuss these issues from horizontal aspects and through country studies with contributions from expert authors from or closely related to the CEE region

Transformation of Cities in Central and Eastern Europe F. E. Ian Hamilton, Kaliopa Dimitrovska Andrews, Nataša Pichler-Milanović, 2005 Annotation This volume is one in a series initiated by the United Nations University Institute of Advanced Studies on the inter relationship between globalisation and urban transformation It identifies and describes the inter and intra urban transformations of Central and Eastern European cities and considers their pre 1945 historic legacies the socialist period and their contemporary transition towards market oriented and democratic systems The dramatic changes since 1989 including the collapse of Communist ideology the break up of the Soviet Union Czechoslovakia and Yugoslavia the end of the Cold War and the impact of globalisation and European integration have reconfigured this region and affected their re integration into European and global networks This book first examines the similarities and differences between significant Central and Eastern European cities comparing the differing patterns of historical context and socialist legacies before 1990 and the impacts of internal and external forces on re shaping these cities and their paths of transformation since 1990 It also examines the role of contemporary planning within the overall development of Central and Eastern European cities The conclusion demonstrates the similarities and differences between Central and Eastern European cities and their re integration into global networks
