*Academic Library Cataloging Practices Benchmarks*, 2008. This 254 page report presents data from a survey of the cataloging practices of approximately 80 North American academic libraries. In more than 630 tables of data and related commentary from participating librarians and our analysts the report gives a broad overview of academic library cataloging practices related to outsourcing selection and deployment of personnel salaries the state of continuing education in cataloging and much more. Survey participants also discuss how they define the catalogers range of responsibilities how they train their catalogers how they assess cataloging quality whether they use cataloging quotas or other measures to spur productivity what software and other cataloging technology they use and why and how they make outsourcing decisions and more. Data is broken out by size and type of college and for public and private colleges. Just a few of the reports many findings are presented below. More than 70% of the libraries in the sample say that their catalogers have salary levels that are comparable to those of public service librarians at their institutions. About 27.3% of the survey participants routinely use paraprofessional staff for original cataloging. Public colleges were more than three times more likely than private colleges to use paraprofessionals for original cataloging and larger colleges were more than twice as likely as smaller ones to do so. 41.56% of the libraries in the sample outsource authority control obtaining new and updated authority records. About 15.6% of the libraries in the sample outsource the cataloging of e journals. Close to 28% of research universities do so. 20.78% of libraries in the sample use MarcEdit or other MARC editor to preview records and globally edit to local standards prior to loading. 29.7% of the libraries in the sample have technical services areas that track turnaround time from Acquisitions receipt to Cataloging to shelf ready distribution. About 24.7% of the libraries in the sample use paraprofessional support staff for master bibliographic record enrichment in OCLC. Most of those doing so were public colleges and offered beyond the B.A. degree. Authority control experience was considered a very important criterion for hiring by only 8.11% of survey participants.

while a bit more than 35% considered it important 21 62% considered authority control experience not so important as a hiring criterion      Cataloging Library Resources Marie Keen Shaw,2017-01-26 While there are many cataloging texts very few are written specifically for library support staff This is the one and only book purposefully aligned with the new American Library Association Library Support Staff Certification LSSC competency standards for Cataloging and Classification Written in clear language by someone who teaches cataloging in a library support staff program and featuring practical examples Cataloging Library Resources An Introduction will help library support staff become effective catalogers Other books on this topic are written for professional librarians rather than support staff And although 85% of library support staff do not hold professional degrees many are expected to do the complex and technical work of catalogers This book provides many examples that support staff can use to learn how to catalog all types of library print media and digital materials using the most up to date Library of Congress standards Using this handbook as a guide readers will be able to perform the ALA LSSC cataloging and classification competencies and the new RDA FRBR and BIBFRAME standards listed below Apply and manage the appropriate processes computer technology and equipment for cataloging and classification Apply principles of Resource Description and Access RDA and the Functional Requirements for Bibliographic Records FRBR when creating cataloging records Apply principles of the Bibliographic Framework Initiative BIBFRAME and utilize the BIBFRAME model to create cataloging records Use the basic cataloging and classification tools both print and online including bibliographic utilities and format standards Understand the value of authority control and its basic principles and can identify and apply appropriate access points for personal names corporate bodies series and subjects Explain the value and advantages of cooperative or collaborative cataloging practices to enhance services Know the basics of standard metadata formats and cataloging rules to select review and edit catalog records and to generate metadata in various formats And more      **How to Catalog a Library** Henry Benjamin Wheatley,1889      Radical Cataloging K.R.
