Small Firms And Entrepreneurship In Central And Eastern Europe:

Small Firms and Entrepreneurship in Central and Eastern Europe Oliver Pfirrmann, Günter H. Walter, 2012-12-06 Much of the research on transformation transition in Central and Eastern European Countries CEECs focuses on macroeconomic issues inflation economic growth employment Little research has been devoted so far to microeconomic analysis Recently the issue of new enterprises and firm founders has moved to the centre of economic and policy considerations Readers of this book will learn about the role played by these firms in the transformation of central and eastern European countries The book also includes contributions from Central and Eastern Europe on which little or no investigation has been performed until now Yugoslavia Romania Slovakia

Small Firms and Entrepreneurship Zoltan J. Acs, David B. Audretsch, 1993-03-11 This book analyses the relative importance of small firms in industrial economies It brings together a series of studies spanning a spectrum of selected countries in developed Western nations and Eastern Europe to identify the exact role of small firms and how this role has evolved A striking result which emerges is that a distinct and consistent shift away from large firms and towards small enterprises has occurred within the manufacturing sector of all Western countries while the role of small firms in Eastern European nations has been remarkably restricted and indeed all these countries have experienced a shift away from small firms It is clear from this analysis that a major challenge for political and economic reform in Central and Eastern Europe is to create the strong entrepreneurial sector which exists in the West

Small Firms and Entrepreneurship David B. Audretsch, Zoltan J. Acs, 2011 The present analysis brings together a series of studies across a spectrum of selected countries in developed Western nations and Eastern Europe to identify the exact role of small firms and how that role has evolved during the fifteen years preceding the publication of the book in mid nineties The studies included provide systematic evidence on the following issues first the role of small firms and the extent to which they account for economic activity and how this varies across nations second how the role of small firms varies across sector and industries third whether the firm size distribution has shifted towards or away from small businesses Results emerging from the present studies indicate that a consistent shift away from large firms and towards small businesses has occurred within the manufacturing sector of all Western countries in the time period under discussion In contrast Eastern European countries had experienced a shift away from small enterprises The major challenge for political and economic reform in Central and Eastern Europe that emerges from these analyses is how to create the strong entrepreneurial sector which exists in the West Chapters 2 through 7 focus on the role of small firms in the economies of the United States and Western Europe UK West Germany Netherlands Portugal and Italy Among the findings New business formation in the 1980s in the United Kingdom had led to a significant increase in the number of businesses in the service sectors but not nearly as much increase in manufacturing Small firms in West Germany are not a source of dramatic

job generation The decrease in average firm size for the West German economy as a whole can more or less completely be explained by the change in sectoral composition When the employment measure is used no significant shift in the size of firms in the overall US economy between 1976 and 1986 is noticed However when the sales measure is used a slight trend towards smaller firms can be identified By contrast within the manufacturing sector a pronounced shift away from large firms and towards small businesses had occurred This trend is less apparent when the employment measure is used but much stronger when the sales measure is applied Smaller firms have provided the bulk of employment in the Netherlands and there has been a shift towards an increased importance of smaller scale enterprises In Portuguese manufacturing entry barriers namely economies of scale and product differentiation had a negative impact on small firm intensity and small firms avoided export oriented industries that are characterized by more intense competition In the Italian economy there has been great turbulence among small firms While small firms have persisted since the early 1950s there has been recent growth structural changes in the economy and changes in relationship with large firms Chapters 8 through 10 focus on Czechoslovakia East Germany and Poland respectively The examination of the role of small firms in Czechoslovak manufacturing offers an alternative to the often fallacious description of firm behavior in the command economy as a strict government controlled hierarchical structure through an analysis of Czechoslovak manufacturing firms within the context of the economic strategy based on the returns to scale paradigm The enterprise structure of the past in East Germany has been changing rapidly this study emphasizes which specific preconditions should be promoted in order to facilitate a vital entrepreneurial sector A chapter on the implications of the Polish economic reform for small business adds to the discussion of the development of small business in Poland during the transformation from central planning to a market economy using a sample of small businesses in the area around and including Gdansk The final ch

Handbook of Research on Entrepreneurship Policies in Central and Eastern Europe Friederike Welter, David Smallbone, 2011 This unique Handbook explores the role of government in the development of entrepreneurship in countries where twenty years ago private enterprise was illegal or barely tolerated The expert contributors reveal that government policy is one of the key influences on the external environment in which businesses develop particularly in countries where it has been necessary to redefine the role of the state in relation to business development They outline how government policy can also act as an enabling and or a constraining force with respect to entrepreneurship development particularly in relation to institutional change and the development of a market based economy This Handbook includes up to date information and analysis as to how entrepreneurship policies have evolved in the wider Europe focusing on the challenges that arise in designing and implementing entrepreneurship policy The Handbook of Research on Entrepreneurship Policies in Central and Eastern Europe excellently covers different facets of entrepreneurship policies in Central and Eastern Europe and will prove invaluable for academics students and researchers of entrepreneurship and small business as well as policy studies Policy

makers will also find plenty of key insights and relevant information in this important resource *Small Businesses Trickling Up in Central and Eastern Europe* Galen Spencer Hull, 2013-01-11 First published in 1999 Small businesses now constitute the most dynamic element of growth in the emerging markets of the Central and Eastern European region This book argues that the small and medium sized enterprise SME sector has contributed more to the growth of these countries in transition than have privatized state enterprises and the public sector In 1989 most of the countries of Eastern and Central Europe were still under an economic system dominated by state owned enterprises Since then a process of liberalization has been unleashed to promote free market policies This has involved programs of privatization and restructuring of public enterprises as well as the promotion of policies to enable a private sector to develop Small businesses are creating thousands of new jobs while large companies are retrenching and downsizing their work force In some countries of the region this process is much further along than in others However the SME sector has developed at a more rapid pace than has the privatization of the large public companies There has been a flurry of new enterprises springing up throughout the region which are trickling up in a frequently hostile environment against tremendous odds and yet managing to have a pronounced impact on their respective economies Small businesses have taken over in sectors that used to be dominated by big enterprises primarily in services and consumer products They have provided a crucial outlet for pent up entrepreneurial talent that had remained dormant during the long period of state domination This work urges legislators policy makers and development agencies alike to take account of the importance of the SME s in their legislation and planning Given a more favorable environment these small businesses will provide even greater impetus for economic growth Equally important is for entrepreneurs themselves to be convinced of the rightness of their path in societies that have traditionally looked down upon profit seekers as unscrupulous and selfish If the CEE region is to achieve its full potential of economic growth policies and support mechanisms to promote the SME sector will be needed to assure a favorable environment *Youth*

Entrepreneurship and Local Development in Central and Eastern Europe Bruno Dallago, 2017-11-30 This book analyses the opportunities and barriers for youth entrepreneurship amid systemic change in Central and Eastern Europe The authors cover different aspects of youth entrepreneurship and its contribution to the debate on youth unemployment in transition economies The book discusses the wide spread over optimism regarding youth entrepreneurship self employment and its impact on economic innovation and job creation resulting from a disregard of critical contextual features and the characteristics of young entrepreneurs themselves The authors give due acknowledgment of the importance of both factors and so fully understand the impediments to youth entrepreneurship especially in a transition context Furthermore they seek to assess the opportunities and constraints of promotion policies in transition economies Most importantly the book provides the first empirical contribution to youth entrepreneurship in Central and Eastern Europe by offering a representative number of case studies The book will be invaluable reading for scholars and students of transition and developing countries

particularly those with an interest in entrepreneurship *Entrepreneurship in Central and Eastern Europe* Tõnis Mets, Arnis Sauka, Danica Purg, 2018-03-14 The process of the transition to a market oriented economy for countries from Central and Eastern Europe CEE and the Commonwealth of Independent States CIS started some 25 years ago A new technology base triggered the fast growth of new investments into intangible assets by global economic leaders at the beginning of the 1990s providing the basis for a move towards a knowledge economy During the past 25 years entrepreneurs in CEE and the CIS have reshaped traditional industries and created new industries combining innovative ideas with traditional competencies Yet we still do not know very much about how and why companies led by entrepreneurs develop how they expand globally and what the role of new knowledge and innovation is in the internationalization process Understanding the pathways of entrepreneurial development especially growth through internationalization is important for the overall development of countries in transition and beyond *Entrepreneurship in Central and Eastern Europe Development through*
