**Raymond Joseph LeBlanc**

## Smoking Hills:

*Pyrometamorphism* Rodney Grapes, 2006-06-18 Pyrometamorphism occurs at very high temperatures 800 1000 C and low pressures 2 kb and typically results in the formation of burnt and fused rocks termed buchites paralavas clinkers and fulgarites It is typically associated with shallow basaltic intrusions contact aureoles xenoliths combustion of carbonaceous matter lightning strikes and is also found in meteorites During pyrometamorphism the sequence of heating and cooling is greatly condensed favouring the preservation of a variety of stranded reaction microstructures that reflect disequilibrium reaction kinetics with metastable and mineral crystallisation Crane Site and the Palaeoeskimo Period in the Western Canadian Arctic Raymond Joseph LeBlanc, 1993-01-01 A report on the Crane Site Obkv I a Palaeoeskimo component located along the Old Horton River Channel in the interior of the Cape Bathurst Peninsula about 250 km east northeast of Tuktoyaktuk Many of the artifacts show strong affiliation in a variety of typological categories with the Lagoon Site on Banks Island which was influenced by the Norton and Dorset cultures The detailed similarities as well as comparable material on Melville Island provide the basis for the definition of the Lagoon complex a regional cultural complex that existed during the period of change from the Pre Dorset to the Dorset phases of the Palaeoeskimo continuum Published in English

**Geological Survey of Canada, Open File 2341 , Views of Nature** Alexander von Humboldt, 1872 **Views of Nature Or Contemplations on the Sublime Phenomena of Creation, with Scientific Illustrations by Alexander Von Humboldt** Alexander : von Humboldt, 1850 **Views of Nature: Or, Contemplations on the Sublime Phenomena of Creation, with Scientific Illustrations** Wilhelm Freiherr von Humboldt, 1850 Views of nature: or, Contemplations on the sublime phenomena of Creation, tr. by E.C. Otté and H.G. Bohn Friedrich Wilhelm H. Alexander freiherr von Humboldt, 1850 **Aspects of Nature in Different Lands and Different Climates Volume 1** Alexander von Humboldt, 2022-03-09 Excerpt It is not without diffidence that I present to the public a series of papers which took their origin in the presence of natural scenes of grandeur or of beauty on the Ocean in the forests of the Orinoco in the Steppes of Venezuela and in the mountain wildernesses of Peru and Mexico Detached fragments were written down on the spot and at the moment and were afterwards moulded into a whole The view of Nature on an enlarged scale the display of the concurrent action of various forces or powers and the renewal of the enjoyment which the immediate prospect of tropical scenery affords to sensitive minds are the objects which I have proposed to myself According to the design of my work whilst each of the treatises of which it consists should form a whole complete in itself one common tendency should pervade them all Such an artistic and viii literary treatment of subjects of natural history is liable to difficulties of composition notwithstanding the aid which it derives from the power and flexibility of our noble language The unbounded riches of Nature occasion an accumulation of separate images and accumulation disturbs the repose and the unity of impression which should belong to the picture Moreover when addressing the feelings and imagination a firm hand is needed to guard the style from

degenerating into an undesirable species of poetic prose But I need not here describe more fully dangers which I fear the following pages will shew I have not always succeeded in avoiding      **Views of Nature** Alexander von Humboldt, 2014-07-17

The German naturalist and explorer chronicles his 1799 expedition to Central and South America in this classic work of natural history While the influence of Alexander von Humboldt 1769 1859 looms large over the natural sciences his legacy reaches far beyond the field notebooks of naturalists Humboldt s 1799 1804 research expedition to Central and South America with botanist Aim Bonpland not only set the course for the great scientific surveys of the nineteenth century but also served as the raw material for his many volumes works of both scientific rigor and aesthetic beauty that inspired such essayists and artists as Emerson Goethe Thoreau Poe and Frederic Edwin Church Views of Nature or Ansichten der Natur was Humboldt s best known and most influential work and his personal favorite While the essays that comprise it are themselves remarkable as innovative early pieces of nature writing they were cited by Thoreau as a model for his own work the book s extensive endnotes incorporate some of Humboldt s most beautiful prose and mature thinking on vegetation structure its origins in climate patterns and its implications for the arts Written for both a literary and a scientific audience Views of Nature was translated into English twice Spanish and French in the nineteenth century and it was read widely in Europe and the Americas But in contrast to many of Humboldt s more technical works Views of Nature has been unavailable in English for more than one hundred years Largely neglected in the United States during the twentieth century Humboldt s contributions to the humanities and the sciences are now undergoing a revival to which this new translation will be a critical contribution Praise for Views of Nature Alexander von Humboldt s wide ranging Views of Nature is a masterpiece of nineteenth century natural history at once science and art Mark W Person s stunning new translation makes the wonders of this classic accessible to the English language world of the present Daniel Walker Howe author of the Pulitzer Prize winning What Hath God Wrought From the plains of Venezuela to volcanoes and waterfalls von Humboldt combines observations with travel narratives and philosophical musings Annotations really help provide a context to the essays this work also includes an index conversions for von Humboldt s various measurement units an introduction and preface This excellent translation of one of von Humboldt s most important works should introduce this great naturalist to an entirely new audience Edward J Valauskas curator of Rare Books Library Chicago Botanic Garden Current Books on Gardening and Botany      **Aspects of Nature, in Different Lands and Different Climates** Alexander von Humboldt, 1849
