Dynamic Knowledge Representation in Scientific Domains Pshenichny, Cyril, Diviaco, Paolo, Mourmtsev, Dmitry, 2018-03-16 The main approach to understanding and creating knowledge engineering concepts is static knowledge. Currently, there is a need to approach knowledge through a dynamic lens and address changing relations on an elaborated syntactic and semantic basis. Dynamic Knowledge Representation in Scientific Domains provides emerging research on the internal and external changes in knowledge within various subject areas and their visual representations. While highlighting topics such as behavior diagrams, distribution analysis, and qualitative modeling, this publication explores the structural development and assessment of knowledge models. This book is an important resource for academicians, researchers, students, and practitioners seeking current research on information visualization in order to foster research and collaboration.

Commission on Obscenity and Pornography, 1971 *Physics and Ecology in Fluids* Marek Stastna, Derek Steinmoeller, 2023-02-01 Physics and Ecology in Fluids Modeling and Numerical Experiments develops mathematical and numerical modeling methodologies for coupled biological hydrodynamic problems with a focus on process studies. The modeling is presented in a way that discusses mathematical background but does not depend on a large body of mathematical prerequisites or experience. Models are built up from simple to complex. This includes discussion of approximations and shortcuts commonly made by large computational models for natural bodies of water. Computational approaches are presented using conceptual explanations and pseudo code along with well-documented open source code. Over a dozen codes that run locally on the reader's laptop provide hands-on experience with various aspects of the modeling process and its scientific results. One large-scale code for basin-scale modeling based on the Discontinuous Galerkin
