tablets has been a particularly exciting development in recent years. The benefits offered by these technologies such as their portability, connectivity, accessibility, and range of media present new challenges and opportunities for teaching and learning. As the take up of tablets gathers pace in our schools, there is a need for advice on the best approaches and apps to help achieve successful learning outcomes. Teachers need to find meaningful ways to integrate the devices into their own practice and to evaluate which of the many thousands of educational apps might be appropriate for their pupils. This book considers how iPads and tablets can be used to enhance teaching and learning in primary schools. It is especially relevant in the light of the computing curriculum which puts a new emphasis on children as makers and creators of digital content. Across other curriculum subjects too, the introduction of mobile devices that can be quickly and reliably accessed has precipitated a shift in practice. For example, they have enabled teachers and children to spontaneously pursue lines of inquiry, to connect, collaborate, and publish in many different ways, and to use their digital skills to enhance their exploration of the physical world outside the classroom. With these opportunities in mind, we offer anecdotes from the classroom and examples of how tablets might be embedded within current pedagogy and practice as a natural learning tool. Each chapter combines a practical case study with discussion of related pedagogy and recommends apps to support a personalised, inclusive, and active approach to teaching and learning.

*Gaps and the Creation of Ideas*. Judith Seligson, 2021-03-08. *Gaps and the Creation of Ideas*. An Artist's Book is a portrait of the space between things, whether they be neurons, quotations, comic book frames, or fragments in a collage. This twenty-year project is an artist's book that juxtaposes quotations and images from hundreds of artists and writers with the author's own thoughts. Using Adobe InDesign for composition and layout, the author has structured the book to show analogies among disparate texts and images. There have always been gaps, but a focus on the space between things is virtually synonymous with modernity. Often characterized as a break, modernity is a story of gaps. Around 1900, many independent strands of gap thought and experience interacted and interwove more intricately: Atoms, textiles, theories, women, Jews, collage, poetry, patchwork, and music figure prominently in these strands. The gap is a ubiquitous phenomenon that crosses the boundaries of neuroscience, rabbinic thinking, modern literary criticism, art, popular culture, and the structure of matter. This book explores many subjects, but it is ultimately a work of art.
