**Global Modernism** Vikramaditya Prakash,Maristella Casciato,Daniel E. Coslett,2021-11-22 This anthology collects developing scholarship that outlines a new decentred history of global modernism in architecture using postcolonial and other related theoretical frameworks By both revisiting the canons of modernism and seeking to decolonize and globalize those canons the volume explores what a genuinely global history of architectural modernism might begin to look like Its chapters explore the historiography and weaknesses of modernism s normative interpretations and propose alternatives to them The collection offers essays that interrogate transnationalism in new ways reconsiders the agency of the subaltern and the roles played by infrastructures materials and global institutions in propagating a diversity of modernisms internationally Issues such as colonial modernism architectural pedagogy cultural imperialism and spirituality are engaged With essays from both established scholars and up and coming researchers this is an important reference for a new understanding of this crucial and developing topic      *Immigrant Industry* Anoma Pieris,Mirjana Lozanovska,Dr Alexandra Dellios,Andrew

Saniga,2024-08-02 After the end of the Second World War migrants were critical to the spatial making of modern Australia Major federally funded industries driving postwar nation building programs depended on the employment of large numbers of people who had been displaced by the war Directed to remote rural and urban industrial sites migrant labor and resettlement altered the nation s physical landscape providing Australia with its contemporary economic base While the immigrant contribution to nation building in cultural terms is well known its everyday spatial architectural and landscape transformations remain unexamined This book aims to bring to the foreground postwar industry and immigration to

comprehensively document a uniquely Australian shaping of the built environment      *Australian Alps* Deirdre Slaterry,2015-12 Australian Alps is a fascinating guide to Kosciuszko Alpine and Namadgi National Parks It introduces the reader to Australia s highest mountains their climate geology and soils plants and animals and their human history It traces the long running conflicts between successive users of the mountains and explores the difficulties in managing the land for nature conservation The book gives credit to little known or understood stories of the people who have worked to establish better understanding of the Alps especially their vital role as the major water catchments for south eastern Australia This new edition updates many themes including the involvement of Aboriginal people in the region catchment function and

**Bid For The Atomic Bomb** Reynolds, Wayne,1997-02-11 This very important work is a fundamental rewriting of Australian history from 1943 to 1968 It argues that after World War II Australian defence policy was premised on Joint nuclear weapons development with the United Kingdom and that while this endeavour failed it shaped domestic and foreign policy until the end of the 1950s Nuclear weapons have traditionally been seen as American and British concerns and various official histories have held that the development of rockets and atomic weapon testing were essentially British exercises But author Wayne Reynolds reveals an entirely new perspective on Australia s role in these events Australia s Bid for the Atomic Bomb examines the implications of this for major social political and security issues and developments in Australia s recent history This work will arouse considerable media interest and will appeal to anyone interested in Australia s political and military history *Migrant Men* Mike Donaldson,Raymond Hibbins,Richard Howson,Bob Pease,2009-09-11 This edited volume

political contexts from the birth of the nation in 1901 until the advent of the so called modern era of environmental regulation in the late 1960s It rejects the mythology that Australia lacked environmental law before the late 1960s in revealing how many of today s environmental laws from pollution control to nature conservation emerged from precedents or events much earlier in the 20th century This history however reveals a discrepancy between lawmakers greater efficacy to exploit rather than protect the environment a discrepancy that grew as nature s backlash intensified in a rapidly degrading continent colonised to build the Australian nation In exploring these dynamics the book offers a rich tapestry of case studies illustrated with historic photographs that show the origins of Australia s environmental laws and how they borrowed from international precedents or furnished lessons for other nations Through its multi disciplinary enquiry the book offers scholars and students of environmental law legal history and the environmental humanities a unique story about the failures and successes in the making of environmental law The ebook editions of this book are available open access under a CC BY NC ND 4 0 licence on [bloomsburycollections.com](http://bloomsburycollections.com)      [Encyclopedia of Architectural and Engineering Feats](#) Christine Garnaut,2001-12-06 Encyclopedia of Architectural and Engineering Feats presents more than 200 achievements in architecture and structural engineering in all the inhabited continents from prehistory to the present An architect once described the built environment as the manifestation of the human spirit in stone wood and steel In this new volume readers can explore the most innovative and magnificent architectural expressions of the human spirit from pre history to the present from all parts of the world Readers can visit the Acropolis and Chartres cathedral along with less familiar places like the ruins of Great Zimbabwe once the greatest city in sub Saharan Africa and China s 71 meter high 1 200 year old Grand Buddha carved from stone They ll learn the secrets behind audacious engineering feats like the Panama Canal the U S interstate highway system and the Deltaworks in the Netherlands They will discover that many of these awe inspiring projects were not the work of trained architects and engineers but of underdeveloped communities where unified will tight social organization and shared commitment to a spiritual ideal were more important than the inventions of the Industrial Age
