Strength-based Teaching Tim Carman, 2005 Written to provide a school community with the knowledge to successfully close the achievement gap this book is ideal for the undervalued staff and the shadow kids that are threatened by the prospect of school failure **iLead** Joseph Sherren, 2011-11-11 iLead will shift how you think about management forever Best selling author and international speaker Joseph Sherren s new book provides a comprehensive overview of sensible and actionable analyses that managers can apply to themselves their people and the workplace Over the next fourteen years we will see more transition in the workplace than at any other time in the past The make up of work will be so different that we may look back on this year the way we do a typewriter or a dial phone today But we can predict even now many of the changes and how we can respond to them In work as in life it s our response to challenges that is crucial *The Other 90%* Robert K. Cooper, 2010-02-10 For centuries it has been assumed that there are vast limits to human capacity Now although a host of scientific discoveries prove this wrong a mindset of limits persists blocking us from our greatest possibilities and leaving us feeling bombarded by stress change and uncertainty No matter how hard we work no matter how much we give we re still not getting what we hoped for There is another way Dr Robert Cooper a neuroscience pioneer and leadership advisor urges us to take a radically different view of human capacity We are mostly unused potential he says employing less than 10 percent of our brilliance or hidden talents In easy to follow steps he explains how to develop and apply the art and science of your hidden capacity The art is the motivation and inspiration coming from the wonderful stories that are the heart of *The Other 90%* Dr Cooper draws on his wide ranging insights and experiences to show how it s possible to make a difference in yourself and others However inspiration without a way to turn vision into reality is an empty vessel Combining art with science Dr Cooper provides extraordinary help in the form of specific little known practical ways to use the latest research in neuroscience performance psychology and work physiology for excelling in a pressure filled world He shows you how to Increase energy at work and have more energy for personal and family life Activate the brain s alertness switches to defeat pressure and stress Use not only the brain in your head but the ones in your heart and gut Motivate exceptional ingenuity and performance in yourself and others The most exciting breakthroughs will not come from advances in technology but from a deeper realization of what it means to be most human and alive Many of the choices that can dramatically change our lives are simple and practical yet few people know what these choices are or how to apply them in work and life *The Other 90%* is your guide to new territory and new challenges *The Art of People* Dave

book explains how a teaching system focused on identifying and stoking each student's strengths rather than concentrating on deficits can bring remarkable academic improvement and achievement. It's a familiar and seemingly logical model to improve performance: identify weaknesses and target these problem areas. Could doing the opposite be a better way? Licensed clinical psychologist Elsie Jones Smith argues that strengths-based systems are indeed more effective, not just in social work where the philosophy became popular or in the business world where the concept is increasingly being embraced, but in the academic setting as well. *Spotlighting the Strengths of Every Single Student: Why U.S. Schools Need a New Strengths-Based Approach* explains how and why a system that focuses on students' strengths enables kids to be self-confident, goal-directed, and to possess a stronger sense of self-efficacy, self-control, and academic achievement. Jones Smith also explains how such a system spurs appreciation and advancement of multiple intelligences, which in turn gives students the ability to address weaknesses on their own. Another plus: this approach has also been shown to generally reduce school disciplinary actions and increase class attendance time.
