Network Epidemiology Martina Morris, 2004-03-18 Over the past two decades the epidemic of HIV AIDS has challenged the public health community to fundamentally rethink the framework for preventing infectious diseases While much progress has been made on the biomedical front in treatments for HIV infection prevention still relies on behaviour change This book documents and explains the remarkable breakthroughs in behavioural research design that have emerged to confront this new challenge the study of partnership networks Traditionally public health research focused on the knowledge attitudes and practices KAP of individuals an approach designed for understanding health related behaviour like seat belt wearing and cigarette smoking For HIV and other sexually transmitted infections however there are at least two people involved in transmission This may not seem like a big difference but in fact it changes everything First it means that your risk depends on your partners and on their partners and their partners it depends on your position in the network of partnerships Consider for example the rise of infections among monogamous women Second it means that individuals are not free to simply change their behaviour condom use or abstinence needs to be negotiated with a partner both the epidemiology of risk and constraints to behaviour are therefore a function of the partnership network And our ability to design effective prevention strategies depends on our ability to measure and summarize that network Using the traditional research designs you would not see this network at all you would only see the unconnected nodes They key to solving this problem lies in Network Analysis before now a relatively obscure subfield in Sociology For empirical studies of networks to become feasible however many problems had to be solved This book documents the rapid progress that has been made It brings together eight pioneering studies that have sought to map the networks that spread infection around the world Each chapter reviews the questions that drove the study the changes in methodology that were needed to implement the network survey the mistakes and successes encountered and the central findings that the network design made possible An introduction provides an overview of network survey design a glossary provides a summary of network terminology and example questionnaires from each study provide a template for further research This is a unique and valuable resource for the international public health research community

conventional this book aligns insightful sociological inquiry with an ongoing regional phenomenon **Family and HIV/AIDS** Willo Pequegnat, Carl Bell, 2011-10-22 Three decades into the HIV pandemic the goals remain clear reduce the number of infections improve the health outcomes of those who are infected and eliminate disparities in care And one observation continues to gain credence families are a powerful resource in preventing adapting to and coping with HIV Recognizing their complex role as educators mentors and caregivers Family and HIV AIDS assembles a wealth of findings from successful prevention and intervention strategies and provides models for translating evidence into effective real world practice Chapters spotlight the differing roles of mothers and fathers in prevention efforts clarify the need for family community collaborations and examine core issues of culture ethnicity gender and diagnosis e g minority families adolescents with psychological disorders Throughout risk reduction and health promotion are shown as a viable public health strategy A reference with considerable utility across the health mental health and related disciplines Family and HIV AIDS will be a go to resource for practitioners working with families researchers studying at risk populations administrators seeking to create new or evaluate existing prevention and care programs and policymakers involved in funding such programs Using Evidence to End Homelessness Teixeira, Lgia, Cartwright, James, 2020-04-29 Available open access under CC BY NC license Homelessness is unequivocally devastating In the UK people affected by homelessness are ten times more likely to die than their peers in the general population yet we still miss important opportunities to adequately address the issue The Centre for Homelessness Impact brings together this urgent book gathering the insights and experiences of leaders in government academia and the third sector to present new evidence based strategies to end homelessness Demonstrating why and how a new movement is needed that embraces data and evidence as integral to ending homelessness effectively this book provides crucial methods to underpin future policy practice and funding decisions *Lighting Up* Mimi Nichter, 2015-02-13 While the past 40 years have seen significant declines in adult smoking this is not the case among young adults who have the highest prevalence of smoking of all other age groups At a time when just about everyone knows that smoking is bad for you why do so many college students smoke Is it a short lived phase or do they continue throughout the college years And what happens after college when they enter the real world Drawing on interviews and focus groups with hundreds of young adults Lighting Up takes the reader into their everyday lives to explore social smoking Mimi Nichter argues that we must understand more about the meaning of social and low level smoking to youth the social contexts that cause them to take up or not take up the habit and the way that smoking plays a large role in students social lives Nichter examines how smoking facilitates social interaction helps young people express and explore their identity and serves as a means for communicating emotional states Most college students who smoked socially were confident that this was no big deal After all they were not really smokers and they would only be smoking for a short time But as graduation neared they expressed ambivalence or reluctance to quit As many grads today step into an uncertain future where the prospect of finding a good job in a timely manner is unlikely

their 20s may be a time of great stress and instability For those who have come to depend on the comfort of cigarettes during college this array of life stressors may make cutting back or quitting more difficult despite one s intentions and understandings of the harms of tobacco And emerging products on the market like e cigarettes offer an opportunity to move from smoking to vaping Lighting Up considers how smoking fits into the lives of young adults and how uncertain times may lead to uncertain smoking trajectories that reach into adulthood

Ready or Not Kay S. Hymowitz, 2008-06-30 Children today grow up so fast How often we hear those words uttered both in frustrated good humor and in dumbfounded astonishment Every day the American people hear about kids doing things both good and bad that were once thought to be well beyond their scope flying airplanes running companies committing mass murder Creatures of the information age today s children sometimes seem to know more than their parents They surf the Internet rather than read books they watch South Park instead of The Cosby Show they wear form fitting capri pants and tank tops instead of sundresses in short they are sophisticated beyond their years These facts lead us to wonder Is childhood becoming extinct In Ready or Not Kay S Hymowitz offers a startling new interpretation of what makes our children tick and where the moral anomie of today s children comes from She reveals how our ideas about childrearing itself have been transformed perniciously in reponse to the theories of various experts educators psychologists lawyers media executives who have encouraged us to view children as small adults autonomous actors who know what is best for themselves and who have no need for adult instruction or supervision Today s children and teenagers have been encouraged by their parents and teachers to function as individuals to such an extent that they make practically every decision on their own what to wear what to study and even what values they will adhere to The idea of childhood as a time of limited competence in which adults prepare the young for maturity has fallen into disrepute independence has become not the reward of time but rather something that our children have come to expect and demand at increasingly younger ages One of the great ironies of turning our children into small adults is that American society has become less successful at producing truly mature men and women When sophisticated children do grow up they often find themselves unable to accept real adult responsibilities Thus we see more people in their twenties and thirties living like children unwilling to embark on careers or to start families Until we recognize that children are different from grownups and need to be nurtured as such Hymowitz argues our society will be hollow at its core
