Social Class on British and American Screens Nicole Cloarec, David Haigron, Delphine Letort, 2016-03-15 At a time when debates about social inequality are in the spotlight it is worth examining how the two most popular media of the 20th and 21st centuries film and television have shaped the representation of social classes How do generic conventions determine the representation of social stereotypes How do filmmakers challenge social class identification How do factors such as national history geography and gender affect the representation of social classes This collection of new essays explores these and other questions through an analysis of a wide range of American and British productions from sitcoms and reality TV to documentaries and auteur cinema from the 1950s to the present

The Changing Social Structure of England and Wales David Marsh, 2013-08-21 This is Volume I of twenty one in the Class Race and Social Structure Series Originally published in 1958 this is the second edition of a study that now focuses on the changing social structure of England and Wales between 1871 and 1961 The main object of this book therefore as it was in the first edition is to introduce the student and the general reader to the maze of social statistics which have become available concerning the social structure of England and Wales The emphasis throughout is on applied or descriptive statistics and a knowledge of statistical techniques therefore those and they seem to be many who have an instinctive dislike of mathematics need not be deterred from following the attempt which has been made to analyse the changing social structure with the aid of social statistics

With the onset of a more conservative political climate in the 1980s social and especially labour history saw a decline in the popularity that they had enjoyed throughout the 1960s and 1970s This led to much debate on its future and function within the historical discipline as a whole Some critics declared it dead altogether Others have proposed a change of direction and a more or less exclusive focus on images and texts The most constructive proposals have suggested that labour history in the past concentrated too much on class and that other identities of working people should be taken into account to a larger extent than they had been previously such as gender religion and ethnicity Although class as a social category is still as valid as it has been before the questions now to be asked are to what extent non class identities shape working people s lives and mentalities and how these are linked with the class system In this volume some of the leading European historians of labour and the working classes address these questions Two non European scholars comment on their findings from an Indian resp American point of view The volume is rounded off by a most useful bibliography of recent studies in European labour history class gender religion and ethnicity **Evangelical Christianity in the United States and Great Britain** J.
