reference to a sample of the IFIs most important and controversial contemporary activities *Caring for Students Who Need It Most in Open Distance E-Learning Environments* Doniwen Pietersen, 2025-09-09 In a world where online education is too often reduced to transactional and very philosophical one size fits all instruction this book boldly redefines open distance digital learning ODeL as a space for radical transformation Bridging critical pedagogy care ethics and social justice it challenges the status quo by centering student agency dialogue and co creation in virtual classrooms Grounded in real experiences from developing universities this work exposes the limitations of traditional ODeL models where power imbalances and passive learning prevail and offers a compelling alternative Through actionable strategies vivid case studies and the voices of students themselves it equips educators to build inclusive democratic learning ecosystems that nurture both intellectual growth and socio emotional well being More than a critique this book is a manifesto for humanizing digital education It is essential reading for educators administrators and policymakers committed to making online learning a force for equity empowerment and meaningful connection in higher education Disentitlement? Timothy Stoltzfus Jost, 2003-04-10 This book is about health care entitlements in the US and about the threat of disenitment It describes the history and legal character of our Medicare and Medicaid programs and of the tax subsidies that have brought health insurance to most working Americans It examines the thread that our entitlements face from privatization individualism and devolution It considers the models that other countries have developed for health care entitlements and what we can learn from them The book concludes by proposing a redesigned entitlement based health care system for the future *The New Dispensation* Keshub Chunder Sen, 1903 **The Changing Distribution of Earnings in OECD Countries** A B Atkinson, 2008-05-01 This book is about how much people earn and why the distribution of earnings has been changing over time The gap between the top and bottom in the United States has widened significantly since 1980 Why has this happened Is it due to new technologies What is the role of globalisation Are there historical precedents The book begins with the race between technology and education and shows that continuing technical progress does not necessarily imply a continuing rise in dispersion It then examines the experience of 20 OECD countries over the twentieth century material presented in the form of 20 country case studies The book breaks new ground in assembling data on the distribution of individual earnings covering much of the twentieth century and drawing on a variety of under exploited sources The findings overturn a number of widely held beliefs It is not the earnings of the low paid that have been most affected by the recent changes widening is largely due to what is happening at the top The recent rise in earnings dispersion is not unprecedented but should be seen as part of a longer run history of successive compression and expansion of earnings differences Let Justice Roll Neal Riemer, 1996 Written by prominent scholars from a wide range of disciplines this diverse collection of essays discusses the contemporary relevance of the prophetic mode and challenges in the areas of religion politics and society The contributors critically investigate the creative interaction between the religious and secular domains and explain how the prophetic mode

can provide solutions to pressing problems such as war oppression poverty hunger and discrimination The essays explore possibilities of achieving an integration of prophetic ethics social scientific understanding and democratic and constitutional statecraft and they describe how the prophetic mode currently manifests itself in political philosophy history religion and literature
