Smith,1998-09-30 This addition to the Luftwaffe at War Series is a fully illustrated guide to the formative years of the Ju 87 dive bomber which dominated the opening campaigns of World War II **Stuka Volume Two** Peter C. Smith,Professor of Health Policy Imperial College Business School & Institute for Global Health Peter C Smith,2008-01-24 During the first phase of World War II the German forces advancing on all fronts the Ju87 Stuka had been an essential element in the Luftwaffe's armory attack However from mid 1943 as the War dragged on the Stuka began incurring heavy losses Dunkirk Warsaw Rotterdam and other early victories became distant memories as severe reversals came about in the East Wherever possible and often against overwhelming resources the Stukas supported the retreating German armies by conducting not just precision dive bombing missions but low level ground attack operations against enemy transport targets gun positions and ships This second and concluding volume in this series examines the role of the Stuka during these years of retreat Aspects of the Stuka's role which the book recounts includes the attacks against the Malta convoys the retreat in North Africa the war over the Arctic the Russian campaign including the battle for Stalingrad and the collapse of the Eastern front This volume contains an impressive selection of historic photos color artworks and first hand accounts from those who flew the aircraft *Combat Biplanes of World War II* Peter C. Smith,2015-09-30 Aviation and maritime historian Peter C Smith reveals how both Allied and Axis powers used World War I era aircraft in *Combat Biplanes of World War II* The era of the combat biplane is usually thought to have been between 1914 and 1938 By the outbreak of World War II most of the advanced air forces of the world had moved on to monoplane aircraft for their front line battle forces both in bomber and fighter capacities Yet despite this many biplanes did still survive both in front line service and in numerous subsidiary roles and not just as training machines but as fully operational warplanes Thus in 1939 the majority of major European powers still

retained some albeit few biplane aircraft Great Britain had the bulk of such obsolescent machines including the Gladiator Swordfish Walrus Vildebeeste and Audax while the inferior Albacore meant to replace the Swordfish had yet to enter service Germany still managed to conduct missions in which biplanes like the He 50 He 51 and Hs 120 excelled Both France and Italy had active biplanes Mussolini's Regia Aeronautica attaching great importance to the type as a fighter aircraft as late as 1941 while the Soviet Union also retained some machines like the Po 2 in front line service right through the war and beyond By the time Japan and the United States entered the war two years later they had mainly rid themselves of biplanes but even here a few specialized types lingered on Combat Biplanes of World War II describes many of these gallant old warriors representing the author's own personal selection from a surprisingly large range of aircraft that despite all predictions fought hard and well *Stukas Over The Mediterranean, 1940-45* Peter C Smith, 1999-10-31 This text examines the role of German and Italian Ju 87s in diverse campaigns such as the attack on Yugoslavia the battle for Crete and operations by the night flying squadrons *Air War on the Eastern Front* Mike Guardia, 2020-10-28 A pictorial history of Nazi Germany's entire air campaign against the Soviet Union on the Eastern Front in World War II The Red Air Force versus the Luftwaffe in the skies over Eastern Europe June 1941 Having conquered most of Western Europe Adolf Hitler turned his attention to the vast Soviet Union Disregarding his Non Aggression Pact with Joseph Stalin Hitler launched Operation Barbarossa a full scale invasion of the Soviet homeland aimed squarely at Moscow In the skies over Russia the battle hardened airmen of the Luftwaffe made short work of the Red Air Force during opening days of Barbarossa To make matters worse Stalin had executed many of his best pilots during the perennial purges of the 1930s Thus much of the Red Air Force was destroyed on the ground before meeting the Luftwaffe in the skies By 1944 however the Soviet airmen had regained the initiative and fervently wrested air superiority from the now ailing Axis Powers Will be of great interest to both modelers and aircraft historians alike AMPS Indianapolis This slim survey provides a quick convenient intro to the deadly totalitarian duel Make it a launchpad to further study of Eastern Front air combat in WWII Cybermodeler The prose is smooth and provides a top level look at WWII German and Soviet air warfare Historical Miniatures Gaming Society *Aircraft of World War II* Aaron R. Murray, 2015-12-15 This high interest volume introduces readers to the exciting world of World War II aircraft Through detailed diagrams of cockpits engines and weapons systems readers are given a bird's eye view inside an impressive collection of World War II aircraft including the United States P 51D Mustang which shot down more enemy aircraft than any other Allied fighter plane Also included are such heavy hitters as Japan's Zero fighter Germany's Messerschmitt Bf 109E and fearsome bomber aircraft like Britain's Lancaster bomber and the U S's B 29 Superfortress *Children's Propaganda Games of the Second World War* Nicholas Milton, 2024-07-31 From puzzles and cards to pinball and die games find out about the children's games produced as propaganda during World War II During the Second World War hundreds of games were manufactured by the British Germans and Americans aimed at children Despite being cheaply made due to the wartime

economy the games were often fun to play and challenging to win They also had considerable propaganda value helping to manipulate children into supporting the war To get their attention many of the games incorporated dramatic artwork and were based on real wartime events from the evacuation of children in 1939 to the dropping of the atomic bomb in 1945 This book features a large selection of different games produced by the British Germans and Americans and tells the stories behind their wartime propaganda The Nazis in particular prided themselves on producing games which promoted and glamourised war exploiting children s patriotism and pride in German conquests Some of their most insidious games included Juden Raus Jews Out and Bomber u ber England Bomber over England However the British and Americans also produced unethical games like Target for Tonight which promoted the carpet bombing of Germany and Atomic Bomb a dexterity puzzle about the nuclear bombing of Japan The games featured in this book include roll and move games with a board and die pinball and similar shooting games dexterity and other puzzles and card games They were made out of paper card wood rubber bakelite plastic and initially metal Remarkably despite wartime restrictions games were manufactured throughout the conflict to meet the demand from boys and girls as they closely followed the changing fortunes of the war Today many of the games have become scarce so for collectors a guide to their value and rarity is included *This is War* Pearson
