Style Society And Person Archaeological And Ethnological Perspectives:

Style, Society and Person Christopher Carr, Jill E. Neitzel, 1995-02-28 *Style Society and Person* integrates the diverse current and past understandings of the causes of style in material culture. It comprehensively surveys the many factors that cause style, reviews theories that address these factors, builds and tests a unifying framework for integrating the theories, and illustrates the framework with detailed analyses of archaeological and ethnographic data ranging from simple to complex societies. Archaeologists, sociocultural anthropologists, and educators will appreciate the unique unifying approach this book takes to developing style theory.

The Quoit Brooch Style and Anglo-Saxon Settlement Seiichi Suzuki, 2000 The quoit brooch style, a decorative style of animal and geometric motifs, is unique to southern England in the 5th century AD, with the greatest concentration of such items occurring in Kent. The author defines the style through an analysis of its design organization and by comparing it with near contemporary styles in England and on the continent; he identifies those features which make it unique.

Archaeological Perspectives on the Southern Appalachians Ramie A. Gougeon, Maureen Meyers, 2015-03-10 This volume demonstrates how archaeologists working in the Southern Appalachian region over the past 40 years have developed rich interpretations of prehistoric and historic Southeastern Native societies by examining them from multiple scales of analysis. The end results of these examinations demonstrate both the uses and the constraints of multiscale approaches in reconstructing various lifeways across the Southeast.

Roman Artefacts and Society Ellen Swift, 2017-01-26 In this book, Ellen Swift uses design theory, previously neglected in Roman archaeology, to investigate Roman artefacts in a

new way making a significant contribution to both Roman social history and our understanding of the relationships that exist between artefacts and people Based on extensive data collection and the close study of artefacts from museum collections and archives the book examines the relationship between artefacts everyday behaviour and experience The concept of affordances features of an artefact that make possible and incline users towards particular uses for functional artefacts is an important one for the approach taken This concept is carefully evaluated by considering affordances in relation to other sources of evidence such as use wear archaeological context the end products resulting from artefact use and experimental reconstruction Artefact types explored in the case studies include locks and keys pens shears glass vessels dice boxes and finger rings using material mainly drawn from the north western Roman provinces with some material also from Roman Egypt The book then considers how we can use artefacts to understand particular aspects of Roman behaviour and experience including discrepant experiences according to factors such as age social position and left or right handedness which are fostered through artefact design The relationship between production and users of artefacts is also explored investigating what particular production methods make possible in terms of user experience and also examining production constraints that have unintended consequences for users The book examines topics such as the perceived agency of objects differences in social practice across the provinces cultural change and development in daily practice and the persistence of tradition and social convention It shows that design intentions everyday habits of use and the constraints of production processes each contribute to the reproduction and transformation of material culture

Bronze Age Metalworking in the Netherlands (c. 2000-800 BC) M. H. G. Kuijpers, 2008 Almost fifty years ago J J Butler started his research to trace the possible remains of a Bronze Age metalworker s workshop in the Netherlands Yet while metalworking has been deduced on the ground of the existence of regional types of axes and some scarce finds related to metalworking the smith s workplace has remained elusive In this Research Master Thesis I have tried to tackle this problem I have considered both the social as well as the technological aspects of metalworking to be able to determine conclusively whether metalworking took place in the Netherlands or not The first part of the thesis revolves around the social position of the smith and the social organization of metalworking My approach entails a re evaluation of the current theories on metalworking which I believe to be unfounded and one sided They tend to disregard production of everyday objects of which the most prominent example is the axe The second part deals with the technological aspects of metalworking and how these processes are manifested in the archaeological record Based on evidence from archaeological sites elsewhere in Europe and with the aid of experimental archaeology a metalworking toolkit is constructed Finally a method is presented which might help archaeologists recognize the workplace of a Bronze Age smith

Macroevolution in Human Prehistory Anna Prentiss,Ian Kuijt,James C. Chatters,2009-09-18 Cultural evolution much like general evolution works from the assumption that cultures are descendent from much earlier ancestors Human culture manifests itself in forms ranging from the small bands of hunters through intermediate scale complex hunter gatherers and farmers to the high density urban settlements and complex polities that characterize much of today s world The chapters in the volume examine the dynamic interaction between the micro and macro scales of cultural evolution developing a theoretical approach to the archaeological record that has been termed evolutionary processual archaeology The contributions in this volume integrate positive elements of both evolutionary and processualist schools of thought The approach as explicated by the contributors in this work offers novel insights into topics that include the emergence stasis collapse and extinction of cultural patterns and development of social inequalities Consequently these contributions form a stepping off point for a significant new range of cultural evolutionary studies *Continuity and Change in the Native American Village* Robert A. Cook,2017-11-02 Two common questions asked in archaeological investigations are where did a particular culture come from and which living cultures is it related to In this book Robert A Cook brings a theoretically and methodologically holistic perspective to his study on the origins and continuity of Native American villages in the North American Midcontinent He shows that to affiliate archaeological remains with descendant communities fully we need to unaffiliate some of our well established archaeological constructs Cook demonstrates how and why Native American villages formed and responded to events such as migration environment and agricultural developments He focuses on the big picture of cultural relatedness over broad regions and the amount of social detail that can be gleaned from archaeological and biological data as well as oral histories **Culture History and Convergent Evolution** Huw S. Groucutt,2020-07-23 This volume brings together diverse contributions from leading archaeologists and paleoanthropologists covering various spatial and temporal periods to distinguish convergent evolution from cultural transmission in order to see if we can discover ancient human populations With a focus on lithic technology the book analyzes ancient materials and cultures to systematically explore the theoretical and physical aspects of culture convergence and populations in human evolution and

prehistory The book will be of interest to academics students and researchers in archaeology paleoanthropology genetics and paleontology The book begins by addressing early prehistory discussing the convergent evolution of behaviors and the diverse ecological conditions driving the success of different evolutionary paths Chapters discuss these topics and technology in the context of the Lower Paleolithic Earlier Stone age and Middle Paleolithic Middle Stone Age The book then moves towards a focus on the prehistory of our species over the last 40 000 years Topics covered include the human evolutionary and dispersal consequences of the Middle Upper Paleolithic Transition in Western Eurasia Readers will also learn about the cultural convergences and divergences that occurred during the Terminal Pleistocene and Holocene such as the budding of human societies in the Americas The book concludes by integrating these various perspectives and theories and explores different methods of analysis to link technological developments and cultural convergence

Knight, 2013 This book offers an overview of iconographic methods and their application to archaeological analysis It offers a truly interdisciplinary approach that draws equally from art history and anthropology Vernon James Knight Jr begins with a historiographical overview addressing the methodologies and theories that underpin both archaeology and art history He then demonstrates how iconographic methods can be integrated with the scientific methods that are at the core of much archaeological inquiry Focusing on artifacts from the pre Columbian civilizations of North and Meso American sites Knight shows how the use of iconographic analysis yields new insights into these objects and civilizations *The Oxford Handbook of Archaeology and Language* Martine Robbeets, Mark Hudson, 2025-06-24 This volume provides a comprehensive and up to date overview of how archaeology genes and language can be combined to shed light on the human past Our understanding of human prehistory has been revolutionized in recent years by the growth of interdisciplinary perspectives and particularly by insights from the

contributions from specialists in the Palaeolithic Mesolithic Bronze and Iron Ages Thus while this version of European Prehistory is a new book however it still incorporates some data from the 1978 version particularly in The Present Environment and Neolithic chapters Like its predecessor this edition is structured around selected general topics such as technology trade settlement warfare and ritual
