images abstract images music the spoken word and film are read using analytical and descriptive categories derived from the literature of semiotics Multimedia information retrieval tools are also used to index the multimedia objects an exercise which demonstrates the richness of the semiotic approach and the limitations of controlled vocabulary systems In the final chapter the authors reflect on the issues thrown up by this comparison and explore alternatives such as democratic user generated indexing as an alternative Primarily intended for third year undergraduate and postgraduate information studies students the breadth and depth of Indexing Multimedia and Creative Works will also make it relevant and fascinating read
