**Scholars in the Marketplace. The Dilemmas of Neo-Liberal Reform at Makerere University, 1989-2005** Mahmood Mamdani,2007 Scholars in the Marketplace is a case study of market based reforms at Uganda's Makerere University With the World Bank heralding neoliberal reform at Makerere as the model for the transformation of higher education in Africa it has implications for the whole continent At the global level the Makerere case exemplifies the fate of public universities in a market oriented and capital friendly era The Makerere reform began in the 1990s and was based on the premise that higher education is more of a private than a public good Instead of pitting the public against the private and the state against the market this book shifts the terms of the debate toward a third alternative than explores different relations between the two The book distinguishes between privatisation and commercialisation two processes that drove the Makerere reform It argues that whereas privatisation the entry of privately sponsored students is compatible with a public university where priorities are publicly set commercialisation financial and administrative autonomy for each faculty to design a market responsive curriculum inevitably leads to a market determination of priorities in a public university The book warns against commercialisation of public universities as the subversion of public institutions for private purposes      *Canadian Books in Print* ,2003      [Handbook of Eating Disorders](#) Janet Treasure,Ulrike Schmidt,Eric van Furth,2003-07-11 This second edition of the Handbook of Eating Disorders offers a comprehensive critical account of the whole field of eating disorders incorporating both basic knowledge and a synthesis of the most recent developments in the area Many of the important developments in recent years are reflected in this expanded volume such as the basic science of appetite control the discovery of leptin and the knowledge about the neurotransmitters involved in eating An invaluable review of scientific knowledge and approaches to treatment of eating disorders from anorexia nervosa to obesity Covers basic concepts and science clinical considerations of definition and assessment and treatment approaches Focuses on newer developments in research and treatment Reflects evidence based approaches to treatment as a guide to best practice Includes many new chapters and authors who represent the most authoritative scientists and clinicians worldwide      *Computer Games* Blair Carter,2002 Lists the most significant writings on computer games including works that cover recent advances in gaming and the substantial academic research that goes into devising and improving computer games      **Serials in the British Library** ,2003      [Stem Cell Biology and Tissue Engineering in Dental Sciences](#) Ajaykumar Vishwakarma,Paul Sharpe,Songtao Shi,Murugan Ramalingam,2014-11-05 Stem Cell Biology and Tissue Engineering in Dental Sciences bridges the gap left by many tissue engineering and stem cell biology titles to highlight the significance of translational research in this field in the medical sciences It compiles basic developmental biology with keen focus on cell and matrix biology stem cells with relevance to tissue engineering biomaterials including nanotechnology and current applications in various
