Dictionary of Existentialism Haim Gordon, 2013-10-31 Existentialism as a philosophy gained prominence after World War II Instead of focusing upon a particular aspect of human existence existentialists argued that our focus must be upon the whole being as he/she exists in the world Rebelling against the rationalism of such philosophers as Descartes and Hegel existentialists reject the emphasis placed on man as primarily a thinking being Freedom is central to human existence and human relations and encounters cannot be reduced simply to thinking This Dictionary provides through alphabetically arranged entries overviews of the various tenets philosophers and writers of existentialism and of those writers philosophers who in retrospect seem to existentialists to espouse their philosophy Nietzsche Kierkegaard Dostoyevski et al Narratives of Loneliness Olivia Sagan, Eric Miller, 2017-09-28 Rising life expectancies and declining social capital in the developed world mean that an increasing number of people are likely to experience some form of loneliness in their lifetimes than ever before Narratives of Loneliness tackles some of the most pressing issues related to loneliness showing that whilst recent policies on social integration community building and volunteering may go some way to giving an illusion of not being alone ultimately they offer a rhetoric of togetherness that may be more seductive than ameliorative as the condition and experience of loneliness is far more complex than commonly perceived Containing thought provoking contributions from researchers and commentators in several countries this important work challenges us to rethink some of the burning issues of our day with specific reference to the causes and consequences of loneliness Topics include the loneliness and mental health of military personnel loneliness and social media loneliness and sexuality urban loneliness and the experiences of transnational movement and adopted children This book therefore makes an overdue multidisciplinary contribution to the emerging debate about how best to deal with loneliness in a world that combines greater and faster connectedness on the one hand with more intensely experienced isolation on the other Since mile Durkheim first claimed that the structure of society could have a strong bearing on psychological health in the 1890s researchers in a range of disciplines have explored the probable impact of social context on mental health and wellbeing Interdisciplinary in approach Narratives of Loneliness will therefore be of great interest to academics postgraduate students and researchers in social sciences the arts psychology and psychiatry

Of Philosophers and Madmen Richard Askay, M.J. Farquhar, 2011 Preliminary Material Introduction Cast of Characters Play Setting Of Philosophers and Madmen On the Nature of Humans Sigmund Freud Finding Oneself in Heidegger's Early Philosophy Stemming the Tide Martin Heidegger's Critique of Freudian Psychoanalysis A Creative Misunderstanding Ludwig Binswanger In Search of a Humanistic Grounding for Psychoanalysis Medard Boss Toward an Integration of Psychoanalysis and Phenomenological Ontology Bibliography **Virginia Woolf's Common Reader** Katerina Koutsantoni, 2016-02-11 In the first comprehensive study of Virginia Woolf's Common Reader Katerina Koutsantoni draws on theorists from the fields of

sociology sociolinguistics philosophy and literary criticism to investigate the thematic pattern underpinning these books with respect to the persona of the common reader Though these two volumes are the only ones that Woolf compiled herself they have seldom been considered as a whole As a result what they reveal about Woolf's position with regard to the processes of writing reading and critical analysis has not been fully examined Koutsantoni challenges the critical commonplace that equates Woolf's strategy of self effacement and personal removal from her works as a necessary compromise that allowed her to achieve authorial recognition in a male dominated context Rather Koutsantoni argues that an investigation of impersonality in Woolf's essays reveals the potential of the genre to function both as a vehicle for the subjective and dialogic expression of the author and reader and as a venue for exploring topics with which the ordinary reader can relate As she explores and challenges the meaning of impersonality in Woolf's Common Reader Koutsantoni shows how the related issues of subjectivity authority reader response intersubjectivity and dialogism offer useful perspectives from which to examine Woolf's work

Medical Ethics and Meaning at End of Life Richard George Boudreau, 2021-12-02 End of life issues including fear of dying have been recognized as a factor hindering psychosocial functioning in elderly populations As people age many focus with increasing intensity on the issues they face as elderly members of society and as people facing end of life decision making The inevitability of death does not detract from the onset of death anxiety An emerging strategy is the use of existential philosophical principles in the creation of an operational psychoanalytic praxis Because end of life issues often result in the desire by individuals to confront their existence existential philosophy the application of an existential psychotherapeutic approach has been introduced as a part of existing research This has led to the identification of death fear as a major development in the presence of end of life assessments An operational psychoanalytic model that addresses the issue of the fear of death is a major development The underlying belief shared by researchers is that fear is inherent for both doctors and patients and requires understanding and compassion on both sides of the equation This research study is designed to assess the models or psychoanalytical praxes introduced when addressing the needs of elderly individuals and to evaluate both the historical context in which they were formed and the support mechanisms for their continuation

Speaking Together and with God John S. McClure, 2018-04-09 Ours is a time of unprecedented pessimism regarding the possibility of achieving consensus around moral issues Christian liturgical practices which are grounded in a communicative economy of love and mercy contain wisdom that might be of significant help What difference might it make if we confessed sin learned epistemic humility worked at overcoming self deception interceded for others learned to go beyond empathy to compassion and advocacy for the well being of all persons became willing to look beyond the possible for solutions etc and learned from the best homiletical practices how to justify and apply moral positions within an ethic of hospitality and care Speaking Together focuses on the roles that liturgical practices play in promoting genuinely communicative understanding oriented forms of action and explores how liturgical practices contribute to sincere multi

perspectival empathetic and truth seeking conversations regarding moral norms in an increasingly pluralistic world What this means is that our liturgical practices are a way of speaking together and this shapes how we organize and inhabit a shared social life

Persons in Context Roger Frie, William J. Coburn, 2011-01-19 In contemporary forms of psychoanalysis particularly intersubjective systems theory the turn towards contextualism has permitted the development of new ways of thinking and practicing that have dispensed with the notion of isolated individuality For many who embrace this post subjectivist way of thinking and practicing the recognition that all human experience is fundamentally immersed in the world makes the question of individuality seem confusing even anachronistic Yet the challenge of individuality remains an important and pressing issue for contemporary theory and practice many clinicians are left to wonder about the role of individual experience and how to approach it conceptually or clinically This volume of original essays gives the problem of individuality its due without losing sight of the importance of contextualized experience Drawing on a variety of disciplinary backgrounds philosophical developmental biological and neuroscientific the contributors address the tension that exists between individuality and the emergence of contextualism as a dominant mode of psychoanalytic theory and practice thereby providing unique insights into the role and place of individuality both in and out of the clinical setting Ultimately these essays demonstrate that individuality no matter how it may be defined always occurs within a contextual web that forms the basis of human experience Contributors William J Coburn Philip Cushman James L Fosshage Roger Frie Frank M Lachmann Jack Martin Donna Orange Robert D Stolorow Jeff Sugarman

Partners in Thought Donnel B. Stern, 2010-04-02 Building on the innovative work of *Unformulated Experience* Donnel B Stern continues his exploration of the creation of meaning in clinical psychoanalysis with *Partners in Thought* The chapters in this fascinating book are undergirded by the concept that the meanings which arise from unformulated experience are catalyzed by the states of relatedness in which the meanings emerge In hermeneutic terms what takes place in the consulting room is a particular kind of conversation one in which patient and analyst serve as one another's partner in thought an emotionally responsive witness to the other's experience Enactment which Stern theorizes as the interpersonalization of dissociation interrupts this crucial kind of exchange and the eventual breach of enactments frees analyst and patient to resume it Later chapters compare his views to the ideas of others considering mentalization theory and the work of the Boston Change

Process Study Group Approaching the link between dissociation and enactment via hermeneutics metaphor and narrative among other perspectives Stern weaves an experience near theory of psychoanalytic relatedness that illuminates dilemmas clinicians find themselves in every day Full of clinical illustrations showing how Stern works with dissociation and enactment Partners in Thought is destined to take its place beside Unformulated Experience as a major contribution to the psychoanalytic literature
