## **Subjectivity And Selfhood Investigating The First Person Perspective:**

**Subjectivity and Selfhood** Dan Zahavi, 2008-08-29 What is a self Does it exist in reality or is it a mere social construct or is it perhaps a neurologically induced illusion The legitimacy of the concept of the self has been questioned by both neuroscientists and philosophers in recent years Countering this in *Subjectivity and Selfhood* Dan Zahavi argues that the notion of self is crucial for a proper understanding of consciousness He investigates the interrelationships of experience self awareness and selfhood proposing that none of these three notions can be understood in isolation Any investigation of the self Zahavi argues must take the first person perspective seriously and focus on the experiential givenness of the self *Subjectivity and Selfhood* explores a number of phenomenological analyses pertaining to the nature of consciousness self and self experience in light of contemporary discussions in consciousness research Philosophical phenomenology as developed by Husserl Heidegger Sartre Merleau Ponty and others not only addresses crucial issues often absent from current debates over consciousness but also provides a conceptual framework for understanding subjectivity Zahavi fills the need given the recent upsurge in theoretical and empirical interest in subjectivity for an account of the subjective or phenomenal dimension of consciousness that is accessible to researchers and students from a variety of disciplines His aim is to use phenomenological analyses to clarify issues of central importance to philosophy of mind cognitive science developmental psychology and psychiatry By engaging in a dialogue with other philosophical and empirical positions says Zahavi phenomenology can demonstrate its vitality and contemporary relevance

*Self-Awareness and Alterity* Dan Zahavi, 2020-07-15 In the rigorous and highly original *Self Awareness and Alterity* Dan Zahavi provides a sustained argument that phenomenology especially in its Husserlian version can make a decisive contribution to discussions of self awareness Engaging with debates within both analytic philosophy Elizabeth Anscombe John Perry Sydney Shoemaker Hector Neri Castañeda David Rosenthal and contemporary German philosophy Dieter Henrich Manfred Frank Ernst Tugendhat Zahavi argues that the phenomenological tradition has much more to offer when it comes to the problem of self awareness than is normally assumed As a contribution to the current philosophical debate concerning self awareness the book presents a comprehensive reconstruction of Husserl's theory of pre reflective self awareness thereby criticizing a number of prevalent interpretations In addition Zahavi also offers a systematic discussion of a number of phenomenological insights related to the issue of self awareness including analyses of the temporal intentional reflexive bodily and social nature of the self The new edition of this prize winning book has been updated and revised and all quotations have been translated into English It also contains a new preface in which Zahavi traces the developments of the debates around self awareness over the last twenty years and situates this book in the context of his subsequent work

**The Dynamics of Intersubjectivity** Faten Haouioui, 2021-10-11 This collection revises subjectivity in the light of postmodern theories of the subject The contributors gathered here present and discuss a number of different but interrelated subjectivities As such they reconceptualize the theory of subjectivity according to various texts

and contexts such as the subjectivity of discourses the subject under subjugation and the intersubjective construction of the other It introduces a dynamic subjectivity to minority literature colonial postcolonial texts and travel literature to name but a few The dynamics of intersubjectivity provide a space for subjectivities to negotiate and interrelate Moreover this collection shows that intersubjectivity is hybrid yet flexible by nature

### **Intersubjectivity in Psychoanalysis**

Lewis Kirshner, 2017-05-12 In this book Lewis Kirshner explains and illustrates the concept of intersubjectivity and its application to psychoanalysis By drawing on findings from neuroscience infant research cognitive psychology Lacanian theory and philosophy Kirshner argues that the analytic relationship is best understood as a dialogic exchange of signs between two subjects a semiotic process Both subjects bring to the interaction a history and a set of unconscious desires which inflect their responses In order to work most effectively with patients analysts must attend closely to the actual content of the exchange rather than focusing on imagined contents of the patient's mind The current situation revives a history that is shaped by the analyst's participation Supported by numerous case studies *Intersubjectivity in Psychoanalysis A Model for Theory and Practice* is a valuable resource for psychotherapists and analysts seeking to refine their clinical goals and methods

### **The Oxford Handbook of the Philosophy of Consciousness**

Uriah Kriegel, 2020 This handbook provides a panoramic view of current philosophical research on consciousness Bringing together contributions from experts in the field it covers the various types of consciousness the many related psychological phenomena and the relationship between consciousness and physical reality

### *Psychiatry and Neuroscience Update - Vol. V* Pascual Ángel Gargiulo, Humberto Luis

Mesones-Arroyo, 2024-12-28 This book offers a multidisciplinary approach to the phenomenon of addiction including a discussion of its anthropological neurological psychiatric and social aspects The editors have maintained this multidisciplinary criterion since the first volume of the *Psychiatry and Neuroscience Update* collection Approaching a topic from multiple points of view guides the mentality to open to biological and psychological relationships and facilitates translational extrapolations The ability to establish relationships closer or more distant but always binding is thus stimulated whether for study research or the interpretation of clinical reality As in previous volumes the book opens with a part dedicated to anthropological and philosophical aspects thus ensuring the validity of the humanistic aspect *Intersubjectivity* epistemological reflections the meaning of ecstasy and philosophical reflection leading to therapy are explored Part 2 *From Basic Neurosciences to Human Brain* presents a set of basic investigations with high translational content This corresponds with the editors' intention to build bridges here between the basic and the clinical favoring the translational Chapters present topics of interest to both fields such as the neurobiology of addictions cocaine and benzodiazepines Part 3 establishes links between neurosciences learning teaching and the social environment It begins with a chapter on executive functioning before discussing excessive use of computer technology and educational interventions for patients with alcohol addiction The fourth part of the book attempts to explain pathological human behavior It is about establishing links between brain

disorders and diseases in the strict sense Among other topics chapters deal with cognitive dysfunction in addiction neuroimaging and stigma around substance use disorders Psychiatry and Neuroscience Update Addiction From Laboratory and Anthropology to Clinical Practice Vol V was edited and authored by a multidisciplinary group of authors and will be vital for an equally multidisciplinary group of readers psychiatrists psychologists neuroscientists and any other clinician or researcher that is interested in addictions Those in the humanities particularly anthropologists and philosophers will find the first part of great interest **Music and Consciousness 2** Ruth Herbert,David Clarke,Eric Clarke,2019-04-04

Consciousness has been described as one of the most mysterious things in the universe Scientists philosophers and commentators from a whole range of disciplines can't seem to agree on what it is generating a sizeable field of contemporary research known as consciousness studies Following its forebear Music and Consciousness Philosophical Psychological and Cultural Perspectives OUP 2011 this volume argues that music can provide a valuable route to understanding consciousness and also that consciousness opens up new perspectives for the study of music It argues that consciousness extends beyond the brain and is fundamentally related to selves engaged in the world culture and society The book brings together an interdisciplinary line up of authors covering topics as wide ranging as cognitive psychology neuroscience psychoanalysis philosophy and phenomenology aesthetics sociology ethnography and performance studies and musical styles from classic to rock trance to Daoism jazz to tabla and deep listening to free improvisation Music and Consciousness 2 will be fascinating reading for those studying or working in the field of musicology those researching consciousness as well as cultural theorists psychologists and philosophers History, Practice and Pedagogy Susan Barahal,Elizabeth Pugliano,2024-11-21 This edited volume explores the historical practical and pedagogical possibilities for expressing and cultivating empathy through works of art While aspects of what we today recognize as empathy has nestled in the artistic experiences and philosophies of all ages the subjective and elusive nature of empathic responses has often resulted in the relegation of empathy to the margins of art historical inquiry Moving into the second quarter of the twenty first century amidst global health crises civic unrest political turmoil and persistent social inequities and injustices this capacity to feel with and as someone or something outside of ourselves is more critical than ever Probing the very notion of empathy contributions address themes ranging from environmental and social justice to identity and inclusion to transdisciplinary pedagogies and practices each with a critical eye to how works of art not only appeal to empathic sensibilities but might play an active role in developing capacities for empathy in viewers The Oxford Handbook of Phenomenological Psychopathology Giovanni Stanghellini,Matthew

Broome,Anthony Vincent Fernandez,René Rosfort,Andrea Raballo,Paolo Fusar-Poli,2019-07-04 The field of phenomenological psychopathology PP is concerned with exploring and describing the individual experience of those suffering from mental disorders Whilst there is often an understandable emphasis within psychiatry on diagnosis and treatment the subjective experience of the individual is frequently overlooked Yet a patient's own account of how their illness affects their thoughts

values consciousness and sense of self can provide important insights into their condition insights that can complement the more empirical findings from studies of brain function or behaviour The Oxford Handbook of Phenomenological Psychopathology is the first ever comprehensive review of the field It considers the history of PP its methodology key concepts and includes a section exploring individual experiences within schizophrenia depression borderline personality disorder OCD and phobia In addition it includes chapters on some of the leading figures throughout the history of this field Bringing together chapters from a global team of leading academics researchers and practitioners the book will be valuable for those within the fields of psychiatry clinical psychology and philosophy The

Neurobiology-Psychotherapy-Pharmacology Intervention Triangle João G. Pereira,Jorge Gonçalves,Valeria Bizzari,2019-05-30 This book intends to open the debate between three main aspects of clinical practice psychotherapy including psychological and philosophical influences neurobiology and pharmacology These three main themes are clinically applied in what we call the Intervention Triangle The book will first focus on epistemologically distinct frameworks and gradually attempt to consider the integration of these three fundamental vertexes of practice These vertexes are substantially unbalanced in the mental health field and thus this book tries to make sense of this phenomenon Unique in its interdisciplinary and comprehensive view of mental health problems and approaches this book offers a new perspective on unidisciplinary integration that previous publications have not considered As an innovative contribution to its field this volume will be particularly relevant to practitioners working towards integrative frameworks It will also be of interest to students clinicians and researchers in particular those working in psychology medicine psychiatry philosophy social work and pharmacy **Moving Ourselves,**

**Moving Others** Ad Foolen,Ulrike M. Lüdtke,Timothy P. Racine,Jordan Zlatev,2012-04-12 The close relationship between motion bodily movement and emotion feelings is not an etymological coincidence While moving ourselves we move others in observing others move we are moved ourselves The fundamentally interpersonal nature of mind and language has recently received due attention but the key role of emotion in this context has remained something of a blind spot The present book rectifies this gap by gathering contributions from leading philosophers psychologists and linguists working in the area Framed by an introducing prologue and a summarizing epilogue written by Colwyn Trevarthen who brought the phenomenological notion of intersubjectivity to a wider audience some 30 years ago the volume elaborates a dynamical active view of emotion along with an affect laden view of motion and explores their significance for consciousness intersubjectivity and language As such it contributes to the emerging interdisciplinary field of mind science transcending hitherto dominant computationalist and cognitivist approaches Now Open Access as part of the Knowledge Unlatched 2017 Backlist Collection The Interoceptive Mind Manos Tsakiris,Helena de Preester,2019 Interoception is the body to brain axis of sensations that originates from the internal body and visceral organs The Interoceptive Mind From Homeostasis to Awareness offers a state of the art overview of and insights into the role of interoception for mental life awareness

subjectivity affect and cognition      **The Call for Recognition** R. Krishnaswamy, 2023-03-24 This book builds a case for how social norms are neither mere conventions nor are they merely anthropological phenomena which are relativistic In other words it talks about how socio political norms are built out of our natural social behaviour but at the same time also have objective normative validity The volume puts forth an alternative model called the recognitional model which can help us address some of the socio political concerns we face in today s world It addresses the problem with a purely legalistic framework of addressing social injustice in that law due its universalistic assumptions regarding human nature tends to glide over the particular differences that might exist between people This book discusses how we know that in our daily lives we value people not only because that person is a legal human being but also because that person is our father mother our teacher etc There is a whole network of acts of social respect that we engage in with the other in our social sphere which the legal framework can t quite capture This volume sheds light on the political consequence of legal reasoning in that it is formalistic in the sense that legal relations can t successfully codify the immediate epistemic context from which social identities emerge An introspective work this book will be of great interest to scholars and researchers of linguistics political philosophy law and human rights and social theory      *Self, No Self?* Mark Siderits, Evan Thompson, Dan Zahavi, 2013-01-31 The nature and reality of self is a subject of increasing prominence among Western philosophers of mind and cognitive scientists It has also been central to Indian and Tibetan philosophical traditions for over two thousand years It is time to bring the rich resources of these traditions into the contemporary debate about the nature of self This volume is the first of its kind Leading philosophical scholars of the Indian and Tibetan traditions join with leading Western philosophers of mind and phenomenologists to explore issues about consciousness and selfhood from these multiple perspectives Self No Self is not a collection of historical or comparative essays It takes problem solving and conceptual and phenomenological analysis as central to philosophy The essays mobilize the argumentative resources of diverse philosophical traditions to address issues about the self in the context of contemporary philosophy and cognitive science Self No Self will be essential reading for philosophers and cognitive scientists interested in the nature of the self and consciousness and will offer a valuable way into the subject for students      **Science and the Eastern Orthodox Church** Gayle Woloschak, 2016-04-01 Science and the Eastern Orthodox Church explores core theological and philosophical notions and contentious topics such as evolution from the vantage point of science Orthodox theology and the writings of popular recent Orthodox critics as well as supporters Examining what science is and why Eastern Orthodox Christians should be concerned about the topic including a look at well known 20th century figures that are considered holy elders or saints in the Orthodox Church and their relationship and thoughts about science contributors analyse the historical contingencies that contribute to the relationship of the Orthodox Church and science both in the past and present Part II includes critiques of science and considers its limitations and strengths in light of Orthodox understandings of the experience of God and the so called miraculous together with analysis of

two Orthodox figures of the 20th century that were highly critical of science its foundations and metaphysical assumptions Part III looks at selected topics in science and how they relate to Orthodox theology including evolution brain evolution and consciousness beginning of life science nanotechnology stem cell research and others Drawing together leading Orthodox scientists theologians and historians confronting some of the critical issues and uses of modern science this book will be useful for students academics and clergy who want to develop a greater understanding of how to relate Orthodoxy to science

**Embodied Idealism** Joseph Berendzen,2023 Embodied Idealism argues that Maurice Merleau Ponty's early thought stands as a form of transcendental idealism In spite of his overt criticisms of idealism Merleau Ponty holds that our experience is inextricably structured by our minds and that reality is ontologically dependent on the mind **Dialogues**

**with Davidson** Jeff Malpas,2011 There is a philosophical vision at work in Davidson's thinking that exceeds in importance and attraction his masterly analyses of meaning and action even while it matches them in subtlety This volume brings that vision to the fore engaging with it as well as with other aspects of the Davidsonian position in a way that demonstrates its intrinsic significance as well as its connection with the mainstream of contemporary thought Dieter Henrich Professor Emeritus of Philosophy University of Munich **On Time** Marina Denischik,2016-09-23 This volume brings together seven essays that deal with a number of key presentations of time in the history of philosophy Best described as phenomenological studies of time the articles here address the problems and questions of temporality as they appear in the works of thinkers of the Western philosophical tradition The innovative approaches to understanding time that all of the essays feature are grounded in careful research The papers were originally given at the 2015 Phenomenology of Time Boston College

Philosophy Colloquium and thematize philosophical accounts of time offering avenues for thinking about the role of time in psychology cognitive studies physics and education The familiar subjects that are addressed in the pieces by Manoussakis Gay and Floyd offer reflections on temporality of love death and anxiety Biondi's essay elucidates the relationship between time and eternity The more technical papers by Michael Kelly as well as Kevin and Marina Marren draw on such thinkers as Heidegger Kant and Husserl tracing the relationship between conscious awareness of time and the role of temporality in pre cognitive synthesis *Phenomenology and Perspectives on the Heart* Anthony J. Steinbock,2022-06-06 This edited collection marks a new wave of international and philosophical scholarship on the heart that rich dimension of our emotional being in the world This text addresses the relation between feeling and knowing and investigates whether or not the heart has its own way of cognition and critique This book takes up the emotional turn in philosophy in general and phenomenology in particular advancing this field through innovative and original perspectives The contributions come from philosophers working in distinctive yet overlapping areas of research **Mind, Body and Self** Purushottama Bilimoria,Jaysankar Lal Shaw,Anand Vaidya,Michael Hemmingsen,2024-12-10 This book is a unique collaboration of philosophers from across the world bringing together contemporary concepts of consciousness the Mori conception of self as well as Indian and Buddhist

concepts of self and mental states Contemporary concepts of consciousness include higher order consciousness and phenomenological approaches The idea behind this volume came from an international conference on Mind Body and Self held at Victoria University of Wellington organized by the Society for Philosophy and Culture The authors herein contribute to the relationship between concepts of self mind and body The wide variety of contributors from across cultural backgrounds adds to a diverse and valuable conversation on the nature of human existence and thoughts of self This book appeals to students and researchers working in philosophy and religious studies
