Subjectivity And Subjectivisation Linguistic Perspectives:

Subjectivity and Subjectivisation Dieter Stein, Susan Wright, 1995-11-30 The notion of subjectivity explored here concerns expression of self and the representation of a speaker's perspective or point of view in discourse Subjectivization involves the structures and strategies that languages evolve in the linguistic realization of subjectivity and the relevant processes of linguistic evolution themselves This volume reflects the growing attention in linguistics and related disciplines commanded by the centrality in language of the speaker An international team of contributors offers a series of studies on grammatical diachronic and literary aspects of subjectivity and subjectivization from a variety of perspectives including literary stylistics historical linguistics formal semantics and discourse analysis The essays look at the role of the perspective of locutionary agents their expression of affect and modality in linguistic expressions and discourse and the effects of their phenomena on the formal shape of discourse This volume demonstrates how deeply embedded in linguistic expression subjectivity is and how central to human discourse

Subjectification Angeliki Athanasiadou, Costas Canakis, Bert Cornillie, 2011-12-22 Subjectification is a widespread phenomenon and has emerged as a most pervasive tendency in diachronic semantic change Traugott and in synchronic semantic extension Langacker Its importance is increasingly valued despite the fact that it is an area that has been treated differently by different scholars One of the book's objectives is to generate a clearer understanding of the two major models of subjectivity to see where they can meet but also where intrinsic differences present barriers to any integration Another objective is to speculate on whether the notions of subjectivity and subjectification have reshaped our understanding of grammar The goals of the volume are the following The volume brings together contributions dealing with particular areas of grammar in the framework of subjectivity and subjectification Starting with Stein and Wright's 1995 edition publications on the specific process have broadened the scope of this research Indeed the question how far have we come addressed in the introduction has become central in reaching a clearer understanding of the above framework and even expanding it Individual papers explore not only wider questions and implications on the theoretical status of subjectivity and subjectification in language but are empirically supported by thorough and extensive data from different languages Asian languages German Spanish Greek Dutch English These studies of particular areas of grammar modals adjectives or of levels of analysis syntax can help implement or adapt the existing accounts of subjectivity made in the literature The challenge for every single paper is to show whether the two major approaches Langacker's and Traugott's can possibly be integrated or whether they are fundamentally different The papers also investigate into the questions whether we have a continuum from highly subjective to more objective whether subjective need be opposed to objective or whether subjective may also be understood in contrast to neutral which is often the case in Traugott's examples of grammaticalization Furthermore the issue of intersubjectivity i.e. putting the addressee's perspective onstage is also discussed

Subjectivity in Language and Discourse Nicole Baumgarten, Inke Du Bois, Juliane House, 2012-11-02

Subjectivity in Language and in Discourse deals with the linguistic encoding and discursive construction of subjectivity across languages and registers. The aim of this book is to complement the highly specialized parallel and often separate research strands on the phenomenon of subjectivity with a volume that gives a forum to diverse theoretical vantage points and methodological approaches presenting research results in one place which otherwise would most likely be found in substantially different publications and would have to be collected from many different sources. Taken together the chapters in this volume reflect the rich diversity in contemporary research on the phenomenon of subjectivity. They cover numerous languages colloquial academic and professional registers spoken and written discourse diverse communities of practice speaker and interaction types native and non native language use and Lingua Franca communication. The studies investigate both already well explored languages and registers e.g. American English academic writing conversation and with respect to subjectivity less studied languages Greek Italian Persian French Russian Swedish Danish German Australian English as well as many different communicative settings and contexts ranging from conference talk promotional business writing academic advising disease counselling to internet posting translation and university classroom and research interview talk. Some contributions focus on individual linguistic devices such as pronouns intensifiers comment clauses modal verbs adjectives and adverbs and their capacity of introducing the speaker's subjective perspective in discourse and interactional sequence others examine the role of larger functional categories such as hedging and metadiscourse or interactional sequencing.

Intersubjectivity and Intersubjectification in Grammar and Discourse Lieselotte Brems, Lobke Ghesquière, Freek Van de Velde, 2014-08-15. Recent years saw a growing interest in the study of subjectivity as the linguistic expression of speaker involvement. Intersubjectivity defined by Traugott as the linguistic expression of a speaker/writer's attention to the hearer/reader on the other hand has so far received little explicit attention in its own right let alone systematic definition and operationalization. Intersubjectivity and seemingly related notions such as interpersonal meaning appraisal stance and metadiscourse frequently appear in cognitive functional accounts as well as historical and more applied approaches. These domains offer partly conflicting uses of intersubjectivity differ in the overall scope of the concept and the phenomena it may cover. This book brings together contributions from a variety of different approaches with the aim of disentangling the current web of intertwined notions of intersubjectivity. Rather than focusing on the potentially conflicting views the volume aspires to resolve some of the conceptual puzzle by cross fertilization between the different views and spark discussion on how to operationalize intersubjectivity in linguistic research. Texts Senko K. Maynard, 2022-01-17 From the perspective of philosophical contrastive pragmatics this study investigates our multiple selves as manifested in how we use language Based on analyses of original and translation texts of Japanese and English literary works the Japanese self is proposed as being fundamentally empty and yet richly populated with multiple subjective aspects characters and characteristics Incorporating the concept of emptiness drawn from Japanese philosophical traditions and postmodernism primarily developed in the West selves evidenced in grammar style and variation are investigated applying interpretive resources of linguistic subjectivity character and character speak Expressive gaps found in source and target texts across two languages lead us toward different ontological views and guide us to engage in the rethinking of the concept of self

Pragmatics and Corpus Linguistics

Jesús Romero-Trillo, 2008-11-03 The recent history of linguistics has witnessed the development of some disciplines that were conceived apart but benefited from common intuitions One example of this phenomenon is the relationship established throughout time between pragmatics and corpus linguistics Although their arrival heralded the application of two paradigms based on distant theoretical principles they always showed an interest in their mutual advances and their practical reconciliation gave birth to an intellectual synergy that proved very fruitful The present volume is an homage to the symbiosis of pragmatics and corpus linguistics and gathers the works of some of the scholars that have striven to create the liaison between them for a better understanding of language

Metalanguage in

Interaction Yael Maschler, 2009-10-14 Metalanguage in Interaction is about the crystallization of metalanguage employed throughout interaction into the discourse markers which permeate talk Based on close analysis of naturally occurring Hebrew conversation it is a synchronic study of the grammaticization of discourse markers a phenomenon until now mostly studied from a diachronic perspective It constitutes the first monograph in the fields of Hebrew interactional linguistics and Hebrew discourse markers The book first presents what is unique to the present approach to discourse markers and gives them an operational definition Discourse markers are explored as a system illuminating their patterning in terms of function structure and the moments in interaction at which they are employed Next detailed analysis of four Hebrew discourse markers illuminates not only the functions and grammaticization patterns of these markers but also what they reveal about quintessential aspects of Israeli society identity and culture The conclusion discusses commonalities and differences in the

grammaticization patterns of the four markers and relates the grammaticization of discourse markers from interaction to projectability in discourse Late Modern English Syntax Marianne Hundt, 2014-08-14 The Late Modern period is the first in the history of English for which an unprecedented wealth of textual material exists Using increasingly sophisticated databases the contributions in this volume explore grammatical usage from the period specifically morphological and syntactic change in a broad context Some chapters explore the socio historical background of the period while others provide information on prescriptivism newspaper language language contact and regional variation in British and American English Internal processes of change are discussed against grammaticalisation theory and construction grammar and the rich body of textual evidence is used to draw inferences on the precise nature of historical change Exposing readers to a wealth of data that informs the description of a broad range of syntactic phenomena this book is ideal for graduate students and researchers interested in historical linguistics corpus linguistics and language development *Philosophy of Language and Linguistics*

Pragmaticalization Elena Graf, Ulrich Schweier, 2024-09-23 The present volume is dedicated to the phenomenon of pragmaticalization in the context of the theory of grammaticalization While in recent decades the growing interest in the analysis of pragmatic phenomena within grammaticalization research was triggered amongst others by studies in the field of subjectivity and intersubjectivity in language we still lack a model for a broad understanding of how changes on the discourse level come about and face a lack of information which provides a conclusive theoretical framework to systematically record the emergence of an entire layer of discourse units in language The book is one of the first comprehensive collections contributed to the topic of pragmaticalization and includes empirical studies on a wide range of languages from diachronic and synchronic perspectives Aiming to refine our understanding of pragmatic shifts which can be observed by several linguistic units the contributions discuss such issues as pros and cons of the concept of pragmaticalization the parameters of pragmaticalization the emergence of discourse markers and constructions with various pragmatic functions pathways of change including the influence of language contact Concise Encyclopedia of Semantics Keith Allan, 2010-04-06 Concise Encyclopedia of Semantics is a comprehensive new reference work aiming to systematically
