Subjunctive Reasoning

Dov Gabbay

Subjunctive Reasoning:

Subjunctive Reasoning J.L. Pollock, 2012-12-06 I am indebted to many people for the help they gave me in the writing of this book I owe a large debt to David Lewis and Robert Stalnaker on both general and specific grounds As becomes apparent from reading the notes the book would not have been possible without their pioneering work on subjunctive conditionals In addition both were kind enough to provide specific comments on earlier versions of different parts of the book and Stalnaker read and commented on the entire manuscript Closer to home I am indebted to my colleagues Rolf Eberle and Henry Kyburg If my erstwhile colleague Keith Lehrer and numerous graduate students for their helpful comments on various parts of the manuscript Some of the material contained herein appeared first in the form of journal articles and I wish to thank the journals in question for allowing the material to be reprinted here Chapter One contains material taken from The Possible Worlds Analysis of Counterfactuals published in Phil Studies 29 1976 469 Reidel Chapter Two contains material much revised from Four Kinds of Conditionals Am Phil Quarterly 12 1975 and Chapter Three contains much revised material from Subjunctive Generalizations Synthese 28 1974 199 Reidel CHAPTER I INTRODUCTION 1 SUBJUNCTIVE REASONING There exists quite a variety of statements which are in some sense subjunctive *Principles of Knowledge Representation and Reasoning* Bernhard Nebel, Charles Rich, William R. Swartout, 1992 Stringently reviewed papers presented at the October 1992 meeting held in Cambridge Mass address such topics as nonmonotonic logic taxonomic logic specialized algorithms for temporal spatial and numerical reasoning and knowledge representation issues in planning diagnosis and natural language

The Oxford Handbook of Philosophical Methodology Herman Cappelen, Tamar Szabó Gendler, John Hawthorne, 2016-06-23 This is the most comprehensive book ever published on philosophical methodology A team of thirty eight of the world's leading philosophers present original essays on various aspects of how philosophy should be and is done The first part is devoted to broad traditions and approaches to philosophical methodology including logical empiricism phenomenology and ordinary language philosophy The entries in the second part address topics in philosophical methodology such as intuitions conceptual analysis and transcendental arguments The third part of the book is devoted to essays about the interconnections between philosophy and neighbouring fields including those of mathematics psychology literature and film and neuroscience

An Introduction to the Logic of the Sciences Rom Harré, 1983-06-09 *Foundations of Knowledge Representation and Reasoning* Gerhard Lakemeyer, Bernhard Nebel, 1994-06-28 The papers collected in this book cover a wide range of topics in asymptotic statistics In particular up to date information is presented in detection of systematic changes in series of observation in robust regression analysis in numerical empirical processes and in related areas of actuarial sciences and mathematical programming The emphasis is on theoretical contributions with impact on statistical methods employed in the analysis of experiments and observations by biometricians econometricians and engineers **A Philosophical Guide to Conditionals** Jonathan Bennett, 2003 The author one of the world's leading authorities on the subject of conditional

sentences distils many years work and teaching into A Philosophical Guide to Conditionals an authoritative treatment of the subject *The Architecture of the Imagination* Shaun Nichols,2006-09-07 The Architecture of the Imagination will be an essential resource for the growing number of philosophers and psychologists studying the nature of the imagination and on its role in philosophy aesthetics and everyday life Reasoning and Logic , **Topics in Conditional Logic** Donald Nute,1980-02-29 Essays on A Priori Knowledge and Justification Albert Casullo,2012-02-20 This book is a collection of essays concerning the concept and existence of a priori knowledge and the relationship between a priori knowledge and the related concepts of necessary truth and analytic truth Explaining Imagination Peter Langland-Hassan,2020 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Imagination will remain a mystery we will not be able to explain imagination until we can break it into parts we already understand Explaining Imagination is a guidebook for doing just that where the parts are other ordinary mental states like beliefs desires judgments and decisions In different combinations and contexts these states constitute cases of imagining This reductive approach to imagination is at direct odds with the current orthodoxy according to which imagination is a sui generis mental state or process one with its own inscrutable principles of operation Explaining Imagination upends that view showing how on closer inspection the imaginings at work in hypothetical reasoning pretense the enjoyment of fiction and creativity are reducible to other familiar mental states judgments beliefs desires and decisions among them Crisscrossing contemporary philosophy of mind cognitive science and aesthetics Explaining Imagination argues that a clearer understanding of imagination is already well within reach *Conditional Reasoning* Raymond Nickerson,2015-06-12 This book reviews the work of prominent psychologists and philosophers on conditional reasoning It provides empirical research on how people deal with conditional arguments and examines how conditional statements are used and interpreted in everyday communication It also includes philosophical and theoretical treatments of the mental processes that support conditional reasoning making it an ideal resource for students teachers and researchers with a focus in cognition across disciplines *Meaning, Mind, and Knowledge* Christopher S. Hill,2014 Acting together requires collective intentions The contributions to this volume seek to critically assess or to enrich theories of collective intentionality by exploring topics such as collective belief mutual coordination and the explanation of group behavior *Qualitative and Quantitative Practical Reasoning* Dov Gabbay,1997-05-28 This book constitutes the refereed proceedings of the First International Joint Conference on Qualitative and Quantitative Practical Reasoning ECSQARU FAPR 97 held in Bad Honnef Germany in June 1997 The volume presents 33 revised full papers carefully selected for inclusion in the book by the program committee as well as 12 invited contributions Among the various aspects of human practical reasoning addressed in the papers are nonmonotonic logics default reasoning modal logics belief function theory Bayesian networks fuzzy logic possibility theory inference algorithms dynamic reasoning

with partial models and user modeling approaches

Definition and Induction Kisor Kumar Chakrabarti,1995-03-01

Definition is an important scientific and philosophical method In all kinds of scientific and philosophical inquiries definition is provided to make clear the characteristics of the things under investigation Definition in this sense sometimes called real definition should state the essence of the thing defined according to Aristotle In another currently popular sense sometimes called nominal definition definition explicates the meaning of a term already in use in an ordinary language or the scientific discourse or specifies the meaning of a new term introduced in an ordinary language of the scientific discourse Definition combines the purposes of both real and nominal definition and is promoted by the Nyaya philosophers of India Another important method of science and philosophy is induction In a narrow sense induction is a method of generalization to all cases from the observation of particular cases In a broad sense induction is a method for reasoning from some observed fact to a different fact not involved in the former We understand induction in the broad sense though more often we shall actually be concerned with induction in the narrow sense How can our limited experience of nature provide the rational basis for making knowledge claims about unobserved phenomena

Historical Dictionary of Logic Harry J. Gensler,2006-02-27

Historical Dictionary of Logic contains a dictionary section of more than 300 entries on persons concepts theories forms of logic fields in which logic is used and the many fallacies that can trap the unwary It includes entries on historical periods and figures including ancient logic medieval logic Buddhist logic Aristotle Ockham Boole Frege Russell Godel and Quine It also includes information on propositional logic modal logic deontic logic temporal logic set theory many valued logic mereology and para consistent logic A substantial chronology lists the main events in the history of logic and an introduction sketches the central ideas and their evolution The bibliography provides a broad range of additional reading BOOK JACKET

Handbook of Philosophical Logic Dov M. Gabbay,Franz Guenther,2013-06-29 It is with great pleasure that we are presenting to the community the second edition of this extraordinary handbook It has been over 15 years since the publication of the first edition and there have been great changes in the landscape of philosophical logic since then The first edition has proved invaluable to generations of students and researchers in formal philosophy and language as well as to consumers of logic in many applied areas The main logic article in the Encyclopaedia Britannica 1999 has described the first edition as the best starting point for exploring any of the topics in logic We are confident that the second edition will prove to be just as good The first edition was the second handbook published for the logic community It followed the North Holland one volume Handbook of Mathematical Logic published in 1977 edited by the late Jon Barwise The four volume Handbook of Philosophical Logic published 1983 1989 came at a fortunate temporal junction at the evolution of logic This was the time when logic was gaining ground in computer science and artificial intelligence circles These areas were under increasing commercial pressure to provide devices which help and/or replace the human in his daily activity This pressure required the use of logic in the modelling of human activity and organisation on the one hand and to provide the theoretical basis for the

computer program constructs on the other

The to Z of Logic Harry J. Gensler, 2010-02-12 The A to Z of Logic introduces the central concepts of the field in a series of brief non technical cross referenced dictionary entries The 352 alphabetically arranged entries give a clear basic introduction to a very broad range of logical topics Entries can be found on deductive systems such as propositional logic modal logic deontic logic temporal logic set theory many valued logic mereology and paraconsistent logic Similarly there are entries on topics relating to those previously mentioned such as negation conditionals truth tables and proofs Historical periods and figures are also covered including ancient logic medieval logic Buddhist logic Aristotle Ockham Boole Frege Russell G del and Quine There are even entries relating logic to other areas and topics like biology computers ethics gender God psychology metaphysics abstract entities algorithms the ad hominem fallacy inductive logic informal logic the liar paradox metalogic philosophy of logic and software for learning logic In addition to the dictionary there is a substantial chronology listing the main events in the history of logic an introduction that sketches the central ideas of logic and how it has evolved into what it is today and an extensive bibliography of related readings This book is not only useful for specialists but also understandable to students and other beginners in the field
