Subsaharan Africa In The 1990s Challenges To Democracy And Development:

Subsaharan Africa in the 1990s Rukhsana A. Siddiqui, 1997-06-25 The economic performance of African countries south of the Sahara generally has been poor during the past two decades External factors such as high oil prices deteriorating terms of trade and wars and formidable internal factors such as corruption chauvinism authoritarianism and violence have continued to plague the region Whereas in the 1980s the Sub Sahara was overwhelmed by drought devaluation and debt the 1990s have brought the paradox of civil strife and a complex transition to democracy This volume surveys the major political economic social ecological and gender related aspects of Subsaharan Africa s struggle toward democracy Its essays pose two fundamental sets of ideas that the internal equilibrium can be restored only through institutional changes with these countries and that the political and economic dilemmas in the region are closely related to issues of gender and the environment The volume will be of interest to scholars and students of comparative politics developmental economics and African studies

Ghana in Search of Development Dan-Bright Dzorgbo, 2017-11-22 This title was first published in 2001 When Ghana became independent in 1957 becoming the first country in Sub Saharan Africa to banish colonialism there was a general optimism that irreversible socio economic development was about to unfold But by the end of the 1970s Ghana paradoxically became the first country in Twentieth Century Africa to have experienced socio economic decline What failed Ghana This book seeks to answer this question By combining sociological economic political and institutional perspectives this book focuses on the interplay between state politics and socio economic development It provides a model which suggests that Ghana s postcolonial development has suffered mainly as a result of the failure or inability of governing elites to develop consensual politics and a clearly specified long term development objective that could be widely understood accepted and have relevance for policy making This book presents a much needed self assessment of the post colonial development experience which contends that governance economic management and institution building are basic challenges without which the search for development is likely to falter

Governmental Response to Environmental Challenges in Global Perspective Joseph G. Jabbara,O. P. Dwivedi,1998 In our drive to improve human standards of living we have paradoxically paid scant attention to the need for clean air and water the impact of acid rain on agriculture lakes and rivers the effect of pollutants on the ozone layer the safe disposal of hazardous wastes and the relationship between population growth and the environment It seems that every time governments are faced with an apparent choice between economic development and the protection of the environment priority is always given to the former Short term plans dictated by canons of political survival and expediency always seem to take precedence over long term strategies with politicians and decision makers deftly relegating environmental concerns to the realm of rhetoric This book is an effort to better understand the problems faced by our global ecosystems It is also the result of the authors deep commitment to urge both citizens and their leaders the world over to work together for a better protection of the environment so that our planet may be saved for the present and for future generations
